Khan, Sarvajeet Singh, Shahid Umar, 2008-01-25 Sulfur is one of the four major essential elements necessary for the plant life cycle Its assimilation in higher plants and its reduction in metabolically important sulfur compounds are crucial factors determining plant growth and vigor and resistance

to stresses The range of biological compounds that contain sulfur is wide The information on sulfur assimilation can be exploited in tailoring for efficient sulfur utilization and in the applied approaches for the sustenance of agricultural productivity through nutritional improvement and increased stress tolerance The present book discusses the aspects of sustainable crop production with sulfur the importance of sulfur metabolites and sulfur metabolizing enzymes in abiotic stress management in plants

Reactive Oxygen Species and Antioxidant Systems in Plants: Role and Regulation under Abiotic Stress M. Iqbal R. Khan, Nafees A. Khan, 2017-08-02 The present edited book is an attempt to update the state of art of the knowledge on metabolism of ROS and antioxidants and their relationship in plant adaptation to abiotic stresses involving physiological biochemical and molecular processes The chapters are much focused on the current climate issues and how ROS metabolism can manipulate with antioxidant system to accelerate detoxification mechanism It will enhance the mechanistic understanding on ROS and antioxidants system and will pave the path for agricultural scientists in developing tolerant crops to achieve sustainability under the changing environmental conditions The increase in abiotic stress factors has become a major threat to sustainability of crop production This situation has led to think ways which can help to come out with potential measures for which it is necessary to understand the influence of abiotic stress factors on crops performance and the mechanisms by which these factors impact plants It has now become evident that abiotic stress impacts negatively on plant growth and development at every stage of plant's life Plants adapt to the changing environment with the adjustment at physiological biochemical and molecular levels The possible mechanisms involved in the negative effects of abiotic stress factors are excess production of reactive oxygen species ROS They alter physiological and molecular mechanisms leading to poor performance of plants Plants however are able to cope with these adverse effects by inducing antioxidant systems as the priority Nevertheless the dual role of ROS has now been ascertained which provides an evidence for regulation of plant metabolism positively on a concentration dependent manner Under conditions of high ROS production the antioxidant system plays a major role in diminishing the effects of ROS Thus ROS production and antioxidant system are interwoven with abiotic stress conditions The antioxidants have the capacity to hold the stability in metabolism in order to avoid disruption due to environmental disturbances

II Mirza Hasanuzzaman, 2020-06-01 This book presents the state of the art in plant ecophysiology. With a particular focus on adaptation to a changing environment, it discusses ecophysiology and adaptive mechanisms of plants under climate change. Over the centuries, the incidence of various abiotic stresses such as salinity, drought, extreme temperatures, atmospheric pollution, metal toxicity due to climate change have regularly affected plants, and some estimates suggest that environmental stresses may reduce the crop yield by up to 70%. This in turn adversely affects the food security. As sessile organisms, plants are frequently exposed to various environmental adversities. As such, both plant physiology and plant ecophysiology begin with the study of responses to the environment. Provides essential insights, this book can be used for courses such as Plant Physiology, Environmental Science, Crop Production and Agricultural Botany. Volume 2 provides up-to-date information on the impact of climate change on plants, the general consequences, and plant responses to various environmental stresses. **Sustainable Soil and Land Management and Climate Change** Shah Fahad, Osman
