Oermann, Kathleen B. Gaberson, 2009-05-18 Designated a Doody

s Core Title and Essential Purchase Without question this book should be on every nurse educator's bookshelf or at least available through the library or nursing program office. Certainly all graduate students studying to be nurse educators should have a copy. *Nursing Education Perspectives* This third edition is an invaluable resource for theoretical and practical application of evaluation and testing of clinical nursing students. Graduate students and veteran nurses preparing for their roles as nurse educators will want to add this book to their library. Score 93 4 stars Doody's This 3rd edition has again given us philosophical, theoretical, and social ethical frameworks for understanding assessment and measurement as well as fundamental knowledge to develop evaluation tools for individual students and academic programs. Nancy F. Langston PhD RN FAAN Dean and Professor Virginia Commonwealth University School of Nursing. All teachers need to assess learning. But often teachers are not well prepared to carry out the tasks related to evaluation and testing. This third edition of *Evaluation and Testing in Nursing Education* serves as an authoritative resource for teachers in nursing education programs and health care agencies. Graduate students preparing for their roles as nurse educators will also want to add this book to their collection. As an inspiring award-winning title, this book presents a comprehensive list of all the tools required to measure students' classroom and clinical performance. The newly revised edition sets forth expanded coverage on essential concepts of evaluation, measurement, and testing in nursing education: quality standards of effective measurement instruments; how to write all types of test items and establish clinical performance parameters and benchmarks; and how to evaluate critical thinking in written assignments and clinical performance. Special features include: The steps involved in test construction with guidelines on how to develop test length, test difficulty, item formats, and scoring procedures; Guidelines for assembling and administering a test, including design rules and suggestions for reproducing the test; Strategies for writing multiple choice and multiple response items; How to develop test items that prepare students for licensure and certification examinations. Like its popular predecessors, this text offers a seamless blending of theoretical and practical insight on evaluation and testing in nursing education, thus serving as an invaluable resource for both educators and students.

Preparing for MQF Documentation: A Manual (UUM Press) Nurahimah Mohd. Yusoff, Ahmad Jelani Shaari, Abdul Malek Abdul Karim, Mohd Izam Ghazali, Razamin Ramli, Abdul Sukor Shaari, Hamidah Bee Bi Abdul Karim, Ruzlan Md Ali, Arsaythamby Veloo, Zahyah Hanafi, Ismail Mustafa, 2011-01-01. Accreditation is a certification of the academic quality of an institution of higher learning. Some countries require accreditation, and others consider it optional. Some countries accredit through official government agencies, while others appoint independent or private organizations that oversee the whole educational accreditation process. In Malaysia, the Malaysian Qualifications Agency (MQA) is the sole responsible body to monitor the accreditation process for all Higher Education Institutions (HEIs). This manual is a standard reference to assist lecturers and teachers in preparing MQF documents. It sets to provide clear guidelines on details of how to prepare all documents necessary for MQA accreditation.

Mastering Modern Psychological Testing Cecil R. Reynolds, Robert A. Altmann, Daniel N. Allen, 2021-05-13. This book

provides a comprehensive introduction to psychological assessment and covers areas not typically addressed in existing test and measurements texts such as neuropsychological assessment and the use of tests in forensics settings The book introduces the vocabulary of the profession and the most basic mathematics of testing early as being fundamental to understanding the field Numerous examples are drawn from tests that the authors have written or otherwise helped to develop reflecting the authors deep understanding of these tests and their familiarity with problems encountered in test development use and interpretation Following the introduction of the basic areas of psychometrics the book moves to areas of testing that represent various approaches to measuring different psychological constructs memory language executive function etc with emphasis on the complex issue of cultural bias in testing Examples of existing tests are given throughout the book however this book is not designed to prepare students to go out and administer score and interpret specific psychological tests Rather the purpose of this book is to provide the foundational core of knowledge about tests measurement and assessment constructs issues and quantitative tools Explains what constitutes a psychological test how tests are developed how they are best used and how to evaluate their strengths and weaknesses Describes areas of testing that represent different approaches to measuring different psychological constructs Explains applications of psychological testing to issues in the courts Addresses how test authors and publishers design and research tests to address the difficult and demanding issues of cultural differences in test performance and interpretation of test results
