New Directions in Crime and Deviancy Simon Winlow, Rowland Atkinson, 2013-06-07 Criminology is at a crossroads In the last two decades it has largely failed to produce the kind of new intellectual frameworks and empirical data that might help us to explain the high levels of crime and interpersonal violence that beset inner city areas and corrode community life Similarly it has failed to adequately explain forms of antisocial behaviour that are just as much a part of life in corporate boardrooms as they are in the ghettos of north America and the sink estates of Britain Criminology needs to rethink the problem of crime and re engage its audience with strident theoretical analysis and powerful empirical data In New Directions in Crime and Deviancy some of the world's most talented and polemical critical criminologists come together to offer new ideas and new avenues for analysis The book contains chapters that address a broad range of issues central to 21st century critical criminology ecological issues and the new green criminology the broad impact of neoliberalism upon our cultural and economic life recent signs of political resistance and opposition systemic and interpersonal forms of violence growing fear and enmity in cities the backlash against the women's movement the subjective pathology of the serial killer computer hacking and so on Based on key papers presented at the historic York Deviancy Conferences this cutting edge volume also contains important critical essays that address criminological research methods and the production of criminological knowledge It is key reading material for those with an academic interest in critical cultural and theoretical criminology and crime and deviance more generally

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and

criminal justice processes reinforce power structures and contribute to class control
