# Community Based Natural Resource Management Issues And Cases In South Asia

**Barry Dalal-Clayton, Barry Sadler**

## **Community Based Natural Resource Management Issues And Cases In South Asia:**

*Community-based Natural Resource Management*, 2007 **Community-based Natural Resource Management** Ajit Menon, 2007-09-10 NGOs today as part of civil society have come to play a prominent role in South Asia in the context of community based natural resource management CBNRM This book examines the theory and practice of NGO driven CBNRM within the framework of emerging critiques of dominant discourses of development the micro politics of decentralization and the projection of community development The book breaks new ground by situating these critiques within six detailed cases of CBNRM initiatives Community-Based Natural Resource Management in Southern Africa Center for African Studies at the University of Florida, 2013-06-05 Community based natural resource management CBNRM is a compelling concept if people are allowed to be custodians of their resources better management of the resources will result CBNRM is much more complex and challenging than has commonly been understood but can provide a way to achieve a more equitable and sustainable approach to the use of natural resources This book has a focus on Southern Africa It is aimed at students of natural resource management including undergraduates conservation practitioners and development sector implementing agents It is theoretically grounded but has a major applied focus with respect to understanding the why what and how of CBNRM in order to more effectively guide natural resource management It is not a manual with explanatory details about implementation measures rather it helps the reader to understand the complexity of CBNRM and provides a guide to other resources that will assist in enhancing learning Part I consists of ten chapters After introducing the CBNRM concept consideration is given to the following History as a Determinant of Progress Economic Foundations Well Being Livelihoods and Business Institutions and Governance Stakeholder Analysis Adaptive Management Capacity Development and Learning and Communication for Effective Implementation Part II is devoted to eight case studies from the Southern Africa region that illustrates some of the issues considered in Part I They are included to provide material that can be used as site specific examples and teaching aids to complement general discussion of the issues **Conflicts over Natural Resources in the Global South** Maarten Bavinck, Lorenzo Pellegrini, Erik Mostert, 2014-01-15 Inhabitants of poor rural areas in the Global South heavily depend on natural resources in their immediate vicinity Conflicts over and exploitation of these resources whether it is water fish wood fuel minerals or land severely affect their livelihoods The contributors to this volume leave behind the polarised debate previously surrounding the relationship between natural resources and conflict preferring a more nuanced approach that allows for multiple causes at various levels The contributions cover a wide array of resources geographical contexts Africa Asia and Latin America and conflict dynamics Most are of a comparative nature exploring experiences of conflict as well as cooperation in multiple regions This volume finds its origin in an innovative research programme with the acronym CoCooN steered by The Netherlands Organisation for Scientific Research NWO WOTRO and involving universities and civil society partners in many countries It presents the conceptual approaches adhered to by each

of seven interdisciplinary projects ranging from green criminology and political ecology to institutional analysis legal pluralism and identity politics The volume will be of interest to academics and practitioners concerned with an understanding of conflict as well as cooperation over natural resources Diverting the Flow Margreet Zwarteveen, Sara Ahmed, Suman Rimal Gautam, 2014-03-11 Across the South Asian region water determines livelihoods and in some cases even survival However water also creates exclusions Access to water and its social organisation are intimately tied up with power relations This book provides an overview of gender equity and water issues relevant to South Asia The essays empirically illustrate and theoretically argue how gender intersects with other axes of social difference such as class caste ethnicity age and religion to shape water access use and management practices Divided into six thematic sections each of which starts with an introduction of relevant concepts debates and theories the book looks at laws and rights policies technologies and intervention strategies In all the book clearly shows how understanding and changing the use distribution and management of water is conditional upon understanding and accommodating gender relations Published by Zubaan *Integrated Watershed Management in Rainfed Agriculture* Suhas P. Wani, Johan Rockstrom, Kanwar Lal Sahrawat, 2011-09-16 This book provides a comprehensive presentation of the realization of improved rainfed agriculture yield in semi arid and dry land areas The incentive of watershed programs is to increase the return on investment with over 20% for 65% of the projects that are currently underperforming Besides techniques to improve the livelihood of the many small scale farmers in developing countries it includes examples and case studies for further support The methods discussed have recently shown to be successful and economically remunerative in India and in various African countries Intended for professionals investors policy makers researchers and post graduate students working on dry land and sustainable agriculture and water and natural resources management Suited for courses in dry land agriculture soil and water management and watershed development

**Indigenous Methodologies, Research and Practices for Sustainable Development** Marcellus F. Mbah, Walter Leal Filho, Sandra Ajaps, 2022-10-21 This book states that whilst academic research has long been grounded on the idea of western or scientific epistemologies this often does not capture the uniqueness of Indigenous contexts and particularly as it relates to the achievement of the United Nations Sustainable Development Goals SDGs The SDGs were announced in 2015 accompanied by 17 goals and 169 targets These goals are the means through which Agenda 2030 for sustainable development is to be pursued and realised over the next 15 years and the contributions of Indigenous peoples are essential to achieving these goals Indigenous peoples can be found in practically every region of the world living on ancestral homelands in major cities rainforests mountain regions desert plains the arctic and small Pacific Islands Their languages knowledges and values are rooted in the landscapes and natural resources within their territories However many Indigenous peoples are now minorities within their homelands and globally and there is a dearth of research based on Indigenous epistemologies and methodologies Furthermore academic research on Indigenous peoples is typically based on western lenses Thus the paucity

of Indigenous methodologies within mainstream research discourses present challenges for implementing practical research designs and interpretations that can address epistemological distinctiveness within Indigenous communities There is therefore the need to articulate as well as bring to the nexus of research aimed at fostering sustainable development a decolonising perspective in research design and practice This is what this book wants to achieve The contributions critically reflect on Indigenous approaches to research design and implementation towards achieving the sustainable development goals as well as the associated challenges and opportunities The contributions also advanced knowledge theory and practice of Indigenous methodologies for sustainable development

*Science and Socio-Religious Revolution in India* Pankaj Jain, 2016-12-19 Scholars have long noticed a discrepancy in the way non Western and Western peoples conceptualize the scientific and religious worlds Non Western traditions and communities such as of India are better positioned to provide an alternative to the Western dualistic thinking of separating science and religion The Himalayan Environmental Studies and Conservation Organization HESCO was founded by Dr Anil Joshi in the 1970s as a new movement looking at the economic and development needs of rural villages in the Indian Himalayas and encouraging them to use local resources in order to open up new avenues to self reliance This thoroughly revised text argues that the concept of dharma the law that supports the regulatory order of the universe in Indian culture can be applied as an overarching term for HESCO's socio economic work This book presents the social environmental work in contemporary India by Dr Anil Joshi in the Himalayas and by Baba Seechewal in Punjab combining the ideas of traditional and scientific ecological knowledge systems Based on these two examples the book presents the holistic model transcending the dichotomies of nature vs culture and science vs religion especially as practiced and utilized in the non Western society such as India Using the example of HESCO the book highlights that the very categories of religion and science are problematic when applied to non Western traditions but that Western technologies can be radically transformed through integration with regional legacies to enable the flourishing of a multiplicity of knowledge traditions and the societies that depend upon them It will be of interest to students and scholars of South Asian Studies Religion Environmental Studies Himalayan Studies and Development Studies

*A Political Ecology of Forest Conservation in India* Amrita Sen, 2021-11-25 This book critically explores the political ecology of human marginalization wildlife conservation and the role of the state in politicizing conservation frameworks drawing on examples from forests in India The book specifically demonstrates the nuances within human environmental linkages by showing how environmental concerns are not only ecological in content but also political In India a large part of the forests and their surrounding areas were inhabited far before they were designated as protected areas and inviolate zones with the local population reliant on forests for their survival and livelihoods Thus socioecological conflicts between the forest dependents and official state bodies have been widespread This book uses a political ecology lens to explore the complex interplay between current norms of forest conservation and environmental subjectivities illustrating contemporary articulation of

forest rights and the complex mediations between forest dependents and different state and non state bodies in designing and implementing regulatory standards for wildlife and forest protection It foregrounds the issues of identity migration and cultural politics while discussing the politics of conservation Through a political ecology approach the book not only is human centric but also makes significant use of the role of non humans in foregrounding the conservation discourse with a particular focus on tigers The book will be of great interest to students and academics studying forest conservation human wildlife interactions and political ecology

**Colonialism and Wildlife** Velayutham Saravanan, 2023-08-22 This book delves into the history of the commercialization of wildlife in India It examines the colonial strategies that were employed in the commodification of wildlife resources specifically for lucrative domestic and international trade during the early nineteenth to the mid twentieth century It looks at how and why the colonial administration paid special emphasis on hunting and game sports which largely contributed to commodity capitalism in the form of taxidermy and wildlife exports The author also critically analyses the wildlife laws and regulations promulgated by the colonial administration such as the elephant protection act birds and fisheries act the forest acts and studies how they have systematically brought wildlife under state control with a commercial motive An important contribution to the environmental history of India this book is an essential interdisciplinary resource for scholars and researchers of history colonialism wildlife studies economic history ecological studies environmental history Indian history South Asian studies and development studies

**Community, Environment and Local Governance in Indonesia** Carol Warren, John F. McCarthy, 2012-09-10 This book explores the forces reconfiguring local resource governance in Indonesia since 1998 drawing together original field research undertaken in a decade of dramatic political change Case studies from across Indonesia s diverse cultural and ecological landscapes focus on the most significant resource sectors agriculture fisheries forestry mining and tourism providing a rare in depth view of the dynamics shaping social and environmental outcomes in these varied contexts Debates surrounding the tragedy of the commons and environmental governance have focused on institutional considerations of how to craft resource management arrangements in order to further the policy objectives of economic efficiency social equity and environmental sustainability The studies in this volume reveal the complexity of resource security issues affecting local communities and user groups in Indonesia as they engage with wider institutional frameworks in a context driven simultaneously by decentralizing and globalizing forces Through ground up investigations of how local groups with different cultural backgrounds and resource bases are responding to the greater autonomy afforded by Indonesia s new political constellation the authors appraise the prospects for rearticulating governance regimes toward a more equitable and sustainable commonweal This volume offers valuable insights into questions of import to scholars as well as policy makers concerned with decentralized governance and sustainable resource management

**Yojana** , 2008 [Contesting Water Rights](#) Mangala Subramaniam, 2018-04-21 As globalization processes and related neoliberal agendas promote privatization through state action people s struggles for

rights to water have intensified In this context this book examines the role of the ambivalent state in local struggles for water which are deeply intertwined with global forums that support and or challenge the privatization of water resources These local global struggles have redefined the relationships between the state corporations and other social actors that impact the local politics of inequality and marginalization

**Modern India** John McLeod,2019-11-15 This one volume thematic encyclopedia examines life in contemporary India with topical sections focusing on geography history government and politics economy social classes and ethnicity religion food etiquette literature and drama and more Modern Indian an addition to the Understanding Modern Nations series is an in depth and interdisciplinary encyclopedia While many books on life in India exist today this volume is unique as a concise accessible overview of multiple aspects of Indian society and history It will be a useful background or supplemental text for anyone interested in modern Indian life and culture Individual chapters address all aspects of life in 21st century India from geography and history to economy and religion to etiquette and sports Each chapter begins with an overview followed by entries on for example major political parties or literary works Each overview and entry is self contained and accompanied by an up to date Further Reading list

**Sustainability Appraisal** Barry Dalal-Clayton,Barry Sadler,2014-03-26 Sustainability Appraisal is a sourcebook of the state of the art of this rapidly emerging and diversifying area It draws on a wealth of international experiences and approaches to illustrate the status and scope of Sustainability Appraisal Assessment SA This comprehensive guide highlights how SA can be used to analyse and integrate the key environmental social and economic pillars of sustainability into decision making at all levels from policy to project to investment by government business and industry or international organizations Distilling both published and unpublished materials and with contributions from a range of leading experts organizations and agencies this book will be of significant value to professionals everywhere who are in need of a solid reference guide to what constitutes SA practice and more importantly how and when it can be applied

Community, Commons and Natural Resource Management in Asia Haruka Yanagisawa,2015-08-14 Managing the commons natural resources held in common by particular communities is a complex challenge How have Asian societies handled resources of this sort in the face of increasing marketization and quickly growing demand for resources And how have resource management regimes changed over time with state formation modernization development and globalization Community Commons and Natural Resource Management in Asia brings clarity detail and historical understanding to these questions across a variety of Asian societies and ecological settings Case studies drawn from Japan Korea Thailand India and Bhutan examine fisheries forests and other environmental resources held in common There is a tendency to imagine that traditional communities had socially equitable and environmentally friendly systems for managing the commons but natural resources in Asia were often under free access regimes Resource management developed in response to social and economic pressures and the state has been at various times both a beneficial and a negative influence on the development of community level systems of managing the commons The chapters

in this volume show that a simple modernist framework cannot adequately capture this process and the institutional changes it involved

**Management of Natural Resources--institutions for Sustainable Livelihood** Sunil Ray, 2008 Articles with reference to India

**Analytical Issues in Participatory Natural Resources** B. Vira, R. Jeffery, 2001-07-18 Attempts to manage natural resources through collaboration rather than competition by agreements rather than conflict have become the touchstone for many who see these efforts as the harbinger of global sustainable development The received wisdom suggests that participatory natural resource management projects work because traditional knowledge of the resources and existing social structures can be utilised to develop more effective strategies for resource use Participation is a flexible and adaptable concept which can reflect local circumstances and priorities The contributors to this volume advise caution as well as optimism for projects conducted in this way By drawing on the experience of NGOs national governments and donor sectors as well as academic researchers this volume analyses the theory and practice of participatory natural resource management and demonstrates the value of constructive dialogue between all those involved

**The Hindu Kush Himalaya Assessment** Philippus Wester, Arabinda Mishra, Aditi Mukherji, Arun Bhakta Shrestha, 2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya HKH region It comprises important scientific research on the social economic and environmental pillars of sustainable mountain development and will serve as a basis for evidence based decision making to safeguard the environment and advance people's well being The compiled content is based on the collective knowledge of over 300 leading researchers experts and policymakers brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme HIMAP under the coordination of the International Centre for Integrated Mountain Development ICIMOD This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports under the guidance of the HIMAP Steering Committee Eklabya Sharma ICIMOD Atiq Raman Bangladesh Yuba Raj Khatriwada Nepal Linxiu Zhang China Surendra Pratap Singh India Tandong Yao China and David Molden ICIMOD and Chair of the HIMAP SC This First HKH Assessment Report consists of 16 chapters which comprehensively assess the current state of knowledge of the HKH region increase the understanding of various drivers of change and their impacts address critical data gaps and develop a set of evidence based and actionable policy solutions and recommendations These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals This book is a must read for policy makers academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports

*Sustaining Agriculture* William Vorley, 2002
