The Big Lies of School Reform Paul C. Gorski, Kristien Zenkov, 2014-03-14 The Big Lies of School Reform provides a critical interruption to the ongoing policy conversations taking place around public education in the United States today By analyzing the discourse employed by politicians lobbyists think tanks and special interest groups the authors uncover the hidden assumptions that often underlie popular statements about school reform and demonstrate how misinformation or half truths have been used to reshape public education in ways that serve the interests of private enterprise Through a thoughtful series of essays that each identify one lie about popular school reform initiatives the authors of this collection reveal the concrete impacts of these falsehoods from directing funding to shaping curricula to defining student achievement Luminary contributors including Deborah Meier Jeannie Oakes Gloria Ladson Billings and Jim Cummins explain how reform movements affect teachers and administrators and how widely accepted mistruths can hinder genuine efforts to keep public education equitable effective and above all truly public Topics covered include common core standards tracking alternative paths to licensure and the disempowerment of teachers unions Beyond critically examining the popular rhetoric the contributors offer

visions for improving educational access opportunity and outcomes for all students and educators and for protecting public education as a common good *Self-Determination and the Social Education of Native Americans* Guy B. Senese, 1991-06-19

Self determination a crucial conceptual development in American Indian social and educational policy and the force behind current Indian policy programs is critically analyzed in this volume by a scholar educator who has worked closely with Native Americans Guy B Senese explores the wide gulf between the rhetoric and the reality of self determination in contemporary Native American education an area that has received little scrutiny by students of American education policy Senese contends that many aspects of Native American self determination policy work against the full realization of that policy and are in fact contradictory Arguing that self determination is not a unified coherent policy moving toward more community and tribal self government and economic self help Senese makes a strong case for his theory that the policy has been a vehicle to promote a smooth transition toward a termination of the tribal federal relationship This book is an excellent addition to the developing literature that questions the pluralist assumptions of the late twentieth century liberal progressive social policy Each of the volume s three parts addresses a basic assumption of Native American social education policy Part I shows how self determination policy grew as a response to the moral requirements of reservation development in a political climate of American patriotism Part II shifts the focus more directly to schooling including a discussion of the concept of community control and the 1975 Self Determination and Educational Assistance Act The concluding section analyzes the dialogue that resulted from the fragmentation of Native Americans who were divided over the meaning of self determination How the concepts of trust and sovereignty have created grounds for the expropriation of the meaning of self determination is also explored This volume s analysis of American Indian social and educational policy makes it required reading in the areas of Ethnic Studies Educational Policy Studies Ethnohistory and Sociology of Education The work is an important addition to the Education and Ethnic Studies collections of public and university libraries
