philosophy politics and technology Nature Writing Don Scheese,2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese s personal observations of natural settings sharpen the reader s understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer s work exemplifies the pastoral tradition and celebrate a spirit of place in the United States **The Paradise of God** Norman Wirzba,2003-09-11 And God said Let us make man in our image after our likeness and let them have dominion over the fish of the sea and over the fowl of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth Gen 1 26 It has become a commonplace that Biblical religion bears a heavy share of responsibility for our destruction of the environment and this passage from the King James version of the Bible exemplifies what is generally believed to be the Biblical attitude toward the earth In this provocative book however Norman Wirzba argues that the doctrine of creation when understood as a statement about the moral and spiritual meaning of the world actually holds the key to a true understanding of our place in the environment and our responsibility toward it Wirzba contends that an adequate response to environmental destruction depends on a new formulation of ourselves as part of a created whole rather than as autonomous unencumbered individuals Drawing on the work of biblical scholars ecologists agrarians philosophers theologians and cultural critics Wirzba develops a comprehensive worldview that grows out of the idea that the world is God s creation While the text of Genesis has historically encouraged a vision of persons as masters of creation a more theologically and ecologically sensitive rendering he says would be to say that we are servants of creation Our present culture Wirzba believes results from a denial of creation that has caused modern problems as diverse as rootlessness individualism careerism boredom and consumerism The recovery of the meaning of creation can lead to a renewed sense of human identity and vocation and happier more peaceful lives He concludes by offering practical advice for individuals who wish to begin the work of transformation and renewal Moving beyond the usual political debates **The Paradise of God** presents a compelling vision of a new religious environmentalism **Environmental Ethics** Gregory Bassham,2020-12-04 **Environmental Ethics** provides an accessible lively and up to date introduction to the central issues and controversies in environmental ethics Requiring no previous knowledge of philosophy or ethical theory the book will be of interest to students environmental scientists environmental policy makers and anyone curious to know what philosophers are saying today about the urgent environmental challenges we face The book is divided into two parts Part One deals with theoretical issues in environmental philosophy examining a variety of ethical and environmental theories that provide diverse and thought provoking perspectives on critical ecological issues Part Two turns to applied environmental ethics addressing current debates on topics such as climate change biodiversity loss wilderness preservation responsibilities

Thinking Like a Planet J. Baird Callicott, 2014-01-06 Bringing together ecology evolutionary moral psychology and environmental ethics J Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh more optimistic approach Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm in Stephen Gardiner s words Callicott refuses to accept this view Instead he encourages us to look to the Earth itself and consider the crisis on grander spatial and temporal scales as we have failed to in the past Callicott supports this theory by exploring and enhancing Aldo Leopold s faint sketch of an Earth ethic in *Some Fundamentals of Conservation* in the Southwest a seldom studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength

Encyclopedia of Literature and Science Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they re different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as

having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading
