Contradictions of Capitalism

Marx's theory regarding capitalism is that it is a system beset by contradictions that are reflected in a propensity towards crisis and class conflict (Marx, 1975 [1866]). The source of this conflict, confirmed by generations of both Marxist and non-Marxist scholars, is an economic structure based on the capital-labour relation and the exploitation of workers by capitalists. The capitalist class is driven by the need to accumulate — to profit from the labour power of workers. The developmental dynamics of this relation of capital to labour, the driving force of capitalist development, are both structural and strategic. The structural dynamics of the system are manifest in conditions that are, as Marx argued, “independent of our will” and thus not of our own choosing and objective in their effects — an objectivity that accords with each individual's class position. The strategic or political dynamics of the capital-labour relation, the foundation of the social structure in capitalist societies, are reflected in class consciousness, basically a matter of workers becoming aware of their exploitation and acting on this awareness.

The Fundamental Contradictions of Capitalism

This is to say, the capitalist development process is driven forward by forces that are generated by fundamental contradictions¹ intrinsic to the system. These contradictions include the following:

1. Economic production is based on social cooperation — the contributions of all classes and members of society, but under capitalist

Economics, C.L.R. James's Notes on Dialectics John H. McClendon, 2005-01-01 John H McClendon III's CLR James's Notes on Dialectics Left Hegelianism or Marxism Leninism is the first ever book devoted exclusively to James's magnum opus Notes on Dialectics Hegel Marx Lenin The seed for this study was planted over thirty years ago when James handed the author his personal copy of Notes James's contribution to dialectical philosophy and his vast intellectual and scholarly output is rivalled only by the seemingly bottomless depths of McClendon's own analysis and erudition McClendon provides a thorough going critique of James's exploration into the dialectic of Hegel Marx and Lenin while challenging all the seminal texts on James's Notes A book of this magnitude is rare This is ever more the truth when it is focused on a giant like James who stands at the nexus of so many disciplines philosophy history sociology Caribbean studies cultural studies African and African American studies CLR James's Notes on Dialectics Left Hegelianism or Marxism Leninism is a must read for anyone concerned with how revolutionary theory is a guide to contemporary struggles

The Dangerous Class Clyde Barrow, 2020-10-19 Marx and Engels concept of the lumpenproletariat or underclass an anglicized politically neutral term appears in The Communist Manifesto and other writings It refers to the dangerous class the social scum that passively rotting mass thrown off by the lowest layers of old society whose lowly status made its residents potential tools of the capitalists against the working class Surprisingly no one has made a substantial study of the lumpenproletariat in Marxist thought until now Clyde Barrow argues that recent discussions about the downward spiral of the American white working class its main problem is that it is not working have reactivated the concept of the lumpenproletariat despite long held belief that it is a term so ill defined as not to be theoretical Using techniques from etymology lexicology and translation Barrow brings analytical coherence to the concept of the lumpenproletariat revealing it to be an inherent component of Marx and Engels analysis of the historical origins of capitalism However a proletariat that is destined to decay into an underclass may

pose insurmountable obstacles to a theory of revolutionary agency in post industrial capitalism Barrow thus updates historical discussions of the lumpenproletariat in the context of contemporary American politics and suggests that all post industrial capitalist societies now confront the choice between communism and dystopia

The Vitality of Contradiction Bruce

Gilbert,2013-12-01 In *The Vitality of Contradiction* Bruce Gilbert provides an exposition of Hegel's political philosophy to establish not only that societies fail because of their contradictions but also how the unsurpassable oppositions of social life cultivate freedom He moves beyond Hegel's works to consider the limits of liberal capitalism and the contemporary social movements around the world that stretch us beyond the global economic system Drawing on key Hegel texts such as *Phenomenology of Spirit* and the *Philosophy of Right* Gilbert shows how societies outgrow themselves as they come to recognize key aspects of freedom and justice He argues that the dialectic requires that we recognize how liberal capitalism has both cultivated freedom and yet fails to lead us to more sophisticated forms of freedom Gilbert also highlights organizations including Brazil's Movement of Landless Workers and the Mondragon cooperative in Spain and the sophisticated ways in which they are teaching the world new and better ways to be free Engaging and perceptive *The Vitality of Contradiction* illuminates the basic principles behind Hegel's political thought and indicates the ways in which his work encourages people to strive for a form of socialist democracy
