**Contemporary Military Innovation** Dima Adamsky, Kjell Inge Bjerga, *Contemporary Military Innovation* Dima Adamsky, Kjell Inge Bjerga, 2012 This book explores contemporary military innovation with a particular focus on the balance between anticipation and adaption The volume examines contemporary military thought and the doctrine that evolved around the thesis of a transformation in the character of war Known as the Information Technology Revolution in Military Affairs IT RMA this innovation served as an intellectual foundation for the US defence transformation from the 1990s onwards Since the mid 1990s professional ideas generated within the American defence milieu have been further disseminated to military communities across the globe with huge impact on the conduct of warfare With chapters written by leading scholars in this field this work sheds light on RMAs in general and the IT RMA in the US in particular The authors analyse how military practice and doctrines were developed on the basis of the IT RMA ideas how they were disseminated and the implications of them in several countries and conflicts around the world This book will be of much interest to students of strategic studies defence studies war and technology and security studies in general

**Winning the Next War** Stephen Peter Rosen, 2018-07-05 How and when do military innovations take place Do they proceed differently during times of peace and times of war In *Winning the Next War* Stephen Peter Rosen argues that armies and navies are not forever doomed to fight the last war Rather they are able to respond to shifts in the international strategic situation He also discusses the changing relationship between the civilian innovator and the military bureaucrat In peacetime Rosen finds innovation has been the product of analysis and the politics of military promotion in a process that has slowly but successfully built military capabilities critical to American military success In wartime by contrast innovation has been constrained by the fog of war and the urgency of combat needs Rosen draws his principal evidence from U S military policy between 1905 and 1960 though he also discusses the British army s experience with the battle tank during World War I

Contemporary European Security

David J. Galbreath, Jocelyn Mawdsley, Laura Chappell, 2019-03-20 Contemporary European Security explores the complex European security architecture and introduces students to the empirical theoretical and conceptual approaches to studying the subject. Written by experts in each subfield it addresses key topics within the wider strategic context of international security. Presenting traditional and critical debates to illuminate this ever-changing field it addresses specifically European security since 2000 and the end of the Cold War. The evolution of International Relations theories in understanding security in Europe. The role of NATO in the post-war period and its strategy impact and enlargement. The institutionalisation of the CSCE and the political tensions within the OSCE. The EU's Common Security and Defence Policy and recent policy initiatives in defence. Feminist conceptions of European security. European military innovation. Security challenges in the post-Soviet space and the growing instability in the Middle East and North Africa. The emergence of human security. Internal and societal security. This essential textbook will be of key interests to students and scholars of European Security. Security and Military studies. Strategic Studies. European Politics and International Relations.

**Technological Change and the Future of Warfare** Michael E. O'Hanlon, 2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs. RMA. The issue has more than semantic importance. Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U.S. military and to make sure that other countries do not take advantage of the purported RMA before we do. This book takes a more measured perspective. Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude. Some reorientation of U.S. defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions. But radical shifts in U.S. security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia.

**Explaining Contemporary Asian Military Modernization** Sheryn Lee, 2021-04-20 This book proposes a novel theoretical framework of interactive arming in order to explain armament dynamics in contemporary Asia. Frequently the modernisation of contemporary naval forces in Asia is described as an arms race with the underlying assumption being that weapons acquisitions and increases in defence expenditure are competitive and bilateral and due to conflicting purposes or mutual fears. This book argues that the concept of an arms race is an unsuitable one for explaining contemporary military modernisation in 21st century Asia. Instead it proposes a novel and innovative concept of interactive arming and argues that what drives conflict is political rivalry not weapons acquisitions. Instead of perceiving arming as abnormal behaviour the book

views arming as a natural strategic behaviour of states and military modernisation as a basic requirement for a state's ability to survive This book will be of much interest to students of Asian security strategic studies and international relations in general

**Contemporary Military Culture and Strategic Studies** Alastair Finlan, 2013-09-02 This book explores and compares the contemporary military cultures of the United States and the United Kingdom The last decade has witnessed astonishing global events from 9 11 and military operations in Afghanistan in the same year to the military intervention in Libya in 2011 Western military forces have been involved in all of these campaigns and have been engaged in continuous military operations for over ten years It is therefore now apt to focus a spotlight on the military cultures of these state based armed forces This book examines how contemporary American and British military culture is formed focusing explicitly on the six major military institutions The author dedicates a chapter to each of these institutions with each one sharing a unifying analytical framework These chapters explore the formation and sustenance of US UK military culture under the rubric of common themes that include social origins transformative events leaders approaches to war technology and contemporary identity To conclude the book considers the impact of the War on Terror on the military cultures of the US and UK as well as likely directions for the future This book will be of much interest to students of military studies strategic studies security studies and comparative politics

**Contemporary Military Theory** Jan Angstrom, J.J. Widen, 2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory that focuses wholeheartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies and defence studies

**Military Innovation in Türkiye** Barış Ateş, 2023-01-31 This book explores Turkish military innovation since the Cold War The major questions addressed are how Türkiye has been able to innovate the production of new weapon systems its philosophical background how the country overcame bureaucratic and economic obstacles and how these innovations resonated in military doctrine and organization Focusing on two main defense industry projects that trigger an overall change in the military doctrine and organization the text examines the innovative inclinations of the Turkish military realm and reveals the societal economic and political consequences of military innovation This book fills a gap in the literature by providing an interdisciplinary and

comprehensive overview of Turkish military innovation Contributors include those involved in and affected by the military innovation process as well as scholars who monitor the process using primary sources Military Innovation in Turkey will appeal to academics politicians and military professionals interested in understanding the evolution of the Turkish military

**Modern Military Strategy** Elinor C. Sloan, 2016-10-11 This textbook provides a comprehensive introduction to post Cold War military theory for students of strategic studies This second edition has been fully revised and updated including a new chapter on peacekeeping and examines contemporary strategic thought on the conduct of war in the sea land air nuclear space and cyber domains as well as irregular warfare Each chapter identifies contemporary strategic thinkers in a particular area examines strategic thought through the lens of identifiable themes and discusses the ideas of classical strategists to provide historical context Examples of the link between the use of military force and the pursuit of political objectives are presented such as airpower against ISIS and in Libya counterinsurgency in Afghanistan and Iraq counter piracy operations off the coast of Africa and the Stuxnet virus in Iran The chapters identify trends statements and principles that indicate how military power can best be employed to effect political ends while the conclusion paints an overall picture of the relationship between classic and contemporary strategic thinking within each warfare domain This book will be essential reading for students of strategic studies war studies and military history and is highly recommended for students of security studies and international relations in general

**Palgrave Advances in Modern Military History** Matthew Hughes, 2006-09-25 This book provides a concise and accessible introduction to modern military history The collection is a clear and up to date survey of the significant debates interpretations and historiographical shifts for a series of key themes in military history Each chapter is supported by notes and a brief bibliography outlining further reading

**Researching the Military** Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world It explores the historical social institutional and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy More than merely analyzing research experiences yet necessarily including them it is also about the experiences of researchers their position with regard to the object of their studies the institutional context where they work and the way their research impacts the academic and policy making fields in the respective countries The common theme to the various chapters is reflexivity a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface By collecting diverse experiences of researchers from across the world this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena This book will be of much interest to students of military studies research methods sociology social anthropology and security studies in general

**Strategy for Chaos** Colin Gray, 2004-08-02 The remit of this study is to encourage further studies that make an honest and successful effort to achieve synergy between social science and history when analysing the impact of revolutions in

military affairs RMAs      **Military Adaptation in Afghanistan** Theo Farrell, Frans Osinga, James A. Russell, 2013-07-17  
 When NATO took charge of the International Security Assistance Force ISAF for Afghanistan in 2003 ISAF conceptualized its mission largely as a stabilization and reconstruction deployment However as the campaign has evolved and the insurgency has proved to more resistant and capable key operational imperatives have emerged including military support to the civilian development effort closer partnering with Afghan security forces and greater military restraint All participating militaries have adapted to varying extents to these campaign imperatives and pressures This book analyzes these initiatives and their outcomes by focusing on the experiences of three groups of militaries those of Britain Canada Denmark the Netherlands and the US which have faced the most intense operational and strategic pressures Germany who s troops have faced the greatest political and cultural constraints and the Afghan National Army ANA and the Taliban who have been forced to adapt to a very different sets of circumstances      **The Information Revolution in Military Affairs in Asia** E. Goldman, T. Mahnken, 2004-07-22 The contributors to this volume seek to explore the multi dimensional institutional cultural technological and political environments of several Asian states to determine the amenability of those host environments for the adoption adaptation of the Revolution in Military Affairs RMS      **War Transformed** Mick Ryan, 2022-02-15 War Transformed The Future of Twenty First Century Great Power Competition and Conflict provides insights for those involved in the design of military strategy and the forces that must execute that strategy Emphasizing the impacts of technology new era strategic competition demography and climate change Mick Ryan uses historical as well as contemporary anecdotes throughout the book to highlight key challenges faced by nations in a new era of great power rivalry Just as previous industrial revolutions have advanced societies the nascent fourth industrial revolution will have a similar impact on how humans fight compete and build military power in the twenty first century After reviewing the principle catalysts of change in the security environment War Transformed seeks to provide a preview of the shape of war and competition in the twenty first century Ryan examines both the shifting character of war and its enduring nature In doing so he proposes important trends in warfare that will shape all aspects of human competition and conflict in the coming decades The remainder of the book analyzes how military institutions must prepare for future competition and conflict Competing and engaging in combat in this new era involves new and evolved strategies and warfighting concepts as well as adapting our current military organizations It will also demand building an intellectual edge in military personnel through evolved concepts of training education and development As the competitive environment and potential battlefields continue to change conceptions of combat competition and conflict must also evolve Mick Ryan makes the case for transforming how Western military institutions view war in this century      *Tokens of Power* Ann Hironaka, 2017-03-06 What motivates going to war This book reexamines how leaders make decisions based on appearances of power over military reality      *Military Health Care* Jomana Amara, Ann M. Hendricks, 2013-09-02 This edited volume surveys critical aspects of modern military health care in the US and various other

Western countries with troops in Iraq and Afghanistan In the United States the military medical system including care for veterans is large and diverse and involves two institutions the US Department of Defense DoD and the US Department of Veteran s Affairs VA Studying the system gives practitioners and policy makers an understanding of the larger picture of the military medical structure facilitating thought about some of the difficulties and opportunities for coordinating treatments and preparing for the future This book covers health care issues prior to deployment such as screening for mental health evaluating long term consequences of exposure to military service and provision of insurance care during a conflict primarily battlefield clinics battlefield trauma care and evacuation procedures and post combat care including serious war injuries psychiatric and long term care Bringing together research from a wide range of contributors the volume provides readers with an extensive up to date source of information on military medicine This book will be of great interest to students of public health military sociology the Iraq war US public policy and war and conflict studies in general **Military**

**Innovation in Small States** Michael Raska, 2015-11-06 This book provides a comprehensive assessment of the global diffusion of the Revolution in Military Affairs RMA and its impact on military innovation trajectories in small states Although the Revolution in Military Affairs RMA concept has enjoyed significant academic attention the varying paths and patterns of military innovation in divergent strategic settings have been overlooked This book seeks to rectify this gap by addressing the broad puzzle of how the global diffusion of RMA oriented military innovation the process of international transmission communication and interaction of RMA related military concepts organizations and technologies has shaped the paths patterns and scope of military innovation of selected small states In a reverse mode how have selected small states influenced the conceptualization and transmission of the RMA theory processes and debate Using Israel Singapore and South Korea as case studies this book argues that RMA oriented military innovation paths in small states indicate predominantly evolutionary trajectory albeit with a varying patterns resulting from the confluence of three sets of variables 1 the level of strategic organizational and operational adaptability in responding to shifts in the geostrategic and regional security environment 2 the ability to identify anticipate exploit and sustain niche military innovation select conceptual organizational and technological innovation intended to enhance the military s ability to prepare for fight and win wars and 3 strategic culture While the book represents relevant empirical cases for testing the validity of the RMA diffusion hypotheses from a policy oriented perspective this book argues that these case studies offer lessons learned in coping with the security and defence management challenges posed by military innovation in general This book will be of much interest for students of military innovation strategic studies defence studies Asian politics Middle Eastern politics and security studies in general
