Feeding the World Well Alan M.

Goldberg, 2020-10-27 Leading experts reveal ways that the future of food production for the world's burgeoning population can and must be both sustainable and ethical In the United States food is abundant and cheap but loaded with hidden costs to the environment human health animal welfare and the people who work in our food systems The country's current food production systems lack diversity in crops and animals and are intensified but not sustainable inhumane in the treatment of animals and inconsiderate of labor In order to feed the world's rapidly growing population with high quality ethically produced food new food production systems are urgently needed These new systems must be genetically diverse and

environmentally sustainable and they need to follow internationally recognized animal welfare and labor practices Feeding the World Well examines these costs of cheap food while presenting a unique framework for ethical food systems the Core Ethical Commitments which are designed to guide consumers in choosing foods that are aligned with their values while helping producers enhance the ethics of their practices and products Edited by Alan M Goldberg the volume features contributions from leading ethicists and food systems experts Addressing complex issues such as climate change worker exploitation obesity antibiotic resistance wasted food and biotechnology the book discusses the fundamental forces that have shaped and will continue to shape our food systems It also describes some of the approaches that food companies and nonprofit organizations are using to address the ethical challenges facing these food systems Finally the book explains what the Core Ethical Commitments are and what they are not how they were developed and how they might be used by food system actors By bringing together an all star group of contributors from academia and industry Feeding the World Well sets a new course for food production and how it is evaluated By including the voices of industry leaders alongside those of researchers and regulators the book prepares the food production industry for a world in which ethical or sustainable production practices are not only trendy but necessary to ensure that we can feed the world s growing population Conceived as a textbook for food studies courses this volume will appeal to anyone who is strongly interested in food including conscious consumers food industry leaders researchers and policy makers Contributors Anne Barnhill Martin W Bloem Jonathan Bloom Nicole M Civita Claire Davis Michiel van Dijk Adele Douglass Shauna Downs Kevin Esvelt Ruth Faden Jessica Fanzo Evan Fraser Maisie Ganzler Tara Garnett Sara Glass Alan M Goldberg Christopher Good Meredith Kaufman Gillian Kelleher Frederick L Kirschenmann Herman B W M Ko ter Jennifer Kuzma Kees van Leeuwen Robert Martin Anne E McBride Suzanne McMillan Tom Morley Marion Nestle Peter O Driscoll Lance B Price Marie Luise Rau Bernard Rollin Yashar Saghai Susan A Schneider Ellen K Silbergeld Paul B Thompson Paul Willis Sylvia Wulf
