Moe,2011-04-01 Why are America s public schools falling so short of the mark in educating the nation s children Why are they organized in ineffective ways that fly in the face of common sense to the point that it is virtually impossible to get even the worst teachers out of the classroom And why after more than a quarter century of costly education reform have the schools proven so resistant to change and so difficult to improve In this path breaking book Terry M Moe demonstrates that the answers to these questions have a great deal to do with teachers unions which are by far the most powerful forces in American education and use their power to promote their own special interests at the expense of what is best for kids Despite their importance the teachers unions have barely been studied Special Interest fills that gap with an extraordinary analysis that is at once brilliant and kaleidoscopic shedding new light on their historical rise to power the organizational foundations of that power the ways it is exercised in collective bargaining and politics and its vast consequences for American education The bottom line is simple but devastating as long as the teachers unions remain powerful the nation s schools will never be organized to provide kids with the most effective education possible Moe sees light at the end of the tunnel however due to two major transformations One is political the other technological and the combination is destined to weaken the unions considerably in the coming years loosening their special interest grip and opening up a new era in which America s schools can finally be organized in the best interests of children **The School Principal** Theodore J.

Public Education Reform and Network Governance Philip Wing Keung Chan, 2019-03-05 This book is located in the field of education governance and sits amidst debates on public school reform in China It examines how a top down policy approach has been implemented from central government right down to the district level within the public education system in China It shows the way networks support negotiation and bargaining at the district level which in turn influences the broader education policy of the central government Using statistical data from education yearbooks government documents analysis and interviews with main stakeholders in this policy arena the book incorporates case studies from railway State

Owned Enterprise schools Analysis of these indicates that the processes of formulating and implementing Chinese education policy can be characterised as a form of network governance which coordinates actors decision making processes and stakeholders motivation to comply with collective decisions in Chinese education Network governance acts as an effective and legitimate way of problem solving that assists policy implementation and education reform in China By comparing two traditional modes of governance governance through bureaucracy and the governance through markets this book shows the network mode of governance in Chinese education is more powerful and significant especially since the negotiated results among actors in the policy community are favourable **Thinking About Schools** Aimee Howley,Craig Howley,2012-11-12

As its title implies this book has a deceptively simple mission to prepare would be school leaders to draw upon a variety of theoretical perspectives when thinking about schools and schooling It shows how theories can function as cognitive tools to be mastered carefully stored in one s intellectual toolbox and used to interpret and resolve real world problems Beneath this goal lies the belief that the most effective leaders are those who are able to construct their own well grounded interpretations of events and their own responses to those events Key features of this exciting new text include the following Focus on Alternative Theories The functionalist theoretical views that have dominated administrator preparation programs for the last half century are reviewed early in the book and are shown to be inadequate to the task of understanding and coping with the complex realities of modern day schooling The remainder of the book presents alternative views of schooling that taken together can be thought of as a theoretical repertoire from which to construct interpretations and solutions to everyday real world problems Focus on Diversity Diversity is examined from a variety of viewpoints Chapter 6 looks at the cultural bases of leadership Chapter 7 at comparative and international contexts and Chapter 8 at gender and sexual orientation Illustrative Cases Each chapter contains a case with an embedded dilemma similar to those that real world administrators confront While illustrating the particular theoretical view presented in the chapter these cases are sufficiently complex that they lend themselves to interpretation by any of the other theories considered in the book This book is appropriate for graduate level courses with titles such as Organizational Theory Theory of School Leadership or Introduction to Educational Administration It might also be used as one of several texts in advanced courses on leadership theory
