Spheres of Injustice Bruno Perreau,2025-04-08 How minority issues concern all of us and why a new conception of justice grounded in solidarity can revitalize democracy How can the rights of minorities be protected in democracies The question has been front and center in the US since the Supreme Court s repeal of affirmative action In Europe too minority politics are being challenged Reactionary groups abuse the notion of minority by demanding to be protected just as minorities are while the notion of a protected class risks encouraging competition among minorities Also in the age of algorithms the very concept of minority is being transformed the law of averages is replacing that of the greater number In *Spheres of Injustice* Bruno Perreau shows how can we revitalize minority politics and make the fight against discrimination beneficial for all Perreau proposes thinking about minority experiences relationally How one person is governed has a direct impact on how another is Legal provisions that protect gender can be used to protect race those that protect disability can protect age sexual orientation or class and so on This is what Perreau calls intrasectionality a new concept and an innovative legal strategy which builds on the idea of intersectionality This book takes up many concrete cases discrimination at work and access to healthcare new techniques of deliberation innovative teaching practices etc and connects them to the history of minority movements the sociology of violence and contemporary theories of justice Updating one of the greatest classics of political theory *Spheres of Justice A Defense of Pluralism and Equality* by Michael Walzer Perreau shows that minority presence can teach new forms of responsibility to one another and that the resonances between experiences of injustice much more than a belief in shared moral principles ground a political community

[African Intellectuals and Decolonization](#) Nicholas M. Creary,2012-10-04 Decades after independence for most African states the struggle for decolonization is still incomplete as demonstrated by the fact that Africa remains associated in many Western minds with chaos illness and disorder African and non African scholars alike still struggle to establish the idea of African humanity in all its diversity and to move Africa beyond its historical role as the foil to the West As this book shows Africa s decolonization is an ongoing process across a range of fronts and intellectuals both African and non African have significant

roles to play in that process The essays collected here examine issues such as representation and retrospection the roles of intellectuals in the public sphere and the fundamental question of how to decolonize African knowledges African Intellectuals and Decolonization outlines ways in which intellectual practice can serve to de link Africa from its global representation as a debased subordinated deviant and inferior entity Contributors Lesley Cowling University of the Witwatersrand Nicholas M Creary University at Albany Marlene De La Cruz Ohio University Carolyn Hamilton University of Cape Town George Hartley Ohio University Janet Hess Sonoma State University T Spreelin McDonald Ohio University Ebenezer Adebisi Olawuyi University of Ibadan Steve Odero Ouma University of Nairobi Oyeronke Oyewumi State University of New York at Stony Brook Tsenay Serequeberhan Morgan State University

The Ethics of Listening Elizabeth S. Parks, 2018-11-16 There are ways of being in the world that create a flourishing life and other ways that restrict that life both for ourselves and others Listening is one of these ways of being Listening gives shape to speaking inviting other people into a dialogue that impacts our everyday lives Our acts of listening like all communication are shaped by our cultural and individual differences Unfortunately as people consider ways to ethically listen they often abide by a set of conversational rules that do not reflect or benefit their own or others unique contexts and communities In this book Parks responds to gaps in scholarship related to listening in communication research and difference in ethics scholarship Rather than imposing a rigid ethical norm that is unresponsive to diverse cultural practices her proposed listening ethic is one that is highly contextualized and pluralistic and yet dares to make normative

claims Using discourse research methods that are both qualitative and quantitative Parks goes beyond describing what listening is in a given context to what ethical listening should be Empirical findings about listening from multiple communities that represent diverse ethnic gender and disability orientations are interwoven with insights from communication ethics to develop the first ever dialogic ethics of listening that is empirically based culturally grounded and normative Ten shared values emerge as guidelines for good listening in this ethic be open cultivate understanding practice authenticity engage in critical thinking invest in relationship care for the dialogue focus on what matters be intentionally present remember the ongoing story and be responsive to need These values while shared across cultures may be expressed in a diverse and sometimes conflicting communicative practices Ultimately Parks proposes that ethical listening is best conceptualized as pursuit of sustainable hospitality in our dialogic interactions within and across difference By understanding the ways that different people share listening values yet practice them differently we can learn to trust each other and attest to the hope that ethical dialogue is possible

Mediation Ethics Rachael Field, Jonathan Crowe, 2020-05-29 Traditional ideas of mediator neutrality and impartiality have come under increasing attack in recent decades There is however a lack of consensus on what should replace them Mediation Ethics offers a response to this question developing a new theory of mediation that emphasises its nature as a relational process
