, 2001-10 *Community Colleges in the 1990s* Glen Gabert, 1991 Designed to provide an overview of the dramatic changes affecting community college education, this booklet presents a history of the movement which established community colleges, examines issues of particular importance in the 1990s, and offers predictions concerning community colleges in the 21st century. Following an introduction and brief history, the booklet profiles today's community colleges, reviewing the mission of two-year institutions and describing the characteristics which distinguish them from four-year schools. Then student enrollments for the 1990s are discussed in terms of the factors contributing to projected enrollment increases. This section provides vignettes profiling 13 hypothetical students and the circumstances surrounding their enrollment and highlights the demographic characteristics of the community college students of 1990. The next three sections look at curriculum and instruction, staffing, and finance, respectively, each concluding with a series of relevant questions currently facing community colleges. The final section provides a series of predictions concerning the status of community colleges in the year 2000, foretelling that the student body will include more minorities and persons over the age of 55, that the majority of faculty will have been hired in the 1990s subsequent to massive retirements, and that the academic agendas of fewer community colleges will be dictated by four-year institutions. PAA **Street Gangs and the Schools** Kevin W. Riley, 1991 Schools cannot approach the problem of street gangs with the same strategies as law enforcement agencies but rather must create a nurturing environment for all students where success in school and life becomes the only attractive option for gang members. Street gangs represent the racial, cultural, and economic diversity of American society. Gangs are similar to other organizations in that they have a name, claim territory, have a continuous membership, and distinguish themselves from other groups. However, to qualify as a gang, the organization must be involved in criminal activity. Gang involvement can range from simple admiration or identification with someone who is in a gang to classification by a law enforcement agency as a documented full participant. The following factors contribute to gang involvement: 1 power, 2 pride, 3 prestige, 4 peer pressure, 5 adventure, 6 self-preservation, 7 money, and 8 limited life options. Schools must avoid the unproductive approach of attempting to identify and discipline gang members based on stereotyped behaviors. A positive educational approach to preventing gang involvement should include the following components: 1 staff development, 2 values education, 3 school climate, 4 cultural inclusion, and 5 community involvement. The Portfolio Approach to Assessment Emily Grady,1992 The shortcomings of standardized testing as the predominant form of student assessment in the United States are reviewed and the use and potential benefits of portfolio assessment are explored Children s educational experiences and their future job prospects and standards of living are being decided by test scores Moreover these test scores may be unfair or biased against some students Instead of more tests we need a new attitude toward assessment one that encourages a variety of assessments Portfolio assessment through collections of student works can be an encompassing format for this new philosophy Before considering what a portfolio should contain it is important to establish the purpose of the assessment The experiences of Vermont illustrate the development of a portfolio assessment with consistent standards Examples of guidelines for mathematics and language arts portfolios make it clear that it is possible to establish consistent practices It is also necessary to reflect on the portfolio occasionally using self evaluations and direct questions or profiles Educators also find portfolios useful tools for preservice

teachers Portfolio assessment can be the framework for a new curricular structure that integrates assessment into the learning loop SLD

Hypermedia Dan H. Wishnietsky,1992 Hypermedia is not a single technology it is an integrated electronic environment that combines text audio and video into one large file Users can explore information about a subject using several technologies at the same time Although the technical foundation for hypermedia was established in the early 1970s it was not until the late 1980s and early 1990s that the hardware for supporting hypermedia became readily available In a hypermedia system each component of stored information is a node and the nodes are connected by paths The paths that a user travels are determined by interest experience and need Hypermedia systems have many classroom applications and can revolutionize a student s view of learning with the hardware and software currently available As hypermedia technology develops the educational environment will advance beyond lectures notetaking and other common forms of learning Edutainment the combining of education and entertainment and virtual reality are extensions of hypermedia that promise to improve the learning environment A 13 item resource list cites the names and addresses of organizations and journals that provide information about hypermedia SLD
