Sustainable Societies: Transition from theories to practice Sethi, Mahendra, 2022-01-17 The national economic situation rapidly changing societies increasing environment pollution amidst global warming around us are some of the most burning topics in day to day discussions news and scholarly discourses What we see are only the consequences of protracted actions policies and decisions The issues associated with these phenomena are highly complex that challenge a direct interpretation of their root causations indications results and long term impacts For instance is the issue of managing natural resources for industry business operations within a country an economic problem Or is it an ecological one Or rather a social one Could it be resolved with theories and techniques of either of these fields Well the issue and its redressal requires a combination of all the three disciplines And yet actions to integrate all of these fields have typically by passed one or more The framework that has over the years most commonly explained the convergence of different spheres of disciplinary knowledge has been sustainability At the same time its pursuit in practice the dominant public perception political agendas and the mainstream media remains elusive In absence of a critical theory on sustainable societies the contemporary development model is misinformed by vague notions of greening green growth eco development ecotourism smart cities etc largely steered by corporates and vested business groups The contemporary societies exist and continue to develop without genuine knowledge about sustainability that lies fragmented in its contributing disciplinary streams This book unfolds the inherent dilemmas contradictions and

paradoxes within the current sustainability paradigm to form a rather nuanced and inside view of what constitutes sustainability and how it could be realized with socio technical institutional policy and management solutions In the process the research comprehensively reviews about a hundred environmental social and economic theories to deliberate on the way forward Considering that sustainability is a politico economic and socio cultural challenge the transitions need to be culturally diverse and inter generational requiring infusion of fresh values messaging and leadership while conserving traditional knowledge prevailing institutions The book culminates with a transition architecture bearing policy recommendations for governing without governmentality with plausible regulatory instruments capacitating mechanisms planning and voluntary measures that can be implemented in practice Die nationale wirtschaftliche Situation sich schnell verändernde Gesellschaften die zunehmende Umweltverschmutzung inmitten der globalen Erwärmung um uns herum sind einige der brennendsten Themen in täglichen Diskussionen Nachrichten und wissenschaftlichen Diskursen Was wir sehen sind nur die Folgen langwieriger Handlungen Richtlinien und Entscheidungen Die mit diesen Phänomenen verbundenen Fragen sind hochkomplex die eine direkte Interpretation ihrer Ursachen Indikationen Ergebnisse und langfristigen Auswirkungen herausfordern Ist zum Beispiel die Bewirtschaftung natürlicher Ressourcen für Industrie und Geschäftsbetriebe innerhalb eines Landes ein wirtschaftliches Problem Oder ist es ein ökologisches Oder eher ein soziales Könnte es mit Theorien und Techniken eines dieser Gebiete gelöst werden Nun das Problem und seine Abhilfe erfordert eine Kombination aller drei Disziplinen Und dennoch haben Maßnahmen zur Integration all dieser Felder in der Regel eines oder mehrere umgangen Der Rahmen der im Laufe der Jahre am häufigsten die Konvergenz verschiedener Bereiche des disziplinären Wissens erklärt hat war Nachhaltigkeit Gleichzeitig bleibt ihre Verfolgung in der Praxis die vorherrschende öffentliche Wahrnehmung die politischen Agenden und die Mainstream Medien schwer fassbar In Ermangelung einer kritischen Theorie zu nachhaltigen Gesellschaften wird das zeitgenössische Entwicklungsmodell durch vage Vorstellungen von Ökologisierung grünem Wachstum ökonomische Entwicklung Ökotourismus Smart Cities usw die größtenteils von Unternehmen und Konzernen gesteuert werden falsch informiert Die zeitgenössischen Gesellschaften existieren und entwickeln sich weiter ohne echtes Wissen über Nachhaltigkeit das in seinen disziplinären Strömungen zersplittert ist Dieses Buch entfaltet die inhärenten Dilemmata Widersprüche und Paradoxien innerhalb des aktuellen Nachhaltigkeitsparadigmas um eine eher nuancierte Innenansicht dessen zu schaffen was Nachhaltigkeit ausmacht und wie sie mit soziotechnischen institutionellen politischen und Managementlösungen realisiert werden könnte Dabei beruht die Forschung umfassend etwa hundert Umwelt Sozial und Wirtschaftstheorien um über das weitere Vorgehen nachzudenken Angesichts der Tatsache dass Nachhaltigkeit eine politisch ökonomische und soziokulturelle Herausforderung ist müssen die bergange kulturell vielfältig und generationen bergreifend sein was die Einführung neuer Werte Botschaften und Führung erfordert während traditionelles Wissen und vorherrschende Institutionen erhalten bleiben Das Buch gipfelt in einer bergangsarchitektur mit Politikempfehlungen für ein Regieren ohne

Seeking a City with Foundations David W. Smith, 2019-03-31 More than half the people in the world live in cities including a growing number of megacities with populations exceeding ten million people This trend means that an understanding of urbanization must be an urgent priority for Christian theology and mission across the globe This updated edition of *Seeking a City with Foundations* with an additional chapter explores Christian responses to the city ranging from rejecting the urban as evil to embracing it as being central to God's redemptive purposes Drawing from a wide range of disciplines including history social science urban planning and the history of art readers are given a detailed text which confronts the challenges that contemporary urbanization presents to world Christianity Looking at urbanism as a theme throughout Scripture culminating with the great vision of the New Jerusalem David Smith explains that God's own future is revealed as urban highlighting the need to identify modern day idols as we share the gospel in cities and acknowledge the impact of global economic forces The book also explores the causes of what has been called the divided city and traces the urban theme through the Bible to present an alternative vision of the urban future a future in which the injustices in ever growing slums and a crisis of meaning among the privileged might be overcome through the power of the reconciling message of the cross This timely book proposes a way forward for urban mission highlighting that transformation of our cities must be the focal point of Christian mission and hope
