Community Psychology Challenges Controversies And Emerging Consensus:

Community Psychology Jim Orford, 2008-04-15 This book is both a sequel to and expansion of Community Psychology published in 1992. It serves as a textbook for courses on community psychology but now also includes material on inequality and health since both are concerned with the way an individual's social setting and the systems with which they interact affect their problems and the solutions they devise. Part 1 sets the scene by locating community psychology in its historical and contemporary context. In Part 2, disempowered groups and their physical and mental health are considered. Finally, in Part 3, the application of community psychology is discussed and the ways in which marginalised people can be helped by strengthening their communities highlighted. *Outlines and Highlights for Community Psychology* Cram101 Textbook Reviews, 2011-07 Never HIGHLIGHT a Book Again! Community Nick Malherbe, 2022-04-22 Anti-capitalist political struggle is a site of struggling psychologies. Conscious political action is never far from unconscious desire and the fight for material justice is always also the fight for dignity and psychological well-being. Yet how might community psychologists conceive of their discipline in a way that opposes the very capitalist political economy that historically most of the psy disciplines have bolstered in return for disciplinary legitimacy? In its consideration of an anti-capitalist psychology of community, this book does not ignore or try to resolve the contradictory position of such a psychology. Instead, it draws on these contradictions to enliven psychology to the shifting demands, both creative and destructive, of a community-centred anti-capitalism. Using practical examples, the book deals with the psychological components of building community-centred social movements that challenge neoliberal capitalism as a political system, an ideology, and a mode of governing rationality. The book also offers several theoretical contributions that grapple with how an anti-capitalist psychology of community can remain attentive to the psychological elements of anti-capitalist struggle: what the psychological can tell us about anti-capitalist politics and how these politics can shape the psychological.
