Mediation Education F. Schonewille, Martin Euwema, 2012 Nowadays mediation education is implemented at all levels in society from kindergarten and primary school education peer mediation to university and post graduate master programs The length and intensity varies tremendously from two day courses to two year programs In this respect mediation is comparable to sports or the fine arts One can practice this intuitively and with basic training at grass roots level further develop this at the professional level and become a master in mediation On the professional level mediation is a respected part of the judicial process and the mediator is recognized as a full partner in the process of conflict management and dispute resolution an expert with specific knowledge and skills to assist as a third party To achieve this a high quality education in mediation is essential Otherwise mediation will be seen particularly by other professions and professionals as a soft skills and a secondary service At the professional level how should an education be developed What roles should universities play in mediation education What are the trends and what are the necessary steps to take to further develop this young profession into evidence based practices These questions formed the theme of an international symposium in Utrecht Mastering Mediation Education organized by the Universities of Utrecht and Leuven The mediation topics discussed at the symposium are presented in this book *Autonomy in the Law* Mortimer Sellers, 2007-08-30 By juxtaposing European and American concepts of autonomy in the law as they are applied to families capital punishment and criminal trials authors reveal the common values that justify all legal systems This book sheds new light on the fundamental purpose of law by examining how European and American lawyers judges and citizens actually apply and should apply legal autonomy to litigation legislation and the law itself **Service Contracts** Maurits Barendrecht, J. M. Barendrecht, 2007 The Study Group on a European Civil Code has taken upon itself the task of drafting common European principles for the most important aspects of the law of obligations and for certain parts of the law of property in movables which are especially relevant for the functioning of the common market Like the Commission on European Contract Law s Principles of European Contract Law

the results of the research conducted by the Study Group on a European Civil Code seek to advance the process of Europeanisation of private law Among other topics the series tackles sales and service contracts distribution contracts and security rights renting contracts and loan agreements negotiorum gestio delicts and unjustified enrichment law transfer of property and trust law The principles furnish each of the national jurisdictions a grid reference They can be agreed upon by the parties within the framework of the rules of private international law They may provide a stimulus to both the national and European legislator for moulding private law Beyond this they aim to further discussion about the creation of a European Civil Code or a Common Frame of Reference in the area of patrimonial law by submitting a concrete model The Principles of European Law are published in co operation with St mpfli Bern Switzerland For other co operation partners and for more information see www.sellier.de

In the Shadow of the Company: The Dutch East India Company and its Servants in the Period of its Decline (1740-1796) Chris Nierstrasz, 2012-08-27

Is there any truth in the story that the morality of the servants of the Dutch East India Company in the eighteenth century was so rotten that one should believe the Dutch maxim Vergaan Onder Corruptie in translation something like Succumbed to Corruption and use this as an explanation for a very complex phenomenon Chris Nierstrasz introduces us in his In the Shadow of the Company to the realities of the decision makers and of the servants in the field Responding to the changing realities in Asia the Company could only try to use the mercantile potential of its higher echelons to postpone its downfall In a situation in which the directors were not able to increase investment from Holland the servants in Asia were forced to take up the challenge

Against the historical background of Chinese translation in the West and the emergence of several prominent European translators of China this book examines the role of a translator in terms of cross cultural communication the image of the foreign culture in the minds of the target audience and the influence of their translations on the target culture With the focus on the career and output of the Dutch translator Henri Borel 1869 1933 this study investigates different aspects of the role of translator The investigation is carried out by analysing texts and probing the achievements and contributions of the translator underpinned by documents from the National Archives and the Literature Museum in the Hague the Netherlands Based on the findings derived from this study advice is offered to those now involved in the promotion and translation of Chinese culture and literature It will make an important contribution to the burgeoning history of Chinese translation This book will be of interest to anyone with an interest or background in the translation history of China the history of sinology in the West and the role of translators Professional Services in the EU Internal Market Tinne Heremans,2012-01-31

Professional services are a key component of the EU internal market economy yet also significantly challenge the legal framework governing this internal market Indeed specific professional regulatory structures which are often the result of a blend of government and self regulation hold clear potential for conflict with EU free movement and competition law rules Hence this book looks at the manner in which both free movement and competition laws might apply to such self and co regulatory set ups and at the leeway given to quality considerations apparently conflicting with free movement or competition objectives In addition since court action will seldom suffice to genuinely integrate a market the book also explores those instruments of EU secondary legislation that are likely to impact the most on the provision of professional services However the book goes beyond a mere inventory to ask how EU Internal Market policy could contribute to the optimal legal environment for professional services A law and economics analysis is employed to investigate the need for specific professional rules the preferred type of regulator self co or government regulation and the level national and or European at which regulation should be adopted As becomes clear the story of the market for professional services is one of market and government failure the author is thus left to compare imperfect situations where market failures compete with rent seeking efforts the tendency towards over centralisation and national protectionism This book offers both an in depth legal analysis of the EU framework as it applies to professional services as well as a more normative evaluation of this framework based on insights from law and economics scholarship It will therefore be a valuable resource for all practitioners policy makers and academics dealing with professional services as well as more generally with questions of quality and self regulation Reflectie op mediation E.a,2009 Mediators vinden mediation een mooie methode voor confl ictoplossing
