Contested Grounds Essays On Nature Culture And Power:

Contested Grounds Amita Baviskar, 2008 Articles from a conference held at Kathmandu in 2003 **Vernacular Politics in Northeast India** Jelle J. P. Wouters, 2022 Nowhere in India is contemporary politics and visions of the political as diverse animated uncontainable and poorly understood as in Northeast India Approaching politics in the vernacular this book thinks itself afresh into the region's political life *From Urban National Parks to Natured Cities in the Global South* Frédéric Landy, 2018-07-20 This important volume focuses on the sensitive issue of interrelationships between national parks situated near or within urban areas and their urban environment It engages with both urban and conservation issues and compares four national parks located in four large cities in the global South Rio de Janeiro Cape Town Mumbai and Nairobi Though primarily undertaken as academic research the project has intensively collaborated with the institutions in charge of these parks The comparative structure of this volume is also original and unique each of the chapters incorporates insight from all four sites as far as possible The term naturbanity expresses the necessity for cities endowed with a national park to integrate it into their functioning Conversely such parks must take into account their location in an urban environment both as a source of heavy pressures on nature and as a nexus of incentives to support their conservation The principle of non exclusivity that is neither the city nor the park has a right nor even the possibility to negate the other's presence summarizes the main argument of this book Naturbanity thus blurs the old modern dichotomy of nature culture animals and human beings can often jump the physical and ideological walls separating many parks from the adjacent city The 13 chapters and substantive introduction of this volume discuss various aspects of naturbanity the histories of park creation interaction between people and parks urban governance and parks urban conservation models wildlife management environmental education and so on This is a must read for students and researchers interested in social ecology social geography conservation urban planning and ecological policy Development of Environmental Laws in India Kanchi Kohli, Manju Menon, 2022-02-03 Development of Environmental Laws in India highlights the dynamic nature of environmental law making in India between the judiciary the executive and the parliament This has led to the creation of a wide range of environmental institutions and bodies with varied roles and responsibilities The book contains a large volume of materials from the late 1990s which show a marked shift in the nature of environmental governance in India These materials offer an understanding of the contemporary debates in environment law in the context of India's economic liberalisation The materials are thematically organized and presented in an accessible manner The chapters contain definitions and specific clauses from the legal instruments and refer to court orders and judgements on these themes Law Against the State Julia Eckert, Brian Donahoe, Christian Strümpell, Zerrin Özlem Biner, 2012-05-24 This volume investigates the use of law by ordinary individuals and groups as a form of protest against the state **Other Geographies** Sharad Chari, Susanne Freidberg, Vinay Gidwani, Jesse Ribot, Wendy Welford, 2017-07-27 An international group of distinguished scholars pay homage to and build on

the work of one of the most influential thinkers of our time Michael Watts Shows how Michael Watts research writings teaching and mentoring have relentlessly pushed boundaries transforming his chosen field of geography and beyond Spans an array of topics including the political economy and ecology of African societies governmentality and territoriality in various Southern contexts food security cultural materialist expositions of capitalism modernity and development across the postcolonial world Builds on his legacy exploring its theoretical analytical and empirical implications and proposing exciting new possibilities for further exploration in the tracks of Watts

Finding Delhi Bharati Chaturvedi, 2010 About the Book About a city that has many hearts and many peripheries Delhi is a magnet for migrant workers students highly qualified professionals businessmen politicians The capital since 1911 it has now finally started looking and acting like India's No 1 city In the national imagination it is a city of wide roads flyovers the Metro markets and multiple opportunities But all this progress and the quest to become a world class city have also had an unsettling effect People have been pushed out of public spaces lakhs of slum dwellers have been banished and the Yamuna has been overwhelmed by sewage and industrial effluents Finding Delhi Loss and Renewal in the Megacity brings together many voices offering a kaleidoscopic view of Delhi It has essays on subjects such as the demolition of slums the factories that deal with the city's waste the campaigns for clean air and BRT corridors and the difficulties faced by women Also included are first hand accounts that reveal the travails of being a dhobi a garbage collector a fruit vendor and a maid in the megacity About the Author Bharati Chaturvedi is an environmentalist and writer based in Delhi She is a co founder of an NGO Chintan which works to increase environmental justice and reduce ecological footprints She writes a column for the Hindustan Times Earthwatch and blogs with the Huffington Post Bharati has a Master's degree in History from Delhi University and a Masters in International Public Policy from the School of Advanced International Studies Johns Hopkins University She is a writer and critic on contemporary art practice in India

Urban Navigations Jonathan Shapiro Anjaria, Colin McFarlane, 2013-02-01 This book provides an important account of how the city in South Asia is produced lived and contested It examines the diverse lived experiences of urban South Asia through a focus on contestations over urban space resources and habitation bringing together accounts from India Pakistan Nepal and Sri Lanka In contrast to accounts that attribute urban transformation mainly to neoliberal globalisation this book vividly demonstrates how neoliberalism functions as one of the many drivers of urban change This edited volume brings together an interdisciplinary and international range of established and emerging scholars working on the city in South Asia To date South Asian urban studies privilege a handful of cities particularly in India overlooking the great diversity as well as commonalities of urban experiences spanning the region Thus in addition to chapters on New Delhi Mumbai and Bangalore this volume contains critical urban chapters on less studied cities such as Lahore Islamabad Kathmandu Colombo and Dhaka The volume insists that a fresh look at contemporary changes in cities in South Asia requires careful consideration of the specificity of the city as well as a comparative perspective It provides a sense not only of the new

forms of urbanism emerging in contemporary South Asia but also sheds light on new theoretical possibilities and directions to make sense of transnational processes and urban change

Places of Nature in Ecologies of Urbanism

Anne Rademacher, K. Sivaramakrishnan, 2017-03-01 If twenty first century urbanization is understood as a problem its regional epicenter is the cities in Asia Facing unprecedented diversity in scale scope and environmental dynamics in the Asian urban experience scholars will need an approach that can truly capture the significance of place and context The challenge as this volume illustrates can be met by the analytic of ecologies of urbanism Eschewing a rigid single ecology the contributors identify multiple forms of nature in biophysical cultural and political terms that have discernable impact on power relations and human social action The case studies in this book including leopards in Mumbai a network of tubewells in northern India an island that grows through reclamation in Hong Kong and a railway continuum linking Khon Kaen and Bangkok all attest to the versatility of ecologies of urbanism Guided by urban processes rather than geopolitical boundaries Places of Nature in Ecologies of Urbanism offers a picture of urban Asia that is composed of varied ecologies of urbanism This intellectually adventurous work displays a deep cultural ethical sensibility in its close attention to geographically variegated forms of place making A first rate contribution to urban scholarship on Asia and beyond Vinay K Gidwani Department of Geography Environment and Society and Institute for Global Studies University of Minnesota This volume derives from a several year collaborative effort to bring scholars from different disciplines together to reflect on the constructed shifting and contested meanings of the forward slash separating Urban Natures The essays in this volume are bold rigorous original and sometimes even witty Without losing track of the intellectual genealogies that enable their collective effort the authors in Places of Nature in Ecologies of Urbanism give us new tools for imagining urban Asia s possible futures William Glover Department of History University of Michigan

The Violent Underpinnings of American Life Liam Downey, 2023-10-03 The Violent Underpinnings of American Life explains how sexual violence against women and police and political violence against Black people maintains social order and elite power in the United States

Regional Political Ecologies and Environmental Conflicts in India Sarmistha Pattanaik, Amrita Sen, 2022-11-07 This book focuses on the regional political ecologies RPEs of environmental conflicts in India It explores broadly landscape based analyses of political economic and social issues which impact environmental changes challenges and conflicts at local and micro local levels The chapters in this volume examine the intervention of different stakeholders in the management of various regional ecological landscapes in India including forests rivers canals creeks and wetlands The volume is an interdisciplinary endeavour weaving together contextual narratives through a combination of approaches from sociology anthropology geography political studies and environmental history Using such core approaches the book studies the place based dynamisms within the regional environmental conflicts in the selected conservation landscapes It provides empirical reflections on transboundary issues rural urban transitions middle class environmentalism identity conflicts decentralized natural resource management and the role of political

institutions Regional Political Ecologies and Environmental Conflicts in India will be of great interest to students and scholars of Political Ecology and South Asian Environmental Studies The Politics of Swidden farming Debojyoti Das,2018-09-28

The Politics of Swidden Farming offers a new explanation for the changes taking place in swidden farming practised in the highlands of eastern India through an ethnographic case study The book traces the story of agroecological change and state intervention to colonial times and helps understand contemporary agrarian change by contextualizing farming not just in terms of the science and technology of agriculture or conservation and biodiversity but also in terms of technologies of rule The Politics of Swidden Farming adds a new dimension to the underdeveloped literature on shifting cultivation in South Asia by focusing on the social ecology of farming and agrarian change in the hills It provides a comparative viewpoint to state centred and donor driven development in the frontier region by bringing in different actors and institutions that become the actants and agents of social change Environmental Security Rita Floyd,Richard Matthew,2013-01-04 Economic

development population growth and poor resource management have combined to alter the planet s natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations environment studies and human geography Beyond Colonialism, Development and Globalization Dominique Caouette,Dip Kapoor,2015-12-15 Development studies is in a state of flux A new generation of scholars has come to reject what was once regarded as accepted wisdom and increasingly regard development and globalization as part of a continuum with colonialism premised on the same reductionist assumption that progress and growth are objective facts that can be fostered measured assessed and controlled Drawing on a variety of theoretical

perspectives and approaches this book explores the ways in which social movements in the Global South are rejecting Western centric notions of development and modernization as well as creating their own alternatives By assessing development theories from the perspective of subaltern groups and movements the contributors posit a new notion of development from below one in which these movements provide new ways of imagining social transformation and a way out of the developmental dead end that has so far characterized post development approaches Beyond Colonialism Development and Globalization therefore represents a radical break with the prevailing narrative of modernization and points to a bold new direction for development studies

Unruly Hills Bengt G. Karlsson, 2011-05-01 The questions that inspired this study are central to contemporary research within environmental anthropology political ecology and environmental history How does the introduction of a modern capitalist resource regime affect the livelihood of indigenous peoples Can sustainable resource management be achieved in a situation of radical commodification of land and other aspects of nature Focusing on conflicts relating to forest management mining and land rights the author offers an insightful account of present day challenges for indigenous people to accommodate aspirations for ethnic sovereignty and development

Landlock Patrik Oskarsson, 2018-09-19 Landlock Paralyzing Dispute over Minerals on Adivasi Land in India explores the ways in which political controversy over a bauxite mining and refining project on constitutionally protected tribal lands in Andhra Pradesh descended into a state of paralysis where no productive outcome was possible Long running support for Adivasi or tribal land rights motivated a wide range of actors to block the project s implementation by recourse to India s dispersed institutional landscape while project proponents proved adept in proposing workarounds to prevent its outright cancellation In the ensuing deadlock the project was unable to move towards completion while marginalised Adivasi groups were equally unable to repossess their land Such a landlock is argued to be characteristic of India s wider inability to deal with conflicts over land matters despite the crucial importance of land for smallholder livelihoods and various economic processes in an intensely growth focused country The result has been frequent yet grindingly slow processes of contestation in which powerful business and state interests are at times halted in their tracks but mostly seem able to slowly exhaust local resistance in their pursuit of large scale projects that produce no benefits for the rural poor

Inequality, Democracy, and the Environment Liam Downey, 2015-12-18 Winner American Sociological Association Section on Environment and Technology Allan Schnaiberg Outstanding Publication Award The world currently faces several severe social and environmental crises including economic under development widespread poverty and hunger lack of safe drinking water for one sixth of the world s population deforestation rapidly increasing levels of pollution and waste dramatic declines in soil fertility and biodiversity and global warming Inequality Democracy and the Environment sheds light on the structural causes of these and other social and environmental crises highlighting in particular the key role that elite controlled organizations institutions and networks play in creating these crises Liam Downey focuses on four topics globalization agriculture mining and U S energy and

military policy to show how organizational and institutional inequality and elite controlled organizational networks produce environmental degradation and social harm He focuses on key institutions like the World Bank the International Monetary Fund the U S Military and the World Trade Organization to show how specific policies are conceived and enacted in order to further elite goals Ultimately Downey lays out a path for environmental social scientists and environmentalists to better understand and help solve the world s myriad social and environmental crises Inequality Democracy and the Environment presents a passionate expos of the true role inequality undemocratic institutions and organizational power play in harming people and the environment

The Coal Nation Kuntala Lahiri-Dutt, 2016-03-23 Social science research is emerging on a range of issues around large and small scale mining connecting them to broader social cultural political historical and economic factors rather than purely measuring the environmental impacts of mining Within this broader context of global scholarly attention on extractive industries this book explores two specific contexts the cultural politics of coal and coal mining within the context of one particular country India which is the third largest coal producer in the world Both contexts are special with its separate Ministry coal occupies pride of place in contemporary India shaping the energy future and influencing the economic and political milieu of the country The supremacy attributed to coal mining in contemporary India represents how coal nationalism has replaced coal colonialism in the country turning this commodity into an icon a national symbol In recent years the extraction of coal in forest covered resource peripheries has dispossessed and pauperised many tribal and rural communities who have used these resource rich lands for their livelihoods for generations The combustion of coal to produce electricity constitutes the compelling need and the factor that prevents the Indian state from fully engaging with the impending realities of a climate changed future All these reasons make the timing of this book of crucial importance In particular The Coal Nation explores the complex history of coal in India from its colonial legacies to contemporary cultural and social impacts of mining land ownership and moral resource rights protective legislation for coal as well as for the indigenous and local communities the question of legality illegitimacy and illicit mining and of social justice Presenting cutting edge multidisciplinary social science research on coal and mining in India The Coal Nation initiates a productive dialogue amongst academics and between them and activists

Contemporary Water Governance in the Global South Leila M. Harris, Jacqueline A. Goldin, Christopher Sneddon, 2015-03-24 The litany of alarming observations about water use and misuse is now familiar over a billion people without access to safe drinking water almost every major river dammed and diverted increasing conflicts over the delivery of water in urban areas continuing threats to water quality from agricultural inputs and industrial wastes and the increasing variability of climate including threats of severe droughts and flooding across locales and regions These issues present tremendous challenges for water governance This book focuses on three major concepts and approaches that have gained currency in policy and governance circles both globally and regionally scarcity and crisis marketization and privatization and participation It provides a historical and contextual overview of each of these

ideas as they have emerged in global and regional policy and governance circles and pairs these with in depth case studies that examine manifestations and contestations of water governance internationally The book interrogates ideas of water crisis and scarcity in the context of bio physical political social and environmental landscapes to better understand how ideas and practices linked to scarcity and crisis take hold and become entrenched in policy and practice The book also investigates ideas of marketization and privatization increasingly prominent features of water governance throughout the global South with particular attention to the varied implementation and effects of these governance practices The final section of the volume analyzes participatory water governance querying the disconnects between global discourses and local realities particularly as they intersect with the other themes of interest to the volume Promoting a view of changing water governance that links across these themes and in relation to contemporary realities the book is invaluable for students researchers advocates and policy makers interested in water governance challenges facing the developing world

Participopolis Karen Coelho, Lalitha Kamath, M. Vijayabaskar, 2020-11-29 While participatory development has gained significance in urban planning and policy it has been explored largely from the perspective of its prescriptive implementation This book breaks new ground in critically examining the intended and unintended effects of the deployment of citizen participation and public consultation in neoliberal urban governance by the Indian state The book reveals how emerging formats of participation as mandatory components of infrastructure projects public private partnership proposals and national urban governance policy frameworks have embedded market oriented reforms promoted financialisation of cities refashioned urban citizenship privileged certain classes in urban governance at the expense of already marginalised ones and thereby deepened the fragmentation of urban polities It also shows how such deployments are rooted in the larger political economy of neoliberal reforms and ascendance of global finance and how resultant exclusions and fractures in the urban society provoke insurgent mobilisations and subversions Offering a dialogue between scholars policy makers and activists and drawing upon several case studies of urban development projects across sectors and cities this volume will be useful for planners policy makers academics development professionals social workers and activists as well as those in urban studies urban policy planning political science sociology and development studies
