**Sustainable Forestry** Keith M. Reynolds, 2007-01-01 This book reviews the current state of the art within each of the four major themes science and policy inventory and monitoring statistics and modelling and information and knowledge management in the context of sustainable forestry It fosters dialogue across thematic areas concerning both strategic and operational approaches to integrate research on sustainable forestry It also enhances and encourages international collaboration towards sustainable forestry practice worldwide

**Communities and Forests** Robert G. Lee, Donald R. Field, 2005 Communities and Forests offers a timely view of the changing face of forests and forestry in North America today In examining interactions between people and forests the book shows that forests are as much a social institution as they are a biological resource The book begins with an investigation of the historical and sociological foundations of community based forest management Chapters in the second section highlight the diverse issues surrounding community forestry specifically the conflicts between the management of public forestlands and the interests of various stakeholders in using forests as a public good The final section examines urban forestry focusing on both the importance of forestry in urban settings and the demographic shifts that have brought people with urban values and lifestyles to rural forested settings

Rural Wealth Creation John L. Pender, Bruce A. Weber, Thomas G. Johnson, J. Matthew Fannin, 2014-06-05 This book investigates the role of wealth in achieving sustainable rural economic development The authors define wealth as all assets net of liabilities that can contribute to well being and they provide examples of many forms of capital physical financial human natural social and others They propose a conceptual framework for rural wealth creation that considers how multiple forms of wealth provide opportunities for rural development and how development strategies affect the dynamics of wealth They also provide a new accounting framework for measuring wealth stocks and flows These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies Rural Wealth Creation makes numerous contributions to research on sustainable rural development Important distinctions are drawn to help guide wealth measurement such as the difference between the wealth located within a region and the wealth owned by residents of a region and privately owned versus publicly owned wealth Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured Several key hypotheses are proposed about the process of rural wealth creation and these are investigated by case study chapters assessing common rural development strategies such as promoting rural energy industries and amenity based development Based on these case studies a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated This book will be relevant to students researchers and policy makers looking at rural community development sustainable economic development and wealth measurement

Forests People and Power Oliver Springate-Baginski, Piers

Blaikie, 2013-06-17 With tens of millions of hectares and hundreds of millions of lives in the balance the debate over who should control South Asia's forests is of tremendous political significance. This book provides an insightful and thorough assessment of important forest management transitions currently underway. MARK POFFENBERGER, EXECUTIVE DIRECTOR OF COMMUNITY FORESTRY INTERNATIONAL. The contributions in this volume not only breathe life into the field of writing and analysis related to forests, they do so on the strength of extraordinarily insightful research. Kudos to Springate Baginski and Blaikie for providing us with a set of thoroughly researched provocative studies that should be required reading not only for those interested in community forestry in South Asia but in resource governance anywhere. ARUN AGRAWAL, ASSOCIATE PROFESSOR OF NATURAL RESOURCES. It challenges our assumptions of the benefits of participatory forest management and the role of forestry in poverty reduction. It should be of interest to policy makers and to all those who have been involved with the struggle of transforming forestry over the decades. DR MARY HOBLEY, HOBLEY SHIELDS ASSOCIATES. NATURAL RESOURCE MANAGEMENT AND PLANNING CONSULTANCY. A rare combination of extensive field study, social science insights and policy studies will be of immense value. DR N C SAXENA, MEMBER OF NATIONAL ADVISORY COUNCIL, GOVERNMENT OF INDIA. In recent decades participatory approaches to forest management have been introduced around the world. This book assesses their implementation in the highly politicized environments of India and Nepal. The authors critically examine the policy implementation processes and causal factors affecting livelihood impacts. Considering narratives and field practice with data from over 60 study villages and over 1000 household interviews, the book demonstrates why particular field outcomes have occurred and why policy reform often proves so difficult. Research findings on which the book is based are already influencing policy in India and Nepal, and the research and analysis have great relevance to forestry management in a wide range of countries. Published with DFID. **Forest Communities, Community Forests** Jonathan Kusel, Elisa Adler, 2003. A collection of stories about thirteen communities in the United States in their efforts to protect and restore community forests. It explores the struggles and opportunities faced by people as they work to invest in natural capital, reverse decades of poor forest practices, tackle policy gridlock and address community as well as ecological health. Visit our website for sample chapters. Communities and Conservation Peter J. Brosius, Anna Lowenhaupt Tsing, Charles Zerner, 2005-07-21. The distinguished environmentalists in this collection offer an in-depth analysis and call to advocacy for community-based natural resource management (CBNRM). Their overview of this transnational movement reveals important links between environmental management and social justice agendas for sustainable use of resources by local communities. In this volume, leaders who have been instrumental in creating and shaping CBNRM describe their model programs, the countermapping movement and collective claims to land and resources, legal strategies for gaining rights to resources and territories, biodiversity conservation and land stabilization priorities and environmental justice and minority rights. This book will be of value to instructors, practitioners and activists in anthropology.
