**Educational Psychology** David Paul Ausubel, 1968 The basic premise of this book is that educational psychology is primarily concerned with the nature conditions outcomes and evaluation of classroom learning **Educational Psychology** David Paul Ausubel, 1968 **Educational Psychology** David Paul Ausubel, Joseph Donald Novak, Helen Hanesian, 1978 **Educational psychology** Thomas L. Mayer, 1987 **Educational Psychology** Dale P. Scannel, 1969 **Educational Psychology 85/86**, 1985 *The Acquisition and Retention of Knowledge: A Cognitive View* D.P. Ausubel, 2012-12-06 In 1963 an initial attempt was made in my *The Psychology of Meaningful Verbal Learning* to present a cognitive theory of meaningful as opposed to rote verbal learning It was based on the proposition that the acquisition and retention of knowl edge particularly of verbal knowledge as for example in school or subject matter learning is the product of an active integrative interactional process between instructional material subject matter and relevant ideas in the leamer s cognitive structure to which the new ideas are relatable in particular ways This book is a full scale revision of my 1963 monograph *The Psychology of Meaningful Verbal Learning* in the sense that it addresses the major aforementioned and hitherto unmet goals by providing for an expansion clarification differentiation and sharper focusing of the principal psychological variables and processes involved in meaningful learning and retention i e for their interrelationships and interactions leading to the generation of new meanings in the individual learner The preparation of this new monograph was largely necessitated by the virtual collapse of the neobe havioristic theoretical orientation to learning during the previous forty years and by the meteoric rise in the seventies and beyond of constructivist approaches to learning theory **Cognition, Education, and Deafness** David S. Martin, 2003 Now available in paperback ISBN 1 56368 149 8 **Independent Learning in Higher Education** Euan S. Wininger, Antony D. Norman, Bruce W. Tuckman, 2024-12-18 *Educational Psychology* distills the latest research into actionable steps guiding students in building solid evidence based teaching plans as they prepare to enter the classroom Employing a meta cognitive approach it encourages them to think about their dual role as both teachers and learners understanding not just what to do in the classroom but the why behind it Motivation is a central theme with the authors providing a practical framework to help teachers enhance student motivation and connect it to key themes and concepts throughout the text Rather than taking an encyclopedic approach the authors group chapters by topic enabling readers to remember concepts and connect best practices to big ideas in educational psychology By blending scholarship with application through vignettes examples case studies and practical teaching strategies this text equips students to be both methodical and creative in their future

classrooms
