Lechner,Patricia Andrasik,2021-10-26 The essential guide to environmental control systems in building design For over 25 years Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture has provided architects and design professionals the knowledge and tools required to design a sustainable built environment at the schematic design stage This Fifth Edition offers cutting edge research in the field of sustainable architecture and design and has been completely restructured based on net zero design strategies Reflecting the latest developments in codes standards and rating systems for energy efficiency Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture includes three new chapters Retrofits Best practices for efficient energy optimization in existing buildings Integrated Design Strategies for synergizing passive and active design Design Tools How to utilize the best tools to benchmark a building s sustainability and net zero potential Heating Cooling Lighting Sustainable Design Strategies Towards Net Zero Architecture is a go to resource for practicing professionals and students in the fields of environmental systems technology or design environmental design systems construction technology and sustainability technology

Daylighting Design in the Pacific Northwest Christopher Martin Meek,Kevin G. Van Den Wymelenberg,2012 In addition to conserving energy the use of daylight in architecture can be a powerful aesthetic tool The effective employment of natural lighting is an important component of sustainable design and some of the best work in this area comes from the Northwest This practice based book focuses on fourteen projects ranging from schools to community centers to office buildings to a garbage recycling center It discusses the particular challenges of each project and the solutions found by the design teams as they sought to take advantage of daylight to create pleasant workable energy efficient spaces In each case consideration has been given to location elevation orientation microclimate throughout the seasons and the effect on light of surrounding structures land forms and trees as well as to the lighting requirements of occupants While some sustainable design strategies are general and not specific to place place specific opportunities and challenges are especially important in daylighting design This book spotlights innovative design in a region heavily influenced by climate and landscape makes use of environmentally friendly

technologies and looks at projects that aim to achieve social as well as aesthetic goals It will be of great value to architects engineers lighting designers and green building consultants as well as to students in these fields Christopher Meek is research assistant professor of architecture at the University of Washington Kevin Van Den Wymelenberg is assistant professor of architecture at the University of Idaho

Building Performance Simulation for Design and Operation Jan L.M. Hensen,Roberto Lamberts,2019-04-24 When used appropriately building performance simulation has the potential to reduce the environmental impact of the built environment to improve indoor quality and productivity as well as to facilitate future innovation and technological progress in construction Since publication of the first edition of Building Performance Simulation for Design and Operation the discussion has shifted from a focus on software features to a new agenda which centres on the effectiveness of building performance simulation in building life cycle processes This new edition provides a unique and comprehensive overview of building performance simulation for the complete building life cycle from conception to demolition and from a single building to district level It contains new chapters on building information modelling occupant behaviour modelling urban physics modelling urban building energy modelling and renewable energy systems modelling This new edition keeps the same chapter structure throughout including learning objectives chapter summaries and assignments Moreover the book Provides unique insights into the techniques of building performance modelling and simulation and their application to performance based design and operation of buildings and the systems which service them Provides readers with the essential concepts of computational support of performance based design and operation Provides examples of how to use building simulation techniques for practical design management and operation their limitations and future direction It is primarily intended for building and systems designers and operators and postgraduate architectural environmental or mechanical engineering students

The Art of Architectural Daylighting Mary Guzowski,2018-06-26 During the past decade there has been a tremendous growth in daylighting analysis methods allowing designers to meet ever higher standards But in relying too heavily on these methods there is a risk of reducing daylighting design to a quantitative exercise overlooking the qualitative aesthetic and experiential aspects of design This book reveals how architects have bridged the poetic and practical potential of daylighting to create exquisitely illuminated spaces In the book 12 buildings are examined using photographs drawings and plans Each case study also includes technical analysis diagrams specially created using specialist software Featured architects include Renzo Piano David Chipperfield and Steven Holl The Art of Architectural Daylighting will be invaluable for professionals and students alike
