Community Design A Team Approach To Dynamic Community Systems Cities And Planning:

Community Design W. Arthur Mehrhoff, 1999-06-10 Community design has grown in importance in the public policy agenda over the past decade This book focuses on the author s experience and work in Minnesota where a design team of architects planners and economic and community development practitioners provided planning and design assistance to local communities The book explores the advantages of a systems approach to community design and uses the work of the Minnesota team to consider the issues involved in the implementation of successful community design **Multimedia**

Explorations in Urban Policy and Planning Leonie Sandercock, Giovanni Attili, 2010-04-10 The book is a collection of essays exploring the potential of multimedia to enrich and transform the planning field By multimedia the authors refer to a broad range of new information and communication technologies from film and video to digital ethnography and the internet which are opening up new possibilities in planning practices processes pedagogy and research The authors document the ways in which these ICTs can expand the language of planning and the creativity of planners can evoke the lived experience the spirit memories desires of our 21st century mongrel cities by engaging with stories and storytelling and can democratise planning practices The text is epistemologically radical in presenting an argument for the importance of multiple languages ways of knowing in the planning field and making the connection between this epistemology and the almost infinite potential of Multimedia to provide varied tools to accomplish this transformation displacing the supremacy of the rational linear and hierarchical with more open playful and imaginative approaches Each of the authors brings practical experience with different forms of Multimedia use and reflects on the different potentialities offered by Multimedia for critical intervention in urban and regional issues and the power dynamics embedded in such interventions Neighbors and Neighborhoods
