regular and adult schools at all levels exceeds 320 million accounting for more than a quarter of the nation's population. Western educators, foreign companies and individual entrepreneurs have invested in Chinese education but perhaps because of the complexity of the Chinese education system and the rapid development of educational reforms have had little success. This work examines the education system in post Mao China from 1976 to the present. It explores how the Chinese government sees the development of its educational practices within the nation's broader social, economic, political and cultural contexts; how it identifies new issues that emerge in the process of what might be called educational globalization; how it translates these issues into specific educational policies, activities and goals; how the education reforms fit China's social and political realities and objectives; how the new policies affect foreign student affairs and Chinese students studying abroad; the ways in which the government promotes international educational cooperation and exchange; the opportunities for Western institutions to introduce programs in China; and current trends and their effect on the internationalization of education.

Education, Culture, and Identity in Twentieth-century China Glen Peterson, Ruth Hayhoe, Yongling Lu, 2001. A comprehensive collection on twentieth century educational practices in China.

Chinese Education Irving Epstein, 2017-12-12. This book first published in 1991 is concerned with educational change. It seeks to place Chinese educational policies within the broader social context of Chinese development and modernisation imperatives by analysing issues germane to specific educational structures and sectors. At the same time it attempts to inform the reader of larger policy issues which affect the educational system as a whole and speak to more global concerns: the nature of Chinese student activism, gender inequality, rural-urban disparities, educational inequality, the influences of market forces and the growth of professionalism.

China's Education and the Industrialised World Ruth Hayhoe, Marianne Bastid, 2017-12-12. This book first published in 1987 studies the practical and intellectual import of China's educational relations with the industrialised West, the Soviet Union and Japan. On the practical level it provides a broad historical and philosophical context within which the possibilities and dangers inherent in China's educational involvement with developed countries may be considered. The book tests the theory that education transfers from the developed to the developing world have been used to consolidate political domination and economic exploitation by providing a detailed and provocative historical analysis of China's relations with the major developed nations.
