Prioritizing Sustainability Education Joan Armon,Stephen Scoffham,Chara Armon,2020 Prioritizing Sustainability Education presents theory to practice essays and case studies by educators from six countries who elucidate dynamic approaches to sustainability education Too often students graduate with exploitative consumer driven orientations toward ecosystems and are unprepared to confront the

urgent challenges presented by environmental degradation Educators are prioritizing sustainability oriented courses and programs that cultivate students knowledge skills and values and contextualize them within relational connections to local and global ecosystems Little has yet been written however about the relational sustainability education that educators are currently designing and implementing often across or at the edges of disciplinary boundaries The approaches described in this book expand beyond conventional emphases on developing students attitudes knowledge and behaviors by thinking and talking about ecosystems to additionally engaging students with ecosystems in sensory affective psychological and cognitive dimensions as well as imaginative spiritual or existential dimensions that guide environmental care and regeneration This book supports educators and graduate and upper level undergraduate students in the humanities social sciences environmental studies environmental sciences and professional programs in considering how to re orient their fields toward relational sustainability perspectives and practices

Sustainability Frontiers David Selby, Fumiyo Kagawa, 2014-12-15
Education for sustainable development the educational offshoot of the concept of sustainable development has rapidly become the predominant educational response to the global environmental crisis The authors apply a critical lens to the field and find it wanting in many regards Sustainability Frontiers is an international academic non governmental organization based in Canada and the United Kingdom It engages in research and innovation in the broad fields of sustainability and global education challenging dominant assumptions and current orthodoxies as it seeks to foster learner empowerment and action It places particular emphasis on climate change disaster risk reduction and peacebuilding and their implications for the nature and directions of sustainability education

Higher Education for Sustainable Development Kerry Shephard, 2015-08-20 This book asks how higher education should approach the task of educating for sustainability and then sets to answering it It provides a guide for those who advocate for sustainability and for those who do not and makes a point of emphasising that all in higher education have the capacity and willingness to contribute in some way The challenge is to find an approach that unifies the efforts of higher education teachers towards sustainability objectives rather than dividing them People at universities across the world were consulted and a grounded theory was devised This encourages all university teachers to teach what they want to teach openly and honestly about sustainability or not but on the way to ensure that their students develop the critical skills that will enable them to fully understand what is being taught and what they are learning
