Competition Policies In Europe Contributions To Economic Analysis:

The More Economic Approach to EU Antitrust Law Anne C Witt, 2016-11-17 In the late 1990s the European Commission embarked on a long process of introducing a more economic approach to EU Antitrust law One by one it reviewed its approach to all three pillars of EU Antitrust Law starting with Article 101 TFEU moving on to EU merger control and concluding the process with Article 102 TFEU Its aim was to make EU antitrust law more compatible with contemporary economic thinking On the basis of an extensive empirical analysis of the Commission's main enforcement tools this book establishes the changes that the more economic approach has made to the Commission's enforcement practice over the past fifteen years It demonstrates that the more economic approach not only introduced modern economic assessment tools to the Commission's analyses but fundamentally changed the Commission's interpretation of the law Emulating one of the key credos of the US Antitrust Revolution thirty years earlier the Commission reinterpreted the EU antitrust rules as aiming at the enhancement of economic consumer welfare only and amended its understanding of key legal concepts accordingly This book argues that the Commission's new understanding of the law has many benefits Its key principles are logical translate well into workable legal concepts and promise a great degree of accuracy However it also has a number of serious drawbacks as it stands Most worryingly its revised interpretation of the law is to large extents incompatible with the case law of the European Court of Justice which has not been swayed by the exclusive consumer welfare aim This situation is undesirable from the point of view of legal certainty and the rule of law Research Handbook on European State Aid Law E.

Szyszczak, 2011-11-01 Erika Szyszczak and the team have come up trumps with a modern comment on state aid and policy Thank you Phillip Taylor MBE and Elizabeth Taylor The Barrister Magazine This fine collection of essays demonstrates in a very articulate way why EU State aid law has taken the centre stage of EU law In eighteen chapters the reader is provided with a fascinating snapshot of the main issues and developments of the law The key elements of the EU policy are analysed in a critical way often leading to new insights In addition the book contains a wealth of material greatly facilitating further research Piet Jan Slot University of Leiden The Netherlands European state aid law needs more self questioning and more intellectual debate In my view this Research Handbook is a very valuable contribution to this necessary process It correctly identifies the most intellectually problematic issues within state aid law and asks the right questions This may be due to the balance in the excellent selection of contributors coming both from the academia and from practice This guarantees on the one hand that the questions are relevant in practice and not purely theoretical but also provides on the other hand for a rigorous analytical approach when confronting the issues The result is a fresh and interesting new look to many of the basic issues of state aid law Jos Luis Buendia Sierra Garrigues Brussels Belgium and King's College London UK This Research Handbook provides an in depth exploration of some of the most difficult and controversial issues in current State aid law and policy It is unusual in providing not only a legal but also an economic and political science perspective on this rapidly

National Remedies Before the Court of Justice Michael Dougan, 2004-12-31 The Court of Justice has delivered an extensive body of caselaw concerning the obligation of domestic courts to provide effective judicial protection to claimants relying upon Community law rights including such landmark judgments as *Factortame* and *Francovich* This book offers a critical analysis of the Court's fast changing approach to national procedural autonomy and explores the difficult conceptual framework underpinning the caselaw The author demonstrates how Community intervention in the domestic

systems of judicial protection cannot remain unaffected by wider debates about the evolving European integration project in particular the tension between uniformity and differentiation as competing values influencing the exercise of Community regulatory competence Because of its emphasis on an ideal of uniformity which has become increasingly untenable within the contemporary Community legal order much of the existing academic discourse about national remedies and procedural rules now seems ripe for reconsideration It is argued that the Court's jurisprudence on the decentralised enforcement of Treaty norms needs to be interpreted afresh having regard to the recent growth of regulatory differentiation within the Community system National Remedies Before the Court of Justice provides a challenging account of this crucial field of EU legal studies It includes detailed discussion of issues such as Member State liability in damages Community control over national limitation periods and the principles governing state aid and competition law enforcement This book is of value to academics and practitioners alike
