Consumer Society in American History Lawrence B. Glickman, 1999 This volume offers the most comprehensive and incisive exploration of American consumer history to date spanning the four centuries from the colonial era to the present

The Oxford Encyclopedia of American Social History: Men's-YMCA, 2012 **Children and Consumer Culture in American Society** Lisa Jacobson, 2007-12-30 Children play a crucial role in today's economy According to some estimates children spend or influence the spending of up to 500 billion annually Journalists sociologists and media reformers often present mass marketing toward children as a recent fall from grace but the roots of children's consumerism and the anxieties over it date back more than a century Throughout the twentieth century a wide variety of groups including advertisers retailers parents social reformers child experts public schools and children themselves helped to socialize children as consumers and struggled to define the proper boundaries of the market The essays and documents in this volume illuminate the historical circumstances and cultural conflicts that helped to produce shape and legitimize children's consumerism Focusing primarily on the period from the Gilded Age through the twentieth century this book examines how and why children and adolescents acquired new economic roles as consumers and how these new roles both reflected and produced dynamic changes in family life and the culture of capitalism This volume also reveals how children and adolescents have used consumer goods to define personal identities and peer relationships sometimes in opposition to marketers expectations and parental intentions

Consumer Culture Roberta Sassatelli, 2007-04-30 A thorough and wide ranging synthetic account of social scientific research on consumption which will set the standard for the second generation of textbooks on cultures of consumption Alan Warde University of Manchester The multi disciplinary nature of the book provides new and revealing insights and Sassatelli conveys brilliantly the heterogeneity and ambivalent nature of consumer identities consumer practices and consumer cultures Newcomers to consumer culture will find this an invaluable primer and introduction to the major concepts and ideas while those familiar with the field will find Sassatelli's sharp analysis and discussion both refreshing and inspiring James Skinner Journal of Sociology This is a model of what a text book ought to be Over the past decade the original debates about consumption have been overlaid by a vast amount of detailed research and it seems unimaginable that a single text could do justice to all of these To do so would involve as much a commitment to depth as to breadth I was quite astonished at how well Sassatelli succeeds in balancing the two Ultimately it's the book that I would trust to help people digest what we now have discovered about consumption and start from a much more mature and reflective foundation to consider what more we might yet do Daniel Miller Material World Showing the cultural and institutional processes that have brought the notion of the consumer to life this book guides the reader on a comprehensive journey through the history of how we have come to understand ourselves as consumers in a consumer society and reveals the profound ambiguities and ambivalences inherent within While rooted in sociology Sassatelli draws on the traditions of history anthropology geography

and economics to provide a history of the rise of consumer culture around the world a richly illustrated analysis of theory from neo classical economics to critical theory to theories of practice and ritual de commoditization a compelling discussion of the politics underlying our consumption practices An exemplary introduction to the history and theory of consumer culture this book provides nuanced answers to some of the most central questions of our time **The SAGE Handbook of**

restaurants more than a century ago making Chinese food the first mass consumed cuisine in the United States By 1980 it had become the country s most popular ethnic cuisine Chop Suey USA offers the first comprehensive interpretation of the rise of Chinese food revealing the forces that made it ubiquitous in the American gastronomic landscape and turned the country into an empire of consumption Engineered by a politically disenfranchised numerically small and economically exploited group Chinese food s tour de America is an epic story of global cultural encounter It reflects not only changes in taste but also a growing appetite for a more leisurely lifestyle Americans fell in love with Chinese food not because of its gastronomic excellence but because of its affordability and convenience which is why they preferred the quick and simple dishes of China while shunning its haute cuisine Epitomized by chop suey American Chinese food was a forerunner of McDonald s democratizing the once exclusive dining out experience for such groups as marginalized Anglos African Americans and Jews The rise of Chinese food is also a classic American story of immigrant entrepreneurship and perseverance Barred from many occupations Chinese Americans successfully turned Chinese food from a despised cuisine into a dominant force in the restaurant market creating a critical lifeline for their community Chinese American restaurant workers developed the concept of the open kitchen and popularized the practice of home delivery They streamlined certain Chinese dishes such as chop suey and egg foo young turning them into nationally recognized brand names **The**

Production of Consumers and the Formation of Desire Christine Darr,2022-12-13 We live in a society surrounded by stuff and bombarded with advertisements that try to convince us that shopping will improve our lives Sometimes our lives do improve yet our purchases are more often motivated by an impulse to satisfy immediate desires rather than reflective deliberation about how our purchasing choices enable us to live the lives we want Christian moral reflection often criticizes

this conundrum as mindless consumerism arguing that it pulls Christians away from loving God above all things While such critiques often encourage Christians to focus their desire on God rather than material goods we might still wonder how we can exercise such control over our desires By attending to desire itself how it arises how it is shaped by social context and its role in cultivating a virtuous life we can learn how to desire and then act in ways that are more consonant with our conception of what it means to live well Within the Christian tradition Thomas Aquinas offers a compelling model of human desire that when juxtaposed with Pierre Bourdieu's theory of social practices can help us make more considered judgments about how to navigate the consumer society in which we live

Workers and the Wild Lawrence M.

Lipin, 2007 In an innovative blend of environmental and labor history *Workers and the Wild* examines the changing terms on which battles over the proper use of nature were fought in the early twentieth century Focusing on Oregon in the 1910s and 1920s Lawrence M Lipin traces labor's shift in thinking about natural resources They began with the producerist idea that resources and land both rural and urban should be put to productive use and that those who do are most entitled to access to them They later shifted to a consumerist view under which resources should be available for public and recreational use While labor was initially resistant to the elitism of protected nature preserves working class views changed as automobiles became more affordable and gained increased access to national parks forests and beaches They subsequently accepted the preservation of nature for recreation and even began to pressure state agencies to provide more outdoor opportunities While fish and game commissioners responded with ever more intensive hatchery operations wildlife advocates began a push for designated wilderness areas In these and other ways the labor movement's shifting relationship to nature reveals the complicated development of wildlife policy and its own battles with consumerism

The Marketing Era Kalman

Appelbaum, 2004-06-01 Marketing has situated itself as an indispensable tool in today's business world an unavoidable step in the process from production to consumption This book is the first of its kind to map out the organizing principles and cultural logic of marketing and trace the profession's ascent to global domination Appelbaum argues that marketing can be seen as a particular set of cultural practices that surfaced in reaction to the affluence of Western society and not the answer to the call of inherent human needs and wants In order to understand globalization transnational corporations and the spread of consumer culture one must understand the logic of marketing

Ambition Deborah L. Rhode, 2021-08-02 An engaging

account of ambition the forces that drive and constrain it and whether it serves our deepest needs *Ambition* is a dominant force in for human civilization driving its greatest achievements and most horrific abuses Our striving has brought art airplanes and antibiotics as well as wars genocide and despotism This mixed record raises obvious concerns about how we can channel ambition in the most productive directions In *Ambition* Deborah L Rhode offers a comprehensive and engaging

survey of the topic that focuses in particular on the nature of ambition in contemporary American life To do this she first explores three central focuses of ambition recognition power and money and argues that an excessive preoccupation with these external markers for success can be self defeating for individuals and toxic for society She then shifts to discussing the obstacles to constructive ambition and the consequences when ambitions are skewed or blocked by inequality and identity related characteristics such as gender race class and national origin Rhode further addresses the ways that families schools and colleges might play a more effective role in developing positive ambition Finally she examines what sorts of ambitions contribute to sustained well being such as building relationships and contributing to society rather than chasing extrinsic rewards such as wealth power and fame Drawing upon leading thinkers on the topic and contemporary social science research while laying out an agenda for how ambition can be better developed Ambition will force us reconsider the factors that shape our ambitions and whether those ambitions meet our deepest needs and highest aspirations The Oxford

Portraits of the New Negro Woman Cherene Sherrard-Johnson,2007 Of all the images to arise from the Harlem Renaissance the most thought provoking were those of the mulatta For some writers artists and filmmakers these images provided an alternative to the stereotypes of black womanhood and a challenge to the color line For others they represented key aspects of modernity and race coding central to the New Negro Movement Due to the mulatta s frequent ability to pass for white she represented a variety of contradictory meanings that often transcended racial class and gender boundaries In this engaging narrative Cherene Sherrard Johnson uses the writings of Nella Larsen and Jessie Fauset as well as the work of artists like Archibald Motley and William H Johnson to illuminate the centrality of the mulatta by examining a variety of competing arguments about race in the Harlem Renaissance and beyond **A Companion to 20th-Century America**
