The Intellectual Property-Regulatory Complex Emily Marden, R. Nelson Godfrey, Rachael Manion, 2016-03-06

Advances in agricultural genomics could help address pressing global issues such as world hunger by improving crop yield However overlap and conflict in intellectual property and biosafety regimes known collectively as the Intellectual Property Regulatory Complex create significant barriers to innovation In this collection leading legal policy and economics experts analyze the impact of the Complex on agricultural genomics They reveal how it impacts scientific advancement in ways that are underappreciated when intellectual property and biosafety regimes are examined in isolation After identifying how the interplay between multiple regimes impedes research development and product distribution they propose solutions that would further the aims of the current intellectual property and biosafety regimes while enabling growth and innovation in agricultural genomics

Public Health in the Age of Anxiety Centre for Studies in Religion & Society, 2017-06-30

Controversies and scepticism surrounding vaccinations though not new have increasingly come to the fore as more individuals decide not to inoculate themselves or their children for

cultural religious or other reasons Their personal decisions put the rights of the individual on a collision course with public and community safety

Public Health in the Age of Anxiety enhances both the public and scholarly understanding of the motivations behind vaccine hesitancy in Canada The volume brings into conversation people working within such fields as philosophy medicine epidemiology history nursing anthropology public policy and religious studies The contributors critically analyse issues surrounding vaccine safety the arguments against vaccines the scale of anti vaccination sentiment public dissemination of medical research and the effect of private beliefs on individual decision making and public health These essays model and encourage the type of productive engagement that is necessary to clarify the value of vaccines and reduce the tension between pro and anti vaccination groups

From Biotechnology to Genomes Ph Goujon,2001 Aimed at scientists and non specialised readers alike this book retraces the source of national and international biotechnology programmes by examining the origins of biotechnology and its political and economic interpretation by large nations With a foreword by Andr Goffeau who initiated the European Yeast Genome Project the book describes the achievements of the first genetic and physical maps as well as the political and scientific genesis of the American Human Genome Project Following these advances the author discusses the European biotechnology strategy the birth and implementation of European biotechnology programmes and the yeast genome project After a detailed description of scientific policy and administrative technical and scientific achievements the principal stages of the yeast project and its major benefits are discussed This enables the reader to obtain a panoramic view of this developing discipline at the dawn of the twenty first century as well as a better knowledge of the means deployed at international level The conclusion gives a very detailed account of the genesis and early stages of this new scientific and technological field called genomics which appears to be a key component of modern industry By using an epistemological analysis the conclusion poses the problem of a new representation of life and critically appraises the limitations and deficiencies

production The emerging field of conservation medicine and the important role of veterinarians in protecting biodiversity and conserving wildlife A global perspective on veterinary service delivery and the opportunities and challenges for improving animal health care worldwide The growth of international trade its relation to food safety and animal health and its impact on animal agricultural and veterinary medicine The growing risk of foreign animal disease the national and international institutions involved in animal disease control and the role of the private practitioner in controlling foreign animal disease Nontraditional career paths for veterinarians interested in working internationally and how to identify and prepare for such international career opportunities *Animal Biotechnology* Ashish S. Verma, Anchal Singh, 2020-06-11 *Animal Biotechnology Models in Discovery and Translation* Second Edition provides a helpful guide to anyone seeking a thorough review of animal biotechnology and its application to human disease and welfare This updated edition covers vital fundamentals including animal cell cultures genome sequencing analysis epigenetics and animal models gene expression and ethics and safety concerns along with in depth examples of implications for human health and prospects for the future New chapters cover animal biotechnology as applied to various disease types and research areas including in vitro fertilization human embryonic stem cell research biosensors enteric diseases biopharming organ transplantation tuberculosis neurodegenerative disorders and more Highlights the latest biomedical applications of genetically modified and cloned animals with a focus on cancer and infectious diseases Offers first hand accounts of the use of biotechnology tools including molecular markers stem cells animal cultures tissue engineering ADME and CAM Assay Includes case studies that illustrate safety assessment issues ethical considerations and intellectual property rights associated with the translation of animal biotechnology studies **Animals by Design** ,1998 *How to mainstream sustainability and circularity into the bioeconomy?* Food and Agriculture Organization of the United Nations, 2021-08-31 In its 2020 communique the International Advisory Council on Global Bioeconomy has urged to strengthen good practices and policies to advance the global bioeconomy The transition from a fossil based economy to a bioeconomy happens at three levels technological organizational and social In particular agri food systems are key to achieve a shift to sustainable and circular production and consumption patterns since they occupy the biggest share of the bioeconomy from an economic value added perspective as well as having potential for discovery and innovation This Compendium outlines 250 sources of good practices and policies It covers the entire continuum of economic sectors that have a stake in biological knowledge and resources The Compendium therefore highlights the wide range of aspects that are included in the concept of the bioeconomy Being an inherently multisectoral process that involves potential synergies and trade offs among different sustainability objectives the implementation of bioeconomy strategies presents greater challenges than activities that are focused on a single sector The report also shows how good practices and policies contribute to the translation of bioeconomy strategies into coordinated actions for the achievement of local priorities and sustainability goals while also addressing global issues Overall the review identifies a knowledge gap Assessments do not

always indicate if practices and policies have enough evidence of impact to be recommended as models that contribute to sustainability objectives of the bioeconomy To address this a context specific approach described in Chapter 5 provides support for countries to make evidence based decisions on policies and investments for the bioeconomy The approach helps to identify good practices and policies ex ante which can help achieve common sustainability objectives of bioeconomy strategies that were presented in the 2019 FAO report Towards sustainable bioeconomy Lessons learned from case studies Taken together this Compendium and the 2019 report provide practical guidelines and resources that can support decision makers and stakeholders in bioeconomy systems to make progress towards reaching sustainable outcomes
