Community Society Gemeinschaft Und Gesellschaft:

Community and Society Ferdinand Tönnies, C.P. Loomis, 2017-07-12 This extraordinary prescient work by Ferdinand Tönnies was written in 1887 for a small coterie of scholars and over the next fifty years continued to grow in importance and adherents Its translator into English Charles P Loomis well described it as a volume which pointed back into the Middle Ages and ahead into the future in its attempt to answer the questions What are we Where are we Whence did we come Where are we going If the questions seem portentous in the extreme the answers Tönnies provides are modest and compelling Every major field from sociology to psychology to anthropology has found this to be a praiseworthy book The admirable translation by Professor Loomis did much to transfer praise for the Tönnies text from the German to the English speaking world Now outfitted with a brilliant new opening essay by John Samples the author of a recent full scale biographical work on Tönnies *Community and Society* is back in print a welcome reminder of the glorious past of German social science

Löwy,2023-11-21 On the 100th anniversary of the publication of History and Class Consciousness a new edition of this indispensable guide to Lukacs s thought and politics The philosophical and political development that converted Georg Lukacs from a distinguished representative of Central European aesthetic vitalism into a major Marxist theorist and Communist militant has long remained an enigma In this this now classic study Michael Löwy for the first time traced and explained the extraordinary mutation that occurred in Lukacs s thought between 1909 and 1929 Utilizing many as yet unpublished sources Löwy meticulously reconstructed the complex itinerary of Lukacs s thinking as he gradually moved towards his decisive encounter with Bolshevism The religious convictions of the early Lukacs the peculiar spell exercised on him and on Max Weber by Dostoyevskyan images of pre revolutionary Russia the nature of his friendships with Ernst Bloch and Thomas Mann were amongst the discoveries of the book Then in a fascinating case study in the sociology of ideas Löwy showed how the same philosophical problematic of Lebensphilosophie dominated the intelligentsias of both Germany and Hungary in the pre war period yet how the different configurations of social forces in each country bent its political destiny into opposite directions The famous works produced by Lukacs during and after the Hungarian Commune Tactics and Ethics History and Class Consciousness and Lenin were analysed and assessed A concluding chapter discussed Lukacs s eventual ambiguous settlement with Stalinism in the thirties and its coda of renewed radicalism in the final years of his life In this new edition Löwy has added a substantial new introduction which reassess the nature of Lukacs s thought in the light of newly published

texts and debates Community and Society Ferdinand Tönnies,1964 **Sociology for Social Workers and Probation Officers** Vivienne E. Cree,2012-10-12 How does a social work student make the connection between sociological knowledge and day to day social work procedures Sociology for Social Workers provides an introduction to sociological ideas and research and places it firmly into the context of social work practice It takes the issues that sociology addresses and uses them to show how social work can be better informed and improved Each chapter provides full referencing so that students and social work practitioners can follow up on primary sources to pursue and develop the most useful specific themes and ideas **The Community in Urban Society** Larry Lyon,Robyn Driskell,2011-12-16 The community is more than an abstract object of theoretical inquiry It is also a place where people live It is difficult to determine where community research and theory merge because the community is a unique place where theory and the real world come together Local conditions change and new research techniques emerge In the second edition of *The Community in Urban Society* the authors solve this problem by distilling the historic and foundational theories of community applying traditional approaches typology ecology systems theory and conflict theory to current conditions and exploring new and relevant theories that impact today's communities The latest edition also examines recent and emerging technologies that facilitate examination and evaluation of the modern community condition Updated coverage includes topics such as New Urbanism modern network analysis methods the urban political economy approach to community the growth machine approach GIS mapping recent holistic studies cyberspace communities and up to date discussions of community indicator studies quality of life community power and regime politics *The Neighborhood in the Internet* John M. Carroll,2014-07-30 Today community seems to be everywhere At home at work and online the vague but comforting idea of the community pervades every area of life But have we lost the ability truly to understand what it means *The Neighborhood in the Internet* investigates social and civic effects of community networks on local community and how community network designs are appropriated and extended by community members Carroll uses his conceptual model of community to re examine the Blacksburg Electronic Village the first Web based community network applying it to attempts to sustain and enrich contemporary communities through information technology The book provides an analysis of the role of community in contemporary paradigms for work and other activity mediated by the Internet It brings to the fore a series of design experiments investigating new approaches to community networking and addresses the future trajectory and importance of community networks This book will be of interest to students of sociology community psychology human computer interaction information science and computer supported collaborative work **Contested Worlds** Martin Phillips,2017-09-29 *Contested Worlds* provides an introduction both to a multitude of geographical worlds which are currently being actively constructed and contested and to a range of different perspectives on these worlds being adopted and contested by geographers It is unique in its focus on the role of contestation in both the construction of geographical studies and in the geographies these studies seek to address These issues are

explored through a combination of general theoretical discussion and detailed international case studies The areas discussed range in scale from the global through the regional and national to the local worlds of the inner city the neighbourhood and the village with connections drawn between these scales The book concludes that geography is being made in quite different ways It asserts that geography is intrinsically a contested enterprise and that this should be embraced as part of geographers becoming more critically involved in the making and studying of new contemporary human geographies
