The Mathematical Legacy of Srinivasa Ramanujan M. Ram Murty,V. Kumar Murty,2012-10-05 Srinivasa Ramanujan was a mathematician brilliant beyond comparison who inspired many great mathematicians There is extensive literature available on the work of Ramanujan But what is missing in the literature is an analysis that would place his mathematics in context and interpret it in terms of modern developments The 12 lectures by Hardy delivered in 1936 served this purpose at the time they were given This book presents Ramanujan s essential mathematical contributions and gives an informal account of some of the major developments that emanated from his work in the 20th and 21st centuries It contends that his work still has an impact on many different fields of mathematical research This book examines some of these themes in the landscape of 21st century mathematics These essays based on the lectures given by the authors focus on a subset of Ramanujan s significant papers and show how these papers shaped the course of modern mathematics

Collected Papers of Srinivasa Ramanujan Srinivasa Ramanujan Aiyangar,2000 The influence of Ramanujan on number theory is without parallel in mathematics His papers problems and letters have spawned a remarkable number of later results by many different mathematicians Here his 37 published papers most of his first two and last letters to Hardy the famous 58 problems submitted to the Journal of the Indian Mathematical Society and the commentary of the original editors Hardy Seshu Aiyar and Wilson are reprinted again after having been unavailable for some time In this the third printing of Ramanujan s collected papers Bruce Berndt provides an annotated guide to Ramanujan s work and to the mathematics it inspired over the last three quarters of a century The historical development of ideas is traced in the commentary and by citations to the copious references The editor has done the mathematical world a tremendous service that few others would be qualified to do

NEP-2020: Conception of a modern Knowledge Society RAJ SHREE

DHAR,2023-07-01 The education system must be abreast of the latest technological developments and marvels Education institutions are the places and spaces where the consumption and production of knowledge benefits humanity by focusing on the most pressing problems of the planet Sri Aurobindo had very aptly declared that the teacher is a helper and a guide whose business is to suggest and not to impose Just as all biological and social systems continually evolve higher education institutions must also learn to evolve by reflecting on how best they can help solve the world s most challenging problems and by serving as places for life long and life wide learning Much of the nation s future depends on its system of education Humans are the only mammals to have fully opposable thumbs and this feature allows them to climb grasp and throw objects develop and manipulate tools and work with fine motor skills as well as allowing for advanced communication like writing As a result not only have humans become the most dominant species on the planet but they have also become by far its most intelligent imaginative adaptable and resourceful specie The change towards a sustainability mindset is important because humanity is facing unparalleled challenges brought about by human induced actions and also because humans have only one planet to call home Humans must rethink their relationship to the planet and to each other Human solidarity lies in the fact that we are part of the same human race and as such we must learn to work together for the welfare of our planet and the survival of our species A significant impact of the pandemic on higher education is the way it shifted the view of the role of socio emotional learning The psychological toll the pandemic took on young people especially due to isolation dislocation and the death and illness of loved ones has heightened the awareness around the importance of psychosocial care For many years the higher education community has recognized the importance of the so called soft skills that underpin employability such as creativity grit problem solving and empathy Such skills also help students to live gratifying personal lives and enhance

their overall mental health and emotional resilience so we must not make the mistake of appreciating these skills as mere tools for securing and keeping jobs The present book is a collection of my articles published over the last couple of years with the aim to disseminate the necessary knowledge in bringing about relevant changes in our education system Lastly this book would be failing in its purpose if I don't express the debt I owe to my parents Mrs Raj Mohini Dhar and Late Mr Triloki Nath Dhar who instilled in me the interest and the zest to pursue writing and always offered me their immensely valuable observations on knowledge education life cosmos and other fascinating matters Special thanks are due to Apoorva and Aayushree for their continued expression of love support and inspiration
