**Edward Durell Stone** Mary Anne Hunting, 2013 Colossus visionary giant are superlatives used in the mid twentieth century to describe Edward Durell Stone 1902 1978 a celebrity architect whose wholly unique modern aesthetic of new romanticism played a crucial role in defining middle class culture Framed between the Great Depression and the oil embargo of the early 1970s the distinguished career of the native Arkansan is represented on four continents in thirteen foreign countries and in thirty two states his masterpiece the American Embassy chancery 1953 59 in New Delhi India Recognized in his prime as one of the nation s most sought after architects Stone s vast and prestigious workload brought prosperity on a scale rare in architecture in his time after the death of Frank Lloyd Wright some supporters thought Stone seemed destined to take the place of his personal hero and close friend as the great national architect But Stone also drew divergent reactions Such International Style buildings as his Museum of Modern Art 1935 39 in New York City an austere unornamented volume won critical approval in contrast his monumental postwar architecture the John F Kennedy Center for the Performing Arts 1958 71 in Washington DC among the best known exposed popular tastes by offering a broader definition of Modernism inclusive of decoration Enhanced interest in Stone s architecture has been spurred by the reconsideration of a number of his buildings The former Gallery of Modern Art 1958 64 at 2 Columbus Circle in New York City which was lost to a near complete makeover stimulated vigorous and at times contentious discussion that made evident the need for an objective reassessment His legacy of giving form to the aspirations of the emerging consumer culture and of reconciling Modernism with the dynamism of the age is established in Edward Durell Stone Modernism s Populist Architect **The Architectural**

**Models of Theodore Conrad** Teresa Fankhänel, 2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad s innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad s work and his impact on 20th century architectural history With exclusive access to Conrad s archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad s work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad s models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural

models and their makers      *Makers of Modern Architecture, Volume II* Martin Filler, 2013-08-20 In the first volume of *Makers of Modern Architecture* 2007 Martin Filler examined the emergence of that revolutionary new form of building and explored its aesthetic social and spiritual aspirations through illuminating studies of some of its most important practitioners from Louis Sullivan and Frank Lloyd Wright to in our own time Renzo Piano and Santiago Calatrava Now in *Makers of Modern Architecture Volume II* Filler continues his investigations into the building art beginning with the historical eclecticism of McKim Mead and White best remembered today for New York City's demolished Pennsylvania Station He surveys the seemingly inexhaustible flow of new books about Wright and Le Corbusier and continues his commentaries on Piano's museum buildings with an essay focused on the new Broad Contemporary Art Museum in Los Angeles There are less well known subjects here too from the Frankfurt urban planner Ernst May to Buckminster Fuller inventor of the geodesic dome Filler judges Edward Durell Stone the architect of the U S embassy in New Delhi the Huntington Hartford Museum in New York City and the Kennedy Center in Washington to have been a middling product of his times however personally interesting he may have been And he looks back at James Stirling who in the 1970s and 1980s was a veritable rock star of the profession responsible for what Filler considers some of the very few worthwhile postmodernist buildings The essays collected here are not entirely historical however Filler also focuses on some of the most recent projects to have attracted critical and popular attention both in the United States and abroad including Rem Koolhaas's CCTV building in Beijing and Bernard Tschumi's Acropolis Museum in Athens He argues that Kazuyo Sejima and Ryue Nishizawa's New Museum in New York City is one of those rare clarifying works of architecture that makes most recent buildings of the same sort look suddenly ridiculous He calls Tod Williams and Billie Tsien's brilliant reimagining of the Barnes Collection in Philadelphia a latter day miracle a virtually unimprovable setting for its art He finds Michael Arad's September 11 Memorial at Ground Zero a sobering disturbing heartbreaking and overwhelming masterpiece And he argues that Diller Scofidio Renfro's Institute of Contemporary Art in Boston and their work revitalizing the High Line and Lincoln Center in New York make them today's shrewdest yet most sympathetic enhancers of the American metropolis Filler remains in these nineteen essays a shrewd observer of the pressures on architects and their projects money politics social expectations even the weight of their own reputations But his focus is always on the buildings themselves on their sincerity and directness on their form and their function on their capacity to bring delight to the human landscape      **John McAndrew's Modernist Vision** Mardges Bacon, 2018-11-06 John McAndrew's *Modernist Vision* tells the compelling story of the architect scholar and curator John McAndrew who played a key role in redefining modernism in the United States from the 1930s onward The designer of the Vassar College Art Library arguably the first modern interior on a college campus and the curator of architecture at the Museum of Modern Art in New York from 1937 to 1941 McAndrew was instrumental in creating a distinct and innovative aesthetic that bridged the European modernist lineage and American regional vernacular Providing a fascinating glimpse

into McAndrew's life his associations with important architects and artists and the historical context that shaped his work this book is a thoroughly researched testament to a man who left a powerful mark on the evolution of American architecture

**Making Houston Modern** Barrie Scardino Bradley, Stephen Fox, Michelangelo Sabatino, 2023-11-15 Complex controversial and prolific Howard Barnstone was a central figure in the world of twentieth century modern architecture Recognized as Houston's foremost modern architect in the 1950s Barnstone came to prominence for his designs with partner Preston M Bolton which transposed the rigorous and austere architectural practices of Ludwig Mies van der Rohe to the hot steamy coastal plain of Texas Barnstone was a man of contradictions charming and witty but also self centered caustic and abusive who shaped new settings that were imbued at once with spatial calm and emotional intensity *Making Houston Modern* explores the provocative architect's life and work not only through the lens of his architectural practice but also by delving into his personal life class identity and connections to the artists critics collectors and museum directors who forged Houston's distinctive culture in the postwar era Edited by three renowned voices in the architecture world this volume situates Barnstone within the contexts of American architecture modernism and Jewish culture to unravel the legacy of a charismatic personality whose imaginative work as an architect author teacher and civic commentator helped redefine architecture in Texas

**Pedagogy and Place** Robert A. M. Stern, Jimmy Stamp, 2016-01-01 Marking the centennial of the 1916 establishment of a professional program *Pedagogy and Place* is the definitive text on the history of the Yale School of Architecture Robert A M Stern current dean of the school and Jimmy Stamp examine its growth and change over the years and they trace the impact of those who taught or studied there as well as the architecturally significant buildings that housed the program on the evolution of architecture education at Yale Owing to the impressive number of notable practitioners who have attended or been affiliated with the school this book also contributes a history beyond Yale of the architecture profession in the twentieth century Featuring extensive archival research and illuminating firsthand accounts from alumni faculty and administrators this well rounded and engaging narrative is richly illustrated with historic photos of the school and its studios images of student work and important architectural achievements on and off campus

*Hut Pavilion Shrine: Architectural Archetypes in Mid-Century Modernism* Miles David Samson, 2016-03-09 The phase of American architectural history we call mid century modernism 1940 1980 saw the spread of Modern Movement tenets of functionalism social service and anonymity into mainstream practice It also saw the spread of their seeming opposites Temples arcades domes and other traditional types occur in both modernist and traditionalist forms from the 1950s to the 1970s *Hut Pavilion Shrine* examines this crossroads of modernism and the archetypal and critiques its buildings and theory The book centers on one particularly important and omnipresent type the pavilion a type which was the basis of major work by Louis I Kahn Paul Rudolph Philip Johnson Minoru Yamasaki and other eminent architects While focusing primarily on the architecture culture of the United States it also includes the work of British European Team X and Scandinavian designers and writers Making connections

between formal analysis historical context and theory the book continues lines of inquiry which have been pursued by Neil Levine and Anthony Vidler on representation and by Sarah Goldhagen and Alice Friedman on modernism's forbidden elements of the honorific and the visually pleasurable It highlights the significance of pavilionizing mid century designers such as Victor Lundy John Johansen Eero Saarinen and Edward Durell Stone and shows how frequently essentialist and traditionalist types appeared in the roadside vernacular of drive in restaurants gas stations furniture and car showrooms branch banks and motels The book ties together the threads in mid century architectural theory that addressed aspects of type essential structure and primal humanistic aspects of environment making and discusses how these concerns outlived the mid century moment and in the designs and writings of Aldo Rossi and others they paved the way for Post Modernism

Rethinking Frank Lloyd Wright Neil Levine, Richard Longstreth, 2023-03-03 Among the general public Frank Lloyd Wright remains the best known American architect of the twentieth century And yet his larger than life profile in the popular realm contrasts sharply with his near invisibility in academic and professional circles In Rethinking Frank Lloyd Wright Neil Levine and Richard Longstreth have assembled a group of eminent scholars to address this most puzzling paradox of the great architect's career In a series of engaging and well illustrated essays the contributors draw on their wide ranging understanding of modern architecture to reveal the ways in which Wright continues to play an instrumental role in domestic and international spheres making the case for reevaluating his popular and professional reputations Prompted by the transfer of the architect's archive from its home at Taliesin West in Scottsdale Arizona to the Avery Library at Columbia University and the Museum of Modern Art this volume revisits Wright's relevance for a contemporary audience Contributors Barry Bergdoll Columbia University Daniel Bluestone Boston University Jean Louis Cohen New York University Cammie McAtee independent scholar Neil Levine Harvard University Dietrich Neumann Brown University Timothy M Rohan University of Massachusetts Amherst Richard Longstreth George Washington University Jack Quinan University at Buffalo Alice Thomine Berrada cole des Beaux Arts

*Modern in the Middle* Susan Benjamin, Michelangelo Sabatino, 2020-09-01 The first survey of the classic twentieth century houses that defined American Midwestern modernism Famed as the birthplace of that icon of twentieth century architecture the skyscraper Chicago also cultivated a more humble but no less consequential form of modernism the private residence *Modern in the Middle* Chicago Houses 1929-75 explores the substantial yet overlooked role that Chicago and its suburbs played in the development of the modern single family house in the twentieth century In a city often associated with the outsize reputations of Frank Lloyd Wright and Ludwig Mies van der Rohe the examples discussed in this generously illustrated book expand and enrich the story of the region's built environment Authors Susan Benjamin and Michelangelo Sabatino survey dozens of influential houses by architects whose contributions are ripe for reappraisal such as Paul Schwegler Harry Weese Keck Keck and William Pereira From the bold early example of the Battledock House by Henry Dubin 1930 to John Vinci and Lawrence Kenny's gem the Freeark House 1975 the generation spanning residences discussed here reveal how these architects contended with climate and natural setting while negotiating the dominant influences of Wright and Mies They also reveal how residential clients typically middle class professionals progressive in their thinking

helped to trailblaze modern architecture in America Though reflecting different approaches to site space structure and materials the examples in *Modern in the Middle* reveal an abundance of astonishing houses that have never been collected into one study until now

*Exporting Chinese Architecture* Charlie Qiuli Xue,Guanghui Ding,2022-08-18 This book studies the unexplored history of China aided architecture erected in the developing world since the 1950s By 2019 over 1 000 buildings had been delivered to more than 160 countries including parliament houses convention centers stadiums gymnasiums theaters schools hospitals libraries railways and stations These projects which have played a significant role in promoting economic transformation cultural engagement and social and environmental well being have largely been overlooked or misunderstood by the international community Why did China donate so many foreign aid buildings How were these buildings built in the remote land of developing countries with intricate influences and limited resources Have they helped modernize the recipient countries The authors of this book use a wide range of representative projects built in different historic periods and geographical locations as case studies to address the above questions from various perspectives This book fills an enormous gap in modern architecture in China and the world It offers architectural students and scholars in various disciplines the necessary knowledge on diplomatic architecture informs architects the appropriate methods of cross border design and low tech building teaches government officials the best practice of donating and receiving foreign aid buildings and enhances public awareness of cultural diversity in Asia Africa Oceania and Latin America With abundant first hand materials historical pictures and drawings the book is a must read for those who are interested in modern architecture and developmental aid in the world China s architecture abroad notably in Africa and Asia has been perceived with both fascination and anxiety Based on a wealth of sources often difficult to access for scholars from outside China this book links the history and present of China s architectural mobilities in ways that will stimulate new debates in architectural history and urban studies ukasz Stanek Professor of Architectural History The University of Manchester UK

*Minoru Yamasaki and the Fragility of Architecture* Paul Kidder,2021-07-18 Few figures in the American arts have stories richer in irony than does architect Minoru Yamasaki While his twin towers of New York s World Trade Center are internationally iconic few who know the icon recognize its architect s name or know much about his portfolio of more than 200 buildings One is tempted to call him America s most famous forgotten architect He was classed in the top tier of his profession in the 1950s and 60s as he carried modernism in novel directions yet today he is best known not for buildings that stand but for two projects that were destroyed under tragic circumstances the twin towers and the Pruitt Igoe housing project in St Louis This book undertakes a reinterpretation of Yamasaki s significance that combines architectural history with the study of his intersection with defining moments of American history and culture The story of the loss and vulnerability of Yamasaki s legacy illustrates the fragility of all architecture in the face of natural and historical forces yet in Yamasaki s view fragility is also a positive quality in architecture the source of its refinement beauty and humanity We learn

something essential about architecture when we explore this tension of strength and fragility In the course of interpreting Yamasaki s architecture through the wide lens of the book we see the mid century role of Detroit as an industrial power and architectural mecca we follow a debate over public housing that entailed the creation and eventual destruction of many thousands of units we examine competing attempts to embody democratic ideals in architecture and to represent those ideals in foreign lands we ponder the consequences of anti Japanese prejudice and the masculism of the architectural profession we see Yamasaki s style criticized for its arid minimalism yet equally for its delicacy and charm we observe Yamasaki making a great name for himself in the Arab world but his twin towers ultimately destroyed by Islamic militants As this curious tale of ironies unfolds it invites reflection on the core of modern architecture s search for meaning and on the creative possibilities its legacy continues to offer Beautifully illustrated with over 100 color illustrations of Yamasaki s buildings this book will be of interest to students academics and professionals in a range of disciplines including architectural history architectural theory architectural preservation and urban design and planning Cultural Landscapes of South Asia Kapila Silva,Amita Sinha,2016-10-14 Winner of the Environmental Design Research Association s 2018 Achievement Award The pluralism of South Asia belies any singular reading of its heritage In spite of this diversity its cultural traditions retain certain attributes that are at their core South Asian in their capacity to self organize enact and reinvent cultural memories and in their ability to retain an intimate connection with nature and landscape This volume focuses on the notion of cultural landscape as a medium integrating multiple forms of heritage and points to a new paradigm for conservation practices in the South Asian context Even though the construct of cultural landscape has been accepted as a category of heritage its potent use in heritage management in general and within the South Asian context in particular has not been widely studied The volume challenges the prevalent views of heritage management in South Asia that are entrenched in colonial legacies and contemporary global policy frameworks The Job Ellen Ruppel Shell,2018-10-23 Critically acclaimed journalist Ellen Ruppel Shell uncovers the true cost political economic social and personal of America s mounting anxiety over jobs and what we can do to regain control over our working lives Since 1973 our productivity has grown almost six times faster than our wages Most of us rank so far below the top earners in the country that the winners might as well inhabit another planet But work is about much more than earning a living Work gives us our identity and a sense of purpose and place in this world And yet work as we know it is under siege Through exhaustive reporting and keen analysis The Job reveals the startling truths and unveils the pervasive myths that have colored our thinking on one of the most urgent issues of our day how to build good work in a globalized and digitalized world where middle class jobs seem to be slipping away Traveling from deep in Appalachia to the heart of the Midwestern rust belt from a struggling custom clothing maker in Massachusetts to a thriving co working center in Minnesota she marshals evidence from a wide range of disciplines to show how our educational system our politics and our very sense of self have been held captive to and distorted by outdated notions of what it means to get and

keep a good job We read stories of sausage makers firefighters zookeepers hospital cleaners we hear from economists computer scientists psychologists and historians The book s four sections take us from the challenges we face in scoring a good job today to work s infinite possibilities in the future Work in all its richness complexity rewards and pain is essential for people to flourish Ellen Ruppel Shell paints a compelling portrait of where we stand today and points to a promising and hopeful way forward

*Women Architects at Work* Mary Anne Hunting, Kevin D. Murphy, 2025-02-18 The first comprehensive history of the role of women architects within the history of American modernism

*Modernism as Memory* Kathleen James-Chakraborty, 2018-01-15 After World War II West Germans and West Berliners found ways of communicating both their recent sufferings and aspirations for stable communities through buildings that fused the ruins of historicist structures with new constructions rooted in the modernism of the 1910s and 20s As *Modernism as Memory* illustrates these postwar practices undergird the approaches later taken in influential structures created or renovated in Berlin following the fall of the Wall including the Jewish Museum and the Reichstag the New Museum and the Topography of Terror While others have characterized contemporary Berlin's museums and memorials as postmodern Kathleen James Chakraborty argues that these environments are examples of an architecture of modern memory that is much older more complex and historically contingent She reveals that churches and museums repaired and designed before 1989 in Dresden Hanover Munich Neuges Pforzheim Stuttgart and Weil am Rhein contributed to a modernist precedent for the relationship between German identity and the past developed since then in the Ruhr region and in Berlin *Modernism as Memory* demonstrates that how one remembers can be detached from what one remembers contrasting ruins with recollections of modernism to commemorate German suffering the Holocaust and the industrial revolution as well as new spaces for Islam in the country
