may find it valuable to revisit these formative moments in the history of the field      Human Behavior and Social Environments Dennis Saleebey, 2001-08-20 Human behavior is a subject so vast that it would seem to defy one's ability to comfortably and confidently grasp its varieties, nuances, shapes and dynamics. But in this wide-ranging and comprehensive survey of the contexts of human behavior, Dennis Saleebey examines the different social science approaches to understanding the way humans react to and are affected by their environment. Using a biopsychosocial perspective, this book demonstrates that there are many paths of knowledge, many methods of inquiry and many perspectives that can guide one's understanding of human behavior. Resilience: how we cope with trauma and meaning-making: how we see and make sense of the world around us, provide the conceptual framework of the book. Saleebey examines a number of specific theories relevant to the biopsychosocial approach: part-whole analysis, psychodynamic theory, ecological theory, cognitive theory, and radical/critical theory. Human development is presented as a continuing interaction between individual, family, community, social institutions and culture. Pedagogical devices to aid the student include chapter overviews, case studies, and meaning-making dialogues at the end of each chapter that pose questions for further thought.      *Comprehensive Handbook of Social Work and Social Welfare, Human Behavior in the Social Environment*, 2008-05-16 *Comprehensive Handbook of Social Work and Social Welfare* Volume 2: The Profession of Social Work features contributions from leading international researchers and practitioners and presents the most comprehensive in-depth source of information on the field of social work and social welfare.      *HUMANISTIC PERSONOLOGY: A HUMANISTIC-ONTOLOGICAL THEORY OF THE PERSON & PERSONALITY. Applications in Therapy, Social Work, Education, Management, and Art (Theater)* 2023 PAPERBACK EXPANDED EDITION, 2023-10-29 This Expanded 2023 Edition of the book entitled *HUMANISTIC PERSONOLOGY: A HUMANISTIC ONTOLOGICAL THEORY OF THE PERSON PERSONALITY Applications in Therapy Social Work Education Management and Art Theater* completes the range of domains brought to attention and represented from the perspective of humanistic ontological orientation with new domains, namely: medicine, politics, technology, science, ecology, and economy, work, project, which, as stated in previous editions, presents an ontological humanistic theory model for the formation, development, functioning, education, and therapy/counseling of the human personality/person, offering a philosophical ontological alternative to the prevailing contemporary psychological, biological, and cybernetic models in both literature and practice. To this end, the process of personality/person formation is described as a successive and simultaneous creation and establishment of internal autonomous BEINGS/onto-formations. These internal beings/onto-formations, such as the organism, the self, the soul, the ego, the mind, the consciousness, play a dynamic ontological and functional specific role in the composition and the functioning of the personality/person. The personal profile, the personality traits, the behavior, the human being as a whole, are depicted as the outcomes of inner dynamic relationships and ontological confrontations among these internal beings, which are energetically and antagonistically charged. Through this daring project and through these innovative elements, the theory

model presented in an improved form also in this edition can represent a significant contribution not only to elucidating and explaining the complex processes of personality person formation development functioning and therapy but also to represent these processes including by invoking the Aristotelian and Platonic concepts of transubstantiation and body soul matter spirit dualism in relation to profound philosophical ontological and metaphysical categories such as human being human essence human nature and human condition bringing the discourse currently located mainly in the sphere of psychology in the sphere of philosophy ontology and ethics as well the formation and development process not leading from the perspective of the model adopted in the project only to the formation of personality and adaptive behavior but also to the formation in a holistic view of the person as a whole of the person as a HUMAN BEING Some of the most significant fragments ideas The essence of the humanistic ontological conception regarding the person the human personality is given by the idea that these are ontological products of some gradual and stadial processes held with the crucial contribution of the concrete contextual contingent socio human cultural and institutional factors where the person grows and lives Very important are therefore the personal human factors In our ontological humanistic model of formation beingness and functioning of the person personality of the human being we will speak therefore about characteristics properties processes principles such as onto formatization persomization and promergence emergence and imergence transmergence and telegence conmergence and sinmergence about stages of evolution formation development establishment of the personal ontological psychological formations of the person as a whole such as of contact of acquisition accumulation of structuration centralization of constitution holistization of establishing networking and finally of ontification fulfillment and about ontological subjective humane and spiritual experiences feelings that represent substances motivational energetical sources and resorts of forming of the personality person s onto formations and spheres
