Designing Critical Creative Learning Indigenous:

Designing Critical and Creative Learning with Indigenous Youth Donna DeGennaro, 2017-04-13 *Designing Critical and Creative Learning with Indigenous Youth* A Personal Journey traces the events leading to the creation of *Unlocking Silent Histories* USH and outlines the program's foundational and methodological principles. The book opens with an explanation of the author's struggles with the theory-practice tension, a conflict that has inhibited the widespread adoption and actualization of socially just learning engagements. She then offers her rationale for taking a leave from academia to concentrate fully on developing a critical pedagogy informed learning design facilitated by combining community connected inquiry with video ethnography. The substance of the text focuses on the identified foundational and methodological principles explained through first-hand accounts of USH's year one participants. These youth-centered chapters assist in presenting an argument for employing culturally responsive and socially just educational engagements. At the same time, the chapters illustrate how drawing on youth voice can more broadly contribute to bridging theory and practice in communities that are often disconnected from the larger educational discourse. The author does not intend to provide a scripted implementation process within USH or of educational in general. Rather, she uses first-hand youth accounts in this cultural context to give the reader a lived experience of how a youth-directed emergent learning path materializes when employing a model that draws on local knowledge and invite youth voice.

Imagination for Inclusion Derek Bland, 2016-02-12 *Imagination for Inclusion* offers a reconsideration of the ways in which imagination engages and empowers learners across the education spectrum from primary to adult levels and in all subject areas. Imagination as a natural expedient and exciting learning tool should be central to any approach to developing and implementing curriculum but is increasingly undervalued as learners progress through the education system. This disregards not only imagination's potential but its paramount place in informing truly inclusive approaches to teaching and learning. This book presents a new theory of imagination and includes discussion about its application to teaching and learning to increase the engagement of disaffected students and reinvigorate their relationships with curriculum content. Chapters include key ideas and discussion surrounding the benefits of introducing imaginative practices into the classroom for learners from a range of marginalised backgrounds such as young people with disabilities and adult learners from socio-economically disadvantaged environments. In exploring imagination in the practice of inclusive education, the book includes chapters from researchers and practitioners in education who have fresh ideas about how learners and teachers have benefited from introducing imaginative pedagogies. The diverse collection featuring writers with backgrounds from early childhood to adult education will be essential reading for academics and researchers in the fields of education, inclusive education, social policy, professional development, teacher education and creativity. It will be of particular interest to current and pre-service teachers who want to develop inclusive practice and increase the engagement of all students with formal education.
