Theory of Philosophical Consciencism Dompere, Kofi Kissi, 2017-09-24 In the Theory of Philosophical Consciencism Professor Dompere establishes how Nkrumah used the theory of categorical conversion housing the necessary conditions of transformation to design strategies for creating the sufficient conditions for socio political transformations The theory of Philosophical Consciencism is about the institutionally destruction creation process for socio political transformation The theory shows the scientific contributions of Nkrumah s thinking to the solution of the transformation problem in science and its application to social systemcity where Nkrumah s analytical weapons were drawn from African conceptual system The theory is developed as logico mathematical foundations that guide the internal management of the command control decision choice systems for creative destruction of socio political varieties in transformations through the development of qualitative mathematics making possible the construct of qualitative equations of motion for connecting varieties in qualitative transfers The qualitative equations of motion through the Philosophical Consciencism constitute the sufficient conditions for transformations The theory links rationality intentionality experiential information structure defective deceptive information structures in the control dynamic games of power and dominance by the duals and poles under the principle of opposites with relational continua and unity relative to decision choice systems that induce negation negation transformations where paths are established by the history of success failure outcomes in the socially control dynamic zero sum games between the duals in any duality and between the poles of any actual potential polarity The main premise of the monograph is that there exists a set of sufficient conditions in support of the necessary conditions for internal transformation of socio natural varieties The theory is useful in understanding developmental processes and multi polar power zero sum games for global dominance The necessary conditions constitute the natural necessity that constrains cognitive freedom The sufficient conditions constitute cognitive freedom that must overcome the necessity in socio natural systems dynamics Had this conceptual system been familiar to African leaders the African transformation from colonialism to complete emancipation rather than neocolonialism would have been increasingly successful This holds for those seeking triumph over injustices oppression imperialism and social change in all systems Moorish Circle 7 Keith Moore

32,2005-05-04 This book is based on the theory that the black Muslim movement was created from the knowledge of the Masonic order In the early decades of the 20th century noble drew ali established a political and religious organization known today as the Moorish Science Temple of America It was this organization that exposed black to something other than the normal Christian influences of that day Ali a high degree freemason incorporated various Masonic teachings from an auxiliary group Known as the AEAONMS ancient Egyptian Arabic order of noble of the mystic shrine A pseudo Islamic Arabic oriental organization that served as a wake up call to a lost knowledge A knowledge that was taken away from Africans during the slave trades The theory behind this book is that the majority of the slaves that were taken from the west coast of Africa were practicing Muslims and these Muslims were forced to convert to Christianity under the strong oppression of slavery At one time Afro Americans were the biggest minority in the American society About 90% of the todays population of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century At the beginning of the 19th century most of the so called Negroes lived in the plantation areas of the Southern States After the Civil War and the abolition of slavery it wasnt until the early 1920s and 30s that blacks were beginning to experiment with other faiths Of all the faiths Islam became the fastest growing religion and the most popular This book by far is in no way a research into black history instead it covers a more deeper aspect of history in which I call the history behind the history It explores the true Asiatic origins of the ancient religions of Hinduism Buddhism well as the Islamic faith Finally It explores the Masonic symbolisms of alis Moorish science dogma digging deeper into the esoteric side of his Aquarian Masonic teaching explaining their origins and discovering an age old wisdom that had been kept hidden from the human eye One would think that Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older they possess more sources of knowledge spiritual salvation Yet there are those who have turned away from traditional Christian dominated environments in order to find a greater understanding of themselves and the world in which they live One alternative has been to seek knowledge in the various religious groups that arose in the 20th century

Polyrhythmicity Kofi Kissi Dompere, 2006-03-31 The modern works on African philosophy have not been integrated and fully connected to Africa s antiquity in order to provide a foundational unity for further intellectual refinement The philosophical dimensions of humanism Nkrumah s concept of categorial conversion African concepts of duality polarity unity continual creation and democratic ideals must be shown their African centered origins In considering African philosophy there arise conceptual and logical gaps that require the development of fundamental cognitive unity from the available data with judicious interpretation and restructuring in order to define the parameters of African philosophical unity that will allow these gaps to be closed for intellectual continuity This monograph is devoted to the establishment of the foundations for the development of Africa s intellectual continuity and cognitive unity from antiquity to the present Its main premise is that there is African philosophy with its own method of reasoning analysis and synthesis The monograph initiates self contained philosophical foundations for African intellectual unity that is required to support African cultural unity African personality African essence and humanism needed for the creation of Greater Africa that is implied by African Union These philosophical foundations it is argued formed the thinking system for Africa s social construct law economics politics and governance of empires kingdoms and social units that have come to pass These philosophical foundations constitute the thinking system that must guide current and future Africa s socioeconomic dynamics The monograph discusses also Africa s contributions to

the global intellectual heritage by showing the relationships among foundations of African philosophical tradition and other philosophical systems that lead to rediviva Africana It presents the principles of cognitive unity and continuity on the held position that without clearly developed Africa s philosophical foundations from its antiquity providing intellectual unity and cognitive continuity complete emancipation of Africa will be a mere mimicking of intellectual faults of other nations and philosophical systems The research by African scholars and others on specific philosophical thoughts from different areas of Africa is useful materials that must be integrated into cognitive unity by accepting those that fit and rejecting those that do not fit by a defined logical process Mindful of this a case is thus made in this monograph for African cognitive unity and supporting reasoning methods The system of ideas and perceptive interpretations of relevant data is here referred to as Africentricity and its philosophical foundations that project thought as polyrhythmicity while the study of logic of reasoning about methodological and epistemic problems of polyrhythmicity and Africentricity is referred to as polyrhythmics On practical level these philosophical foundations are shown to support the conceptual basis of Nguzo Saba the Seven Principles of Kwanzaa The monograph would be of interest to philosophers in general professionals researchers and students engaged in African philosophy African studies Black studies socio political philosophy and those interested in knowing the thinking system on the basis of which African essence arises and African social formations were constructed and governed from antiquity

The SAGE Encyclopedia of African Cultural Heritage in North America Mwalimu J. Shujaa, Kenya J. Shujaa, 2015-07-13 The Encyclopedia of African Cultural Heritage in North America provides an accessible ready reference on the retention and continuity of African culture within the United States Our conceptual framework holds first that culture is a form of self knowledge and knowledge about self in the world as transmitted from one person to another Second that African people continuously create their own cultural history as they move through time and space Third that African descended people living outside of Africa are also contributors to and participate in the creation of African cultural history Entries focus on illuminating Africanisms cultural retentions traceable to an African origin and cultural continuities ongoing practices and processes through which African culture continues to be created and formed Thus the focus is more culturally specific and less concerned with the broader transatlantic demographic political and geographic issues that are the focus of similar recent reference works We also focus less on biographies of individuals and political and economic ties and more on processes and manifestations of African cultural heritage and continuity FEATURES A two volume A to Z work available in a choice of print or electronic formats 350 signed entries each concluding with Cross references and Further Readings 150 figures and photos Front matter consisting of an Introduction and a Reader s Guide organizing entries thematically to more easily guide users to related entries Signed articles concluding with cross references

[African Union](#) Kofi Kissi Dompere, 2006-02-28 The monograph advances a sociological political and politico economic theoretic argument for African unity The conceptual system is based on the philosophy of polyrhythmicity The methods and techniques of the argument are

drawn from the logic of polyrhythmics where conflicts in cultural differences as revealed in Africa's diversity are viewed as strength and beauty in unity within the Africentric mindset. These cultural conflicts and differences must be concretized in unity for Africa's emancipation, development and social welfare improvements. The main premise of the book is that Africa must unite without which Africa's rapid socio-economic development will be kept in arrested mode and held hostage by imperial system of predation through international strategic resource games. The validity of the main premise is demonstrated from a global conceptual view of African nationalism. The concept of global African nationalism is developed from the Pan African analytical foundations after reviewing other views with the title African nationalism. The logic of the analysis is systematically constructed from the building blocks and conceptual relationships among state specific nationalism, ethnic specific affinity and tribal specific affinity and the roles they may play in facilitating or inhibiting Africa's complete emancipation through politico-economic unity. The relationships are linked to events of contemporary dynamics of the modus operandi of global predation, resource conflicts and politico-economic power distribution over the global resource and demographic space. In general, the monograph presents a multidisciplinary theory of regional integration with a special emphasis on Africa's global position. The monograph addresses itself to researchers, scholars, diplomats, political practitioners, students and those in the general public who are engaged in economics, political science, sociology, theory of regional integration, African studies, Africana studies, Black studies and activists searching for better global tomorrow.
