covers many topics on the numerous ways in which mental and physical health and criminal justice system contact influence one another and are intricately intertwined. These often mutually reinforcing dynamics affect a range of health and justice outcomes at individual, familial, group, community, and national levels. Contributions detail this topic from a wide range of disciplinary, theoretical, and international perspectives and rely on various analytical lenses including quantitative, qualitative, policy, analytic, theoretical, conceptual, and lived experiences. The chapters summarize what is known in each topical area but as important, they identify emerging theoretical, empirical, and policy directions. In this way, the book is grounded in the current knowledge about the specific topic but also provides new synthesizing material that reflects the knowledge of the leading minds in the field. Conceptually divided into 11 sections, a number of contributions describe the unique experiences of women, people of color, juveniles, older populations, immigrants, LGBTQ individuals, and other sub-populations, i.e., people convicted of drug or sex offenses. Where appropriate, the authors provide both big picture and pragmatic policy directions aimed at reducing system contact, health challenges, and inhumane practices. Given its breadth and depth, the Handbook will appeal broadly to academics, practitioners, policymakers, advocates, and students seeking to understand the many ways in which health and justice system dynamics overlap.

Contemporary Issues in American Policing Richard K. Moule Jr., Bryanna Fox, 2021-03-31. American law enforcement and the public's perception of police is a topic of growing interest among academics, practitioners, and policymakers. From the 2014 events in Ferguson, MO, and the alleged Ferguson Effect to the debate over the impact of body worn cameras, BWCs, police militarization, use of force, and other practices that may alter the public's view of police legitimacy and procedural justice, there is an increasing need for research addressing these contemporary issues in American policing. This book presents the latest research on these topics as well as related topics noted in the Presidential Task Force on 21st Century Policing, such as police use of technology, transparency, oversight, and building trust with the community. The studies contained in this book examine these issues by leveraging empirical data on policing, public perceptions, crime, and diverse research methods to present high quality analysis of these timely and relevant topics in today's world. The chapters in this book were originally published as a special issue of the Journal of Crime and Justice.
