Knowledge, Innovation and Sustainable Development in Organizations Marta Peris-Ortiz, João J. Ferreira, Jose M. Merigó Lindahl, 2018-07-16. This volume explores the ways in which knowledge and innovation impact business and economic sustainability, offering a wide-ranging and richly illustrated study of knowledge, innovation and sustainability of organizations from a dynamic capabilities perspective. In organizational theory, dynamic capability is defined as an organization's ability to react and adapt adequately and rapidly to external change. In today's global economy, pursuing sustainable strategies and practices is critical to organizational success. Complying with externally and internally imposed sustainability targets might initially appear as a restriction for organizations; however, they can be transformed into a new set of opportunities. This means that the classic ways in which management absorbs the experiences associated with evolving conditions, organizational frameworks and markets must be reconsidered in light of the preservation of the technological, environmental and social ecosystems. Featuring research and case studies from sectors such as NGOs, SMEs, education and agriculture, this book offers students, academics, practitioners and policymakers a multifaceted understanding of how and why knowledge, innovation and sustainability are intricately linked and offers insight into best practices that balance organizational and societal needs.

Manual de prácticas "Diseño y evaluación de programas de intervención social" Blanca Bretones Nieto, Carmen Pozo Muñoz, 2024-05-16. El presente Manual de Prácticas tiene como propósito proporcionar a los estudiantes una serie de habilidades y competencias prácticas para el diseño y la evaluación de programas de intervención social en muy diversos campos de aplicación, como son la salud, la educación, la intervención comunitaria, la igualdad y género, la inmigración, o por citar alguna más, las organizaciones ya sean estatales de carácter público o privado. Concretamente, se proponen diferentes ejercicios prácticos que se desarrollan durante el transcurso de las clases y que requieren del trabajo de los alumnos en grupos conformados previamente. Cada uno de estos ejercicios viene precedido de una breve explicación teórica que permite contextualizar la tarea a realizar en cada sesión. Finalmente, todo lo anterior queda plasmado en un informe final sobre el diseño e implantación del programa y un informe evaluativo del mismo, respectivamente.
