Community Impact Evaluation Nathaniel Lichfield, 1996 This is a work summarizing in one volume the pioneering approach of the author to public interest decision taking in the field of urban regional planning This book is aimed at students researchers and professionals in planning Nathaniel Lichfield first introduced in his *Economics of Planned Development* the concept that in any use and development of land the traditional development balance sheet of the developers needed to be accompanied by a planning balance sheet prepared by the planning officer or planning authority Over the forty years since this work was published the author has brought to the operational level the planning balance sheet with many case studies primarily for consultancy purposes The present title reflects the incorporation during the 1970s of the then emerging field of environmental impact assessment

Science of Valuations Salvatore Giuffrida, Maria Rosa Trovato, Paolo Rosato, Enrico Fattinnanzi, Alessandra Oppio, Simona Chiodo, 2024-04-16 This volume collects the best papers presented at the 2019 Conference SIEV Italian Society of Appraisal and Valuation on the Science of Evaluation foundations actuality and prospects The book consists of twenty six papers and is organized into four parts the first one collects reflections on the nature of the value judgement on the truth of the evaluative statement and on the authenticity its contents the values the next three present operational experiences in the three fields of natural urban and cultural heritage where the knowledge of the value of the human space supports decisions and policies highlighting feature concerning value and valuations in the dialectic between earth and the city the value bearers between heuristic and normatively the role of valuation for the complementarity of rules and creativity The book is being published in the midst of the new radical transformations of the equilibrium between social system and environment generated by the serious and unexpected crises of the third decade of this century Reflections on the reality that fills evaluative statement with truth the reality of values is more topical than ever in a historic phase in which the role of democracies and the destiny of civil coexistence is called into question claiming the order of unamendable values like truth justice and beauty The book brings together experiences that focus on the intentional evaluative consciousness as a condition for the responsibility of the subject individual and collective concerning the saliences and urgencies most significantly contributing to the formation of orderly communities

Smart and Sustainable Planning for Cities and Regions Adriano Bisello, Daniele Vettorato, Pierre Laconte, Simona Costa, 2018-04-25 This book comprises a selection of the top contributions presented at the second international conference Smart and Sustainable Planning for Cities and Regions 2017 held in March 2017 in Bolzano Italy Featuring forty six papers by policy makers academics and consultants it discusses current groundbreaking research in smart and sustainable planning including the progress made in overcoming cities challenges towards improving the quality of life Climate change adaptation and

mitigation of global warming generally identified as drivers of global policies are just the tip of the iceberg when it comes to smart energy transition. Indeed, equally relevant towards this current transformation and key topics in this volume are ICTs, public spaces and society, next economy for the city, strategies and actions for good governance, urban rural innovation, rethinking mobility. The book's depth in understanding and insightfulness in rethinking demonstrate the breaking of new ground in smart and sustainable planning. A new ground that policy makers, academics and consultants may build upon as a bedrock for smart and sustainable planning.

Understanding and Implementing Sustainable Development Lawrence Wai-chung Lai, Frank T. Lorne, 2003. In the beginning of this new century when able people in science across the world are working on scientific methods of providing sustainable development specific to their own countries or general to the world, it is also timely to remind ourselves that technology may not be the answer to everything. Technology by itself produces only summary statements on how physical entities in the world are related. It does not provide methods of how human inputs are to be used in combining the technology in generating outputs. It also does not address issues on how the outputs of the combination of technology and human resources ought to be valued. Lastly, it does not address how existing technologies can be combined, further modified, and the institutional environment for continuous experiments and improvements. This book brings together a collection of essays attempting to capture these interactions for the purpose of promoting sustainable development. By theoretical discussions and by case studies, the essays describe how environmental concerns can be or have been addressed to in the process of development in different institutional settings. The knowledge coming out of this research suggested a proposition loud and clear to researchers now working on the concept of sustainable development. The authors describe how the concept of sustainable development can be implemented. The quest for sustainable development is not the monopoly of secular or positivist inquiry. The authors offer insights into the material means and framework by which sustainability as a normative concept can be rendered operational for those who accept voluntary transactions as the basis of social interactions.

New Money in Rural Areas Nick Gallent, Iqbal Hamiduddin, Meri Juntti, Nicola Livingstone, Phoebe Stirling, 2018-07-09. This book examines the flow of investment into rural land assets in Europe, particularly farmland, woodland, and wineries, but extending also to leisure uses such as golf courses and theme parks. It explores the characteristics of investors in rural land and their motivations before undertaking an analysis of the place impacts of investment, viewing new money as a potential development opportunity delivering a variety of outcomes for local landscapes and communities. After providing introductory insights into rural land investment and the measurement of associated impacts, ten case studies from different European locations explore actual investment motives and local impacts. The book concludes with a synthesis of investment experiences and an assessment of the transformative changes brought to rural areas by the flow of new money.
