The heart of California Design is the modern California home famously characterized by open plans conducive to outdoor living. The layouts of modernist homes by Pierre Koenig, Craig Ellwood, and Raphael Soriano, for example, were intended to blur the distinction between indoors and out. Many objects were designed to be multifunctional: pool and patio furniture that was equally suitable indoors; lighting that was both task and ambient; bookshelves that served as room dividers; and bathing suits that would turn into ensembles appropriate for indoor entertainment. California Design includes 350 images, most in color, of furniture, ceramics, metalwork, architecture, graphic and industrial design, film, textiles, and fashion, and ten incisive essays that trace the rise of the California design aesthetic and fashion, and ten incisive essays that trace the rise of the California design aesthetic.

The Architecture of Industry Mathew Aitchison, 2016-03-16 From the Rust Belt to Silicon Valley, the intersection between architecture and industry has provided a rich and evolving source for historians of architecture. In a historical context, industrial architecture evokes the smoking factories of the nineteenth century or Fordist production complexes of the twentieth century. This book documents the changing nature of industrial building and planning from the end of the nineteenth century to the beginning of the twenty-first century. Drawing on research from the United States, Europe, and Australia, this collection of essays highlights key moments in industrial architecture and planning representative of the wider paradigms in the field. Areas of analysis include industrial production, factories, hydroelectricity, aerospace, logistics, finance, scientific research, and mining. The selected case studies serve to highlight architectural and planning innovations in industry and their contributions to wider cultural and societal currents. This richly illustrated collection will be of interest for a wide range of built environment studies incorporating findings from both historical and theoretical scholarship and design research.

Making it Modern Aaron Betsky, 2016-12-15 At its root, modernism is that fundamental question of having something to represent that is of the moment. In the most radical interpretation, modernism always comes too late. The modern is that which is always new, which is to say always changing and already old by the time it has appeared. Modernism is always a retrospective act: one of documenting or trying to catch what has already appeared, an attempt to fix life as it is being lived. Modernity is just the very fact that we, as human beings, are continually remaking the world around us through our actions, and are doing so consciously. Modernism is a monument to or memory of that act, which in its own making tries to remake the world it is pretending to represent. **Dwell**, 2003-03 At

Dwell we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

The Urban Microclimate as Artifact Sascha Roesler, Madlen Kobi, 2018-09-24. Urban microclimates cannot be explained solely on the basis of scientific phenomena but are also affected materially and spatially by the city's local architecture. The layout, design and facade construction of buildings have a major impact on wind and temperature conditions. For this reason, architecture and urban design that have an effect on microclimates must be investigated in their social and cultural contexts. The publication uses international case studies to explain these relationships. The focus is on manifestations of urban microclimates in an architectural and urban design context. The places investigated are located in France, Italy, the USA, New Zealand, the Philippines, Taiwan and Burkina Faso.

The Bathroom Alison K. Hoagland, 2018-08-24. This book gives a complete history of the American bathroom and describes how the smallest yet most complex room in the American house is at the nexus of personal behavior and public investment. *The Bathroom: A Social History of Cleanliness and the Body* is the first scholarly treatment of the American bathroom as a space in the house through nearly two centuries. After a brief nod to precedents set by other countries and to elements of the bathroom that may be placed in different parts of the house, this book traces the development of the bathroom in the American house since the Civil War when the bathroom began to take shape. The bathroom is considered in light of many socially relevant themes such as cleanliness, sanitation technology and consumerism. Taken as a whole, the book bridges the gap between the public and private infrastructure of the bathroom and reveals the ways in which the space transforms its occupants into consumers. Its
