multicultural education is sought through comparison between a society of special interest and a reference society often the United States An interesting recent example is Constructing Multicultural Education in a Diverse Society by Ilghiz Sinagatullin 2003 drawing on the author s knowledge of Russia and more particularly the Republic of Bashkortostan itself an ethnically and culturally diverse part of Russia The approach taken in this volume is to focus on an aspect of diversity and look at its ramifications across the world This provides an understanding of the nature of multicultural education itself as well as insights into local issues through the experience of other places *Searching for Dignity* John Claassens,Leslie Swartz,Len Hansen,2013-08-01 This publication fills a unique gap in the theological and religious engagement with the issue of human disability in South Africa Combining the contributions of scholars practitioners and people living with disabilities it stands out for the way in which it promotes an interdisciplinary debate on disability and human dignity from a theological point of departure and interest The end result is a collective effort with a critical approach to the role of religion and the Christian faith tradition in particular in the social and life worlds of people living with disabilities A forceful argument is thus constructed about ways in which religion and the Christian faith tradition should change their own discourses practices and ideological presuppositions regarding the issue of human disability Cobus van Wyngaard Department of Philosophy Practical and Systematic Theology University of South Africa **Multilingual Norms** Madalena Cruz-Ferreira,2010 Multilinguals are not multiple monolinguals Yet multilingual assessment proceeds through monolingual norms as if fair conclusions were possible in the absence of fair comparison In addition multilingualism concerns what people do with language not what languages do to people Yet research focus remains on multilinguals languages as if languages existed despite their users This book redresses these paradoxes Multilingual scholars teachers and speech language clinicians from Europe Asia Australia and the US contribute the first studies dedicated to multilingual norms those found in real life multilingual development assessment and use Readership includes educators clinicians decision makers and researchers interested in multilingualism What Teachers Need to Know About Language Carolyn Temple Adger,Catherine E.
