Een Eeuw Middelbaar Onderwijs 1863-1963:

A History of Science in the Netherlands Klaas van Berkel, Albert van Helden, L.C. Palm, 2023-07-03 In the 400 years of its modern history the Netherlands has produced a distinguished array of eminent mathematicians scientists and medical researchers including many Nobel prize winners and other internationally recognised figures from Stevin Snel and Huygens in the 17th century to Lorentz Kammerlingh Onnes Buys Ballot De Vries de Sitter and Oort in the 19th and 20th centuries Yet it has often been noted that the history of science in the Netherlands is underrepresented in the international literature The handbook *A History of Science in The Netherlands* aims to correct this situation by providing a chronological and thematic survey of the field from the 16th century to the present essays on selected aspects of science in the Netherlands and reference biographies of about 65 important Dutch scientists Written by more than 10 experts from Europe and North America the handbook is the standard English language reference work for the field

Anderhalve eeuw economieonderwijs in Nederland (1863-2012) Gerrit Folkert Gorter, 2013 De geboorte van het vak economie in het voortgezet onderwijs vond plaats in 1863 In dat jaar verscheen het vak staathuishoudkunde zoals economie destijds genoemd werd op het rooster van een nieuw schooltype de Hogere Burgerschool In deze studie worden de wederwaardigheden van het vak economie vanaf 1863 gevolgd waarbij de nadruk valt op de inhoudelijke ontwikkeling van het vak De leidraad bij het onderzoek wordt gevormd door een drietal mogelijke vormingsidealen het economieonderwijs kan zich ten doel stellen een inleiding te bieden in de economische wetenschap het kan leerlingen een voorbereiding willen geven op het toekomstig participeren in de samenleving of het kan proberen dichtbij de leerling te blijven door zijn of haar ervaringen en vragen als uitgangspunt te nemen Het onderzoek vindt plaats op twee niveaus op dat van de discussies over het vak economie en op dat van het feitelijk economieonderwijs

Theory and Practice Harm Jan Smid, 2022-12-16 This book describes and analyses the history of Dutch mathematics education from the point of view of the changing motivations behind the teaching of mathematics over a 200 year period During the course of the 19th century mathematics in the Netherlands developed from a topic for practitioners into a school topic that was taught to almost all pupils of secondary education As mathematics teaching gradually lost its practical orientation and became more and more motivated on the basis of its supposed formative value the HBS Hogere Burgerschool the Dutch variant of the German Realschule became the dominant school of thought for mathematics pedagogy This book examines the gradual development of the field culminating in the country wide adoption of Realistic Mathematics Education as the new method of mathematics teaching This book is important for anyone who is interested in the history of mathematics education It provides an interesting perspective on the development of mathematics education in a country that in many aspects went its own way

Nieuw Archief Voor Wiskunde, 1964 *Franse scholen in Nederland* Nan L. Dodde, 2020-04-13 Onderwijshistorici hebben zich al veelvuldig bezig gehouden met de geschiedenis van het lager onderwijs

en het onderwijs op universitair niveau Aan het middelbaar onderwijs werd minder aandacht besteed omdat deze vorm van onderwijs aanvankelijk uitgebreid lager onderwijs was De Franse school nam eerst als handelsschool later als Frans Duitse school en als Franse kostschool de taak op zich om leerlingen kennis te laten maken met schoolvakken als onder meer boekhouden wiskunde aardrijkskunde geschiedenis Frans en Engels Dit soort van scholen werd opgericht door particulieren en kon hooguit een enkele maal een geldelijke ondersteuning tegemoet zien van gemeentebesturen De toename van Franse scholen in de achttiende eeuw dwong de landelijke overheid met wettelijke maatregelen orde te scheppen in de inmiddels chaotische onderwijssituatie waarin deze onderwijsinstellingen zich bevonden De wet op het lager onderwijs van 1857 en de wet op het middelbaar onderwijs van 1863 maakten een einde aan het bestaan van de Franse school Meteen brengt het boek ook een goed relaas van de tijd vooraleer Nederland en België hun eigen weg gingen

Perspectives on Foreign-language Policy Theo Bongaerts, Kees De Bot, 1997 This volume containing fourteen invited papers on foreign language policy starts off with a brief history of foreign language teaching policy in the Netherlands This historical outline is followed by four contributions of authors who once developed the Dutch National Action Programme NAP on Foreign Languages under the directorship of Theo van Els The second section consists of five contributions written by experts from Germany Israel Finland and the United States who reflect on the language policies adopted in their countries and on the international impact of the ideas developed in the NAP The final section of the book presents four contributions from Dutch authors all focussing on language policy issues related to the respective roles of Dutch as a second language and of ethnic minority languages in the Netherlands The contributions to this volume were written by friends and colleagues of Theo van Els in recognition of his considerable contributions to that area of applied linguistics which has captured his fascination for many years foreign language teaching policy

Vocational Education Linda Clarke, Christopher Winch, 2012-08-21 Vocational education and training VET have a key role to play in raising skill levels and improving a society's productivity In this important new book a team of international experts argue that too often national VET policy has been formulated in ignorance of historical and political developments in other countries and without proper consideration of the social objectives that it might help achieve Examining a wide range of contrasting international approaches and development strategies this book demonstrates the central role of the state in implementing an effective system of VET and assesses the extent to which different VET policies can promote equality in the labour market and social justice Key themes include the broader educational and social aims of VET the nature of learning in vocational contexts the historical development of VET in the UK US Australia France Germany the Netherlands and elsewhere Including a full range of case studies and practical examples this book is essential reading for all students researchers and practitioners with an interest in vocational education and training industrial and labour relations or social policy

All Positive Action Starts

with Criticism Sacha la Bastide-van Gemert, 2015-01-16 This study provides a historical analysis of Freudenthal's didactic ideas and his didactic career. It is partly biographical but also contributes to the historiography of mathematics education and addresses closely related questions such as what is mathematics and where does it start. Which role does mathematics play in society and what influence does it have on the prevailing views concerning its accompanying didactics. Hans Freudenthal 1905-1990 professor in mathematics, scientist, literator, but above all mathematics educator, was inextricably linked to the changes which took place in mathematics education and didactics during the second half of the last century. His diversity as a scientist and his inexhaustible efforts to establish the didactics of mathematics as a seriously pursued science made Freudenthal's influence in this area considerable. He foresaw an essential practical role for mathematics in everyone's life, encouraging students to discover and create mathematics themselves instead of imposing a ready-made mathematical system. The theory of mathematics education thus developed in the Netherlands would gain world fame in the following decades. Today, in the light of the discussions about mathematics education in which the call for genuine mathematics instead of the so-called kindergarten mathematics can be heard, Freudenthal's approach seems to be passé. However, the outcome of this study, which is mainly based on documents from Freudenthal's vast personal archive, shows a more refined picture. The direct identification of kindergarten mathematics with Freudenthal's view on mathematics education is not justified. Realistic mathematics as advocated by Freudenthal includes more than just a practical introductory and should, among other things, always aim at teaching genuine mathematics in the end.

Echoing Events Tina van der Vlies, 2022-12-12 Echoing Events questions the perpetuation, actualization, and canonization of national narratives in English and Dutch history textbooks, wide-reaching media that tendentially inspire a sense of meaning, memory, and thus also identity. The longitudinal study begins in the 1920s when the League of Nations launched several initiatives to reduce strong nationalistic visions in textbooks and ends in the new millennium with the revival of national narratives in both countries. The analysis shows how and why textbook authors have narrated different histories which vary in terms of context, epoch, and place as echoing events by using recurring plots and the same combinations of historical analogies. This innovative and original study thus investigates from a new angle the resistance of national narratives to change.

Creating Networks in Chemistry Anita Kildebæk Nielsen, Soňa Štrbáňová, 2008 During the second half of the nineteenth century and the beginning of the twentieth century, chemical societies were established all over Europe. The book focuses on this process and further development of the European chemical societies before World War I and in exceptional cases up to 1930. It comprises chapters based on a common set of questions and an extensive concluding chapter that provides a comparative analysis of the early development of the European chemical societies. The book offers unique historical material showing the social, intellectual, and political circumstances in which the chemical societies were constituted and function, their relations to universities and chemical industries, everyday lives, international contacts, etc. The analysis of data explores how networks in chemistry and professional

autonomy were constituted and investigates the process of demarcation that inevitably takes place when a social institution of a scientific discipline is formed The reader gets answer to the important question of what chemistry was and was not in the latter half of nineteenth century and the first decades of the twentieth century Various aspects of creating scientific societies have been of much interest to historians of science in recent years Nevertheless histories of scientific societies are mostly occasional publications written to celebrate their jubilees This volume represents a first international comparative analysis on the beginnings of chemical societies in Europe based on a detailed historical research done by a group of renowned historians of chemistry from several countries As such it is an entirely new contribution to the history of chemistry in Europe and European scientific societies in general and a unique source for chemists and historians Its ambition is to become a reference work in history of chemistry set the standard for similar studies in other disciplines and serve European chemical societies to provide a context for their complex histories and relationships The book can be read by miscellaneous audiences and various types of readers with diverse intentions who will benefit differently from it A member of a national chemical society will find there narrative on his own society s establishment and early history and the opportunity to compare it with societies from other countries Historically interested chemists will find in the book details as well as wider perspectives on the institutional history of their discipline Historians of chemistry will get a thoroughly documented and scholarly book on the early history of chemical societies in Europe written by acknowledged colleagues The individual chapters will offer additional literature and sources for their research into history of chemistry Historians of science will get material for comparative studies on scientific institutions on the roles of learned societies on national and international level They can be inspired to create similar studies related to other scientific disciplines The underlying common set of guidelines can provide methodological assistance Teachers of history of chemistry and history of science will find in the book additional reading material and literature Social and general historians will be given a well edited and reliable source on a number of social institutions that played versatile roles in local national settings The establishment of chemical societies can be compared with other kinds of learned professional and amateur societies in the same period They also will get data and information about some aspects of the scientific boom in the second half of the nineteenth century and pre WW1 period
