**Ritual bones or common waste** J. Thilanderkivist,2013-11-01 This book addresses the problems of identifying human actions behind finds of bones in settlement archaeology exemplified with the identification of ritual deposits In order to formulate a methodological framework for approaching the identification of ritual deposits different methods are tested on four Early Medieval case study sites Dongjum and Leeuwarden two artificial dwelling mounds situated in the then undiked salt marches of the Northern Netherlands Midlaren an inland settlement in Drenthe also in the Northern Netherlands and finally Upp kra a central place in the South of Sweden The bone fragments from the four materials are studied in a five step process of definition description identification interpretation and explanation The deposits are discussed with the help of various archaeological ethnographic and historical sources The results of the analysis lead to a methodological framework for understanding individual deposits based on a holistic perspective where all information is regarded as potentially valuable various methods are taken into consideration and simplification is avoided *Norse Greenland: Viking Peasants in the Arctic* Arved Nedkvitne,2018-10-11 How could a community of 2000 3000 Viking peasants survive in Arctic Greenland for 430 years ca 985 1415 and why did they finally disappear European agriculture in an Arctic environment encountered serious ecological challenges The Norse peasants faced these challenges by adapting agricultural practices they had learned from the Atlantic and North Sea coast of Norway Norse Greenland was the stepping stone for the Europeans who first discovered America and settled briefly in Newfoundland ca AD 1000 The community had a global significance which surpassed its modest size In the last decades scholars have been nearly unanimous in emphasising that long term climatic and environmental changes created a situation where Norse agriculture was no longer sustainable and the community was ruined A secondary hypothesis has focused on ethnic confrontations between Norse peasants and Inuit hunters In the last decades ethnic violence has been on the rise in Eastern Europe the Middle East and parts of Africa In some cases it has degenerated into ethnic cleansing This has strengthened the interest in ethnic violence in past societies Challenging traditional hypotheses is a source of progress in all science The present book does this on the basis of relevant written and archaeological material respecting the methodology of both sciences Njáls Saga Lars Lönnroth,1976-01-01 **Tolkien and Alterity** Christopher Vaccaro,Yvette Kisor,2017-10-11 This exciting collection of essays explores the role of the Other in Tolkien's fiction his life and the pertinent criticism It critically examines issues of gender sexuality race and ethnicity language and identity in The Lord of the Rings The Silmarillion and lesser known works by Tolkien The chapters consider characters such as Lobelia Sackville Baggins Saruman Owyn and the Orcs as well as discussions of how language and identity function in the source texts The analysis of Tolkien's work is set against an examination of his life personal writing and
