Geribo, 2011-11 Seminar paper from the year 2011 in the subject Pedagogy School System Educational and School Politics grade A Atlantic International University School of Human and Social Studies course Education and Law language English abstract For many of education managers the phrase law immediately becomes an incomprehensible maze of acts administrative policies and judicial decisions Every situation that arises in a school is governed by laws rules and regulations and every educators needs to be familiar with these and respect the rights and responsibilities of all interested parties Every education manager and educators also be familiar with and understand education law so that they can use it to enhance learning and teaching An understanding of the legal framework starts with an understanding of what it meant by the notion of law This concept forms part of the daily life of every person in all nations in the world In many aspects of education like legal issues that govern students it can be said that it is the law that provides the best means that should be used in disciplining students With this regard therefore the law and regulatory issues dictate either in individual school or in all schools what is the best method of disciplining them Lines In the early days the management of education and more specifically schools in many countries was in the hands of the state government This shows that the government at federal or regional level was responsible in determining educational funding methods of disciplining teachers and students and accreditation in schools Whatever the case may be in order to achieve the intended goal of education policy and plan of the country all individuals in a school should have freedom of speech but this is not what is happening in most countries as school administrators usually restricts students freedom of speech It is of paramount importance that all educators and policy formulators should pay much Equality in Education Law and Policy, 1954-2010 Benjamin M.
