Efficacy Of Various Waveforms To Support Geolocation:

Efficacy of Various Waveforms to Support Geolocation ,2009 This thesis investigates the impact of various waveform parameters on the ability to estimate accurately the position of the source of a known data less emission that is visible to multiple simultaneous collectors It provides an overview of the basic geolocation problem and identifies various parameters affecting geolocation accuracy showing those that are affected by the waveform and those that are not Performance estimates are provided for detecting the signal and for estimating the time and frequency of arrival TOA and FOA of the signal which are the key measure of a waveform s ability to support geolocation Several exemplar waveforms are chosen to illustrate the effects of various waveform parameters and the performance of these example waveforms is verified through software simulations Results show for additive white Gaussian noise AWGN interference that accuracy of estimates is predominantly determined by the transmit power i e received SNR signal bandwidth for TOA and signal duration for FOA For a given SNR occupied bandwidth and total duration a waveform can be shaped in the time and frequency domains to improve performance relative to a reference direct sequence spread spectrum DSSS signal Software simulations confirm theoretical performance estimates This thesis summarizes the effects of various waveform parameters on geolocation performance demonstrates these by modeling exemplar waveforms and provides software that can be used to simulate performance

Signal ,2004 *Geolocation of RF Signals* Ilir Proгри,2011-01-15 Geolocation of RF Signals Principles and Simulations offers an overview of the best practices and innovative techniques in the art and science of geolocation over the last twenty years It covers all research and development aspects including theoretical analysis RF signals geolocation techniques key block diagrams and practical principle simulation examples in the frequency band from 100 MHz to 18 GHz or even 60 GHz Starting with RF signals the book progressively examines various signal bands such as VLF LF MF HF VHF UHF L S C X Ku and K and the corresponding geolocation requirements per band and per application to achieve required performance objectives of up to 0o precision Part II follows a step by step approach of RF geolocation techniques and concludes with notes on state of the art geolocation designs as well as advanced features found in signal generator instruments Drawing upon years of practical experience and using numerous examples and illustrative applications Ilir Proгри provides a comprehensive introduction to Geolocation of RF Signals and includes hands on real world labs and applications using MATLAB in the areas of RF signals specifications RF geolocation distributed wireless communications networks and RF geolocation Geolocation of RF Signals Principles and Simulations will be of interest to government agency program managers industry professionals and engineers academic researchers faculty and graduate students who are interested in or currently designing developing and deploying innovative geolocation of RF Signal systems *Army Science and Technology Master Plan* United States Department of the Army,1998 *Department of Defense Authorization for Appropriations for Fiscal Year 2001 and the Future Years Defense Program* United States.
