**Advancing STEM Education and Innovation in a Time of Distance Learning** González-Lezcano, Roberto  
Alonso,2022-10-21 Due to the recent global pandemic educators of science and technology have had to pivot and adapt their delivery to create alternative virtual means of delivery The COVID 19 pandemic has influenced a rapid change in teaching and learning in higher education It is reshaping curriculum demands the 21st century digital competence challenges and learning technologies These changes in education are likely to endure well past the COVID 19 pandemic making it crucial for educators to consider teaching and learning under the perspectives of digital education and innovation Advancing STEM Education and Innovation in a Time of Distance Learning highlights the contemporary trends and challenges in science technology mathematics and engineering education The chapters present findings and discussions of relevant research studies and theoretical frameworks for the provision of science technology engineering and technical subjects It not only presents successful practice examples from before and during the COVID 19 pandemic but also provides useful information to assist educators in understanding the demands and challenges of digital education Covering topics such as ethnically diverse students foreign language learning and mobile gamification this premier reference source is an essential resource for educators and administrators of both K 12 and higher education pre service teachers teacher educators librarians government officials researchers and academicians *Best Practices in Professional Learning and Teacher Preparation*  
National Assoc For Gifted Children,Christine L. Weber,2021-09-03 Several states offer additional teacher preparation programs by providing either an endorsement or certification in the field but these are often pursued by teachers specifically enrolled in gifted coursework rather than in general education programs Practitioners and researchers agree that time and energy should be spent on training teachers in how to address the needs of gifted and talented students both within the regular classroom and in specialized programs This three book series acknowledges this need and provides specific strategies for professional development in a variety of settings using various methods Drawing on both literature in the field and research based best practices in professional learning this series provides the reader with a foundation for designing and implementing effective professional development experiences for educators working with gifted learners This volume focuses on a variety of techniques and methods in professional development From reflection practices to using case studies to incorporating technology authors provide specific tools and resources to consider when delivering effective professional development related to this specific population of learners A service publication of the National Association for Gifted Children Washington DC This designation indicates that this book has been jointly developed with NAGC and that this book passes the highest standards of scholarship research and practice Resources in Education ,1998 *Twice Exceptional*  
Scott Barry Kaufman,2018-01-02 In an educational system founded on rigid standards and categories students who

demonstrate a very specific manifestation of intelligence flourish while those who deviate tend to fall between the cracks Too often talents and interests that do not align with classroom conventions are left unrecognized and unexplored in children with extraordinary potential but little opportunity For twice exceptional 2e children who have extraordinary strengths coupled with learning difficulties the problem is compounded by the paradoxical nature of their intellect and an unbending system ill equipped to cater to their unique learning needs Twice Exceptional Supporting and Educating Bright and Creative Students with Learning Difficulties provides cutting edge evidence based approaches to creating an environment where twice exceptional students can thrive Viewing the 2e student as neither exclusively disabled nor exclusively gifted but rather as a dynamic interaction of both leading experts offer holistic insight into identification social emotional development advocacy and support for 2e students With chapters focusing on special populations including autism dyslexia and ADHD as well as the intersection of race and 2e this book highlights practical recommendations for school and social contexts In expounding the unique challenges faced by the 2e population Twice Exceptional makes a case for greater flexibility in our approach to education and a wider notion of what it means to be academically successful Developing Leadership in the Asia Pacific Sivan Phillipson, Shane N. Phillipson, 2013-11-26 Developing Leadership in the Asia Pacific focuses on the design of leadership programs that are able to meet the needs of students teachers and the wider community Rather than taking an all encompassing approach that cover all contexts of leadership development this book is based on research that guides the leadership teacher in designing a course that takes into account the specific context and needs of individual students the purpose of the course and how the course can be evaluated for its effectiveness Emphasising learner diversity the book argues that the students specific cultural and educational contexts need to be taken into account when designing leadership programs Although these courses are often taught outside of the regular curriculum components of leadership can be found in the regular curriculum Accordingly this book helps the leadership teacher to integrate the leadership program with the regular curriculum through the use of guiding questions quizzes case studies dilemmas and other pedagogical strategies It links research with practice scaffolding teachers in understanding the content or issues described in each chapter assisting them in building a fully defensible leadership program A number of real life worked examples are also provided throughout each chapter as a practicable framework that can be used in teaching design for everyday units of work This book is a useful reference for researchers working in leadership as well as an essential tool for teachers developing leadership programs for students in primary secondary or tertiary contexts Teaching Gifted Children Jeff Danielian, C. Matthew Fugate, Elizabeth Fogarty, 2021-09-23 From the pages of Teaching for High Potential a quarterly publication of the National Association for Gifted Children this collection of articles is sure to be of use to any educator of high ability students Topics included range from instructional methods across all content areas including tips and tools for reading and vocabulary instruction integrating STEM content and engaging students in math to identification differentiation and addressing gifted

students social emotional needs Articles also delve into current issues pertinent to the field of gifted education and this unique group of students including underachievement and underrepresented minority populations as well as new classroom strategies such as Makerspaces and teaching growth mindset This resource can be used to enhance a classroom lesson guide curriculum development or supplement professional development The featured articles are unique well written for the audience and selected by reviewers who understand what teachers need
