**Resolution** Soeren Keil, Elisabeth Alber, 2021-05-13 Looking at the growing use of federalism and decentralization as tools of

conflict resolution this book provides evidence from several case studies on the opportunities and challenges that territorial solutions offer when addressing internal conflicts within a variety of countries Federalism has been used as a tool of conflict resolution in a number of conflict situations around the world The results of this have been mixed at best with some countries moving slowly to the paths of peace and recovery while others have returned to violence This volume looks at a number of case studies in which federalism and decentralization have been promoted in order to bring opposing groups together and protect the territorial integrity of different countries Yet it is demonstrated that this has been incredibly difficult and often overshadowed by wider concerns on secession de and re centralization and geopolitics and geoeconomics While federalism and decentralization might hold the key to keeping war torn countries together and bringing hostile groups to the negotiation table we nevertheless need to rethink under which conditions territorial autonomy can help to transform conflict and when it might contribute to an increase in conflict and violence Federalism alone so the key message from all contributions cannot be enough to bring peace yet without territorial solutions to ongoing violence it is also unlikely that peace will be achieved The chapters in this book were originally published as a special issue of *Ethnopolitics* Lands of the Future Echi Christina Gabbert,Fana Gebresenbet,John G. Galaty,Günther Schlee,2021-01-15 Rangeland forests and riverine landscapes of pastoral communities in Eastern Africa are increasingly under threat Abetted by states who think that outsiders can better use the lands than the people who have lived there for centuries outside commercial interests have displaced indigenous dwellers from pastoral territories This volume presents case studies from Eastern Africa based on long term field research that vividly illustrate the struggles and strategies of those who face dispossession and also discredit ideological false modernist tropes like backwardness and primitiveness *Embedding Into Our Lives* Louis W. Leung,Anthony Y. H. Fung,Paul S. N. Lee,2009 No longer the exclusive domain of the wealthy the specialist or the enthusiast today the internet is available to almost anyone who desires to use it and has become an integral part of our everyday world The essays in this volume examine the effect of the online environment on our social lives via three analytical frameworks fit link and position They address the way in which the internet has become an entrenched part of our personal and professional world and a vital tool on which we are increasingly dependent The volume also explores the capacity of the Internet to embody our economic cultural and political position online *Library and Information Science in Developing Countries: Contemporary Issues* Tella, A.,2011-11-30 The field of library and information science is experiencing significant and continued transformation as a result of advancements in digital technology Adapting to new technologies is crucial for librarians and other information professionals but there exists a particularly acute gap in technology adoption among developing countries Library and Information Science in Developing Countries Contemporary Issues explores the relationship between global technology development and the impact of new technologies on library practice library education and information science Book chapters and case studies in this work provide insight to and support for practitioners and executives concerned with the management of knowledge information
