

Een eeuw statistieken

In *Een eeuw statistieken* wordt een beeld geschetst van de totstandkoming van statistieken bij het Centraal Bureau voor de Statistiek (CBS). De nadruk in dit boek ligt op de methodologische en organisatorische aspecten van het werk: het verzamelen van gegevens bij bedrijven en personen, het steekproefonderzoek, de mechanisatie en automatisering van de statistiekproductie, de coördinatie en integratie van statistieken, het berekenen van indicatoren en prijsindices, de geheimhouding en publicatie van gegevens en tenslotte de internationale statistiek. Het boek geeft een overzicht van de ontwikkeling van het sociaal en economisch onderzoek en de daarbij gebruikte officiële statistieken.

Theory and Practice of Historical Census Data Harmonization Ashkan Ashkpour, 2019-01-17 This dissertation explores the applicability of Semantic Web technologies for the harmonization of the Dutch historical censuses in particular the Resource Description Framework RDF The use of historical census data for longitudinal research purposes especially when dealing with aggregated data has been hampered by the lack of comparability over the years Harmonization is a prerequisite to enable longitudinal research with these data in order to deal with changing variables values classification systems table structures and enumeration methods As a result of this research we propose a source oriented harmonization workflow and associated data model based on the RDF concept Our workflow and data model enable users to harmonize historical datasets in a structured flexible and accountable manner By applying these methods and techniques the complete censuses totaling 2 249 tables have been converted into RDF and made available for others to reuse as Linked Open Data In addition we have systematically harmonized a subset of the data This subset contains the tables with housing and demographic variables over the period 1795 2010 Our harmonizations have contributed to the creation of new social historical variables and classification systems in the Linked Open Data cloud By using open methods and technologies we offer a practical basis to other researchers in the field of digital humanities to build on particularly to those involved in data harmonization
