Descendants Abdel-moniem El-Shorbagy, 2020-06-26 Hassan Fathy's 1900-1989 ideas and philosophy opened opportunities and became a source of inspiration for architects to recognize and appreciate their traditional architecture The response to Fathy's approach from architects in the Developing World differed from that of Western architects When Fathy's architecture began to be widely known from the 1970s onward these architects were influenced by his works not only because of their links to

the vernacular but also because of their associations with Islamic architecture The common response of these architects to Fathy s architecture was that they regarded his buildings as prototypes for the contemporary Islamic architecture of the Middle East as his traditional forms and techniques epitomize their national and regional features On the other hand the response of Western architects to Fathy s architecture and ideas varied While some architects admired the new possibilities of building domes and vaults with a primitive material such as mud others were inspired by Fathy s philosophy and his humanistic approach

Architecture and Politics in Nigeria Nnamdi Elleh,2016-12-08

In 1975 the Nigerian authorities decided to construct a new postcolonial capital called Abuja and together with several internationally renowned architects these military leaders collaborated to build a city for three million inhabitants Founded five years after the Civil War with Biafra which caused around 1 7 million deaths the city was envisaged as a place where justice would reign and where people from different social religious ethnic and political backgrounds would come together in a peaceful manner and work together to develop their country and its economy These were all laudable goals but they ironically mobilized certain forces from around the country in opposition against the Federal Government of Nigeria The international and modernist style architecture and the fact that the government spent tens of billions of dollars constructing this idealized capital ended up causing more strife and conflict For groups like Boko Haram a Nigerian Al Qaida affiliate organization and other smaller ethnic groups seeking to have a say in how the country s oil wealth is spent Abuja symbolized everything in Nigeria they sought to change By examining the creation of the modernist national public spaces of Abuja within a broader historical and global context this book looks at how the successes and the failures of these spaces have affected the citizens of the country and have in fact radicalized individuals with these spaces being scene of some of the most important political events and terrorist targets including bombings and protest rallies Although focusing on Nigeria s capital the study has a wider global implication in that it draws attention to how postcolonial countries that were formed at the turn of the twentieth century are

continuously fragmenting and remade by the emergence of new nation states like South Sudan
