**Feminist Utopianism & Education** Christine Forde,2007-01-01 This book looks to feminist utopian thinking to seek alternative conceptualisations of the issue of gender and education We are currently faced with a situation where the issue of gender has become one of competing needs Debates on gender have swung from a concern for the progress of girls and women to a moral panic about the lack of engagement of boys in education The formulation of policy that swings from concerns and initiatives to support the educational progress of girls and women to a crisis about the engagement of boys and young men in education is ultimately to the detriment of both genders to the educational system and to society as a whole There is an urgent need for us to consider alternative approaches to the issue of gender and education In utopian writing education has been constructed as one of the means of bringing about the good society but importantly within feminist utopian writing and thinking what we understand as education is itself being transformed In feminist utopian thinking side by side with a critique of formal educational institutions there is an attempt to think more holistically about the relationship between the educative process and the achievement of girls and women s self determination both individually and collectively to bring about a realignment of gender relationships in the sociopolitical order This book draws from the debates about gender in the visions of alternative sociopolitical orders found in feminist utopian thinking to explore the issue of gender and education This book will be of special relevance to those interested in feminism gender studies educational futures and utopian thinking "Science, Technology, and Utopias " Christine Filippone,2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and

technology by women artists during and just after the women's movement. She argues that artists Alice Aycock, Agnes Denes, Martha Rosler, and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting. Motivated by the contemporary American Women's Movement, these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery, the museum, and the dealer. At the same time, the artists also embraced these domains of knowledge and practice as expressions of hope for a better future. Many found inspiration in the scientific theory of open systems, which investigated problems of wholeness, dynamic interaction, and organization, enabling consideration of the porous boundaries between human bodies and their social, political, and nonhuman environments. Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists' practice of reclamation and ecological art through the twenty-first century.

**Contemporary Feminist Utopianism** Lucy Sargisson, 1995      **Feminism's Queer Temporalities** Sam McBean, 2015-07-16 Despite feminism's uneven movements, it has been predominantly understood through metaphors of generations or waves. Feminism's Queer Temporalities builds on critiques of the limitations of this linear model to explore alternative ways of imagining feminism's timing. It finds in feminism's literary and cultural archive narratives of temporality that might now be diagnosed as queer, where queer designates modes of being historical that exceed the linear and the generational. Few theorists have looked to popular feminist figures, literature, and culture to theorize feminism's timing. Through methodologically creative readings, McBean explores non-generational, anti-linear, and asynchronous time in the figure of Antigone, Marge Piercy's *Woman on the Edge of Time*, the film *Ladies and Gentlemen: The Fabulous Stains*, Valerie Solanas's *SCUM Manifesto*, and Alison Bechdel's *Fun Home*. The first to substantially bring together the ways in which time has come to matter in both feminist and queer disciplines, this book will appeal to students and scholars of feminist, queer, and gender studies, cultural studies, and literary studies.

Female Rule in Chinese and English Literary Utopias Qingyun Wu, 1995-06-01 Qingyun Wu's work is a unique discovery in literary studies in the West. Chinese utopian literature, paired with its English counterparts, forms an original and valuable contribution to world literature. In widely varying historical and cultural texts that span the last five centuries, Wu analyzes the theme of female rule, including a critique of patriarchy and emphasizing a vision for women. To date, Chinese utopias have been insufficiently explored and unavailable to Western scholars. Wu's theories of the politics of female rule, as seen in Chinese and English literature since the end of the sixteenth century, are predicated on three significant changes that have taken place during those periods. These include an outright rejection of rule by men to rule by women in the guise of men, from individual to collective female rule, and from an idealized matrilineality to anarchism by the female principle. Works examined include Edmund Spenser's *The Faerie Queene*, Luo Maodeng's *Sanbao's Expedition to the Western Ocean*, Florence Dixie's *Gloriana*, Charlotte Perkins Gilman's *Herland*, Ursula K. LeGuin's *The Dispossessed*, and Chen Duansheng's *The Destiny of*

[A Critical Analysis of the Efficacy of Law as a Tool to Achieve Gender Equality](#) Natalie Persadie, 2012-07-26 Law is often perceived as an instrument that can effect social change While this might be so it must be complemented by the necessary financial and human resources to make the law effective Natalie Persadie explains that among developing countries such as Trinidad and Tobago the achievement of legal advances for women at either the international or national levels is particularly difficult where practical measures are not subsequently implemented This is perhaps attributable to a lack of political will Important issues such as gender equality and domestic violence are not given priority and laws aimed at protecting women and promoting women's rights are ineffective scant or unenforced Gender justice can only be realized through a multilevel approach from above and more importantly from below as women have the potential to effect real national and international legal and institutional change to ensure gender equality at both levels

[The Gender of Democracy](#) Maro Pantelidou Maloutas, 2007-05-07 As developments in the European Union and elsewhere make the re-examination of citizenship a pressing issue this book reflects on the persisting masculine character of contemporary democracy and the measures taken in the EU to combat it Combining a theoretical approach with a specific critique of EU gender policy *The Gender of Democracy* argues that substantial democracy as a social project cannot co-exist with the existing system of gender relations which are inherently dichotomous and thus demarcate social categories of superior and inferior status Drawing on utopian thought Maro Pantelidou Maloutas proposes a re-examination of the notion of the gendered subject and a revision of the dominant perceptions of the relations between sex sexuality and gender The book contains a critique of specific EU gender policies and shows how in seeking to do away with gender inequality simply formulating policies that are pro-women is not enough In order to approach democracy's emancipatory component far-reaching policies which deconstruct rather than modernize gender relations are needed
