Educational Research Primer Anthony Picciano, 2004-10-18 An accessible guide designed as an introduction to educational research and statistics Dr Picciano places especial emphasis on understanding and interpreting statistical procedures rather than on working with mathematical formulae The primer covers the main areas of concern to any student embarking on a research project such as how to locate material for research purposes how to plan a research project how to conduct various types of research as well as how to use research in educational practice The primer is brought to life with numerous examples from Dr Picciano's workshops which demonstrate how to interpret various statistical routines using statistical software packages *Understanding Research* James H. McMillan, 2007-06-01 **Conducting Educational Research** Daniel J. Boudah, 2011 Conducting Educational Research Guide for Completing a Major Project provides concise accurate guidance through the entire research process from developing and focusing research questions to searching the existing literature to selecting the most appropriate research design measurement and analyses to interpretation and communication of outcomes Each chapter represents a step in the process and begins by with a concise overview of the topic Each chapter includes features and activities that ensure the researcher is asking the right questions and producing a quality project **The Elements of Inquiry** Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 The Elements of Inquiry covers the basic guidelines for graduate students doing an investigation or inquiry project It distils the rubrics necessary for teaching research methods and completing research projects and gives the student researcher a list of steps to follow to complete any

type of inquiry project including formal research projects such as doctoral dissertations It was written to support the work of students in an educational leadership doctoral program but it will also assist the research efforts of college students at any level in any discipline The book begins by establishing the underlying philosophical concepts upon which all good research is based preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research Numerous practical examples illustrate the steps in the research process presented in the text There are end of chapter exercises for students to apply the concepts discussed in the chapter Templates for organizing and presenting research provide students with a game plan for success with their research The book ends with an up to date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics While most research books detail one or more method in depth this text provides a broad introduction to many techniques and models used in doctoral dissertations and will be of particular value to those who are consumers of inquiry studies and research reports Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research
