

**ECONOMICS – FINAL EXAM REVIEW**

**Unit One-Define the Following (Use Notes):**

- **Economics**-Study of how individuals and society make choices about ways to use scarce resources.
- **Factors of Production**-resources of land, labor capital, entrepreneurship and technology
- **Land**-natural resources (ex: trees, coal, water, gold, oil)
- **Labor**-human effort directed toward producing goods and services (ex: construction worker, mailman, doctor)
- **Capital**-previously manufactured goods used to make other goods and services (ex: machines, factories)
- **Scarcity**-not being able to have all of the goods and services one wants, because wants exceed what can be made from all available resources at any given time.
- **Incentives**-something that motivates or encourages someone to do something
- **Trade-off**-sacrificing one good or service to purchase or produce another.
- **Opportunity Cost**-value of the next best alternative given up for the alternative that was chosen.
- **Supply**-the amount of a good or service that producers are **able** and **willing** to sell at various prices during a specified time period.
- **Demand**-the amount of a good or service that consumers are **able** and **willing** to buy at various possible prices during a specified time period.
- **Law of Supply**-Economic rule stating that price and quantity supplied move in the same direction.
- **Law of Demand**-quantity demanded and price move in opposite directions.
- **Production Possibilities Curve**-graph showing the maximal combinations of goods and services that can be produced from a fixed amount of resources in a given period of time.
- **Consumer**-any person or group that buys or uses goods and services to satisfy personal needs and wants
- **Producer**-a person, company or country that makes, grows or supplies goods for sale
- **Equilibrium**-the price at which the amount producers are willing to supply is equal to the amount consumers are willing to buy.
- **Market Economy**-system where individuals own the factors of production and make economic decisions through free interaction while looking out for their own best interest.
- **Shortage**-the quantity demanded is greater than the quantity supplied
- **Surplus**-the quantity supplied is greater than the quantity demanded.
- **Price ceiling**-legal maximum price that may be charged for a particular good or service
- **Price floor**-a legal minimum price below which a good or service may not be sold.

*A Reader's Guide to Contemporary Literature* William Swan Sonnenschein, 1895      Postmodern Moments in Modern Economics David F. Ruccio, Jack Amariglio, 2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today      **Curriculum Handbook with**

*Human-Earth System Dynamics* Rongxing Guo,2018-05-16 This book explores the factors and mechanisms that may have influenced the dynamic behaviors of earliest civilizations focusing on both environmental geographic factors on which traditional historic analyses are based and human behavioral factors on which anthropological analyses are usually based It also resurrects a number of common ancestral terms to help readers understand the complicated process of human and cultural evolution around the globe Specifically in almost all indigenous languages the words wa and any variants of it were originally associated with the sound of crying of and certainly were selected as the common ancestral word with the meanings of house home homeland motherland and so on by early humans living in different parts of the world This book provides many neglected but still crucial environmental and biological clues about the rise and fall of civilizations ones that have largely resulted from mankind's long lasting Win Stay Lose Shift games throughout the world The narratives and findings presented at this book are unexpected but reasonable and are what every student of anthropology or history needs to know and doesn't get in the usual text Professor Guo explores the dynamics of civilizations from the beginnings to our

perplexingly complex world There are lots of thought provoking ideas here on the rise and decline of civilizations and nations Anyone wishing to understand global developments should give this book serious consideration John Komlos University of Munich Germany and Duke University USA It is interesting to see a Chinese perspective on the questions of deep history that have engaged Jared Diamond Yuval Harari and David Christian Guo argues that understanding cyclical threats has been the key to human progress which is driven by the dialectic of material privation and human ingenuity Peter Rutland Wesleyan University USA
