Juridical Perspectives between Islam and the West Federico Lorenzo Ramaioli, 2024-01-01

This comparative philosophy of law book aims at formulating a new analytical approach to the Islamic legal tradition based on juridical categories a concept that facilitates comprehension and understanding of juridical phenomena Building upon legal

comparativism and legal pluralism this project intends to avoid bias caused by universalizing Western categories when analyzing foreign juridical notions which inevitably results in the miscomprehension of non Western ideas and institutions Unlike existing literature this project will not focus on substantive comparisons between normative contents but on the juridical perspectives that helped to shape the Islamic and Western legal orders The book focuses on the most relevant juridical questions regarding the Islamic and Western legal perspectives such as the different visions regarding juridical spatiality the role of human reason and the relationship between law man and the divinity While contributing to legal philosophy this work intends also to develop and define a new interdisciplinary approach aiming to provide a starting point for novel analyses in research fields such as legal comparativism legal pluralism and constitutional law Finally by formulating a new interdisciplinary approach it will provide a foundational discussion of a continuously evolving subject that will never be exhaustively explored As such it aims at broadening scholarly reflections on the relationship between the West and Islam eventually placing these concepts within a suitably comprehensive and contextualized framework Published in cooperation with gLAWcal Global Law Initiatives for Sustainable Development Hornchurch Essex United Kingdom Crime in Japan Laura Bui, David P. Farrington, 2019-04-03 This book reviews research on psychology and crime in Japan and compares the findings with similar research conducted in Western industrialised countries It examines explanations for crime and antisocial behaviour in Japan using research and theories from a psychological perspective Topics covered include cultural explanations developmental and life course criminology family violence and family risk factors youth crime and early prevention school factors and bullying mental disorders biosocial factors psychopathy and sexual offending In some parts it challenges and refines the prevailing belief that Japan is a society characterised by low crime and little antisocial behaviour This original project is the most up to date work on crime in Japan and advances the important field of psychological criminology *The Saracen's Codex* Nader Akbari, 2018-02-17 Islam today is one of the biggest challenges Europe is facing not only because of the security issues caused by Islamic terrorism but also because of the nonintegration policy of Muslim immigrants and communities which in the near future will entangle European citizens in cultural conflicts within their own societies Many non Muslim European citizens and residents are sending the clear message to the Muslim communities that in a modern twenty first century society their Islamic and sharia way of thinking is unacceptable Generation after generation Muslims with their Muslim mentality systematically destroyed their own pre Islamic cultures and civilizations converted their countries into cultural wastelands without any hope of progress all because they were forced or preferred to be Muslim Massive Muslim immigration and the resulting fast growing population has already started the same process in Europe and the rest of what we call the free world We are living in the same Europe where the Renaissance put an end to the Inquisition and the rule of the Church but today many do not realize that they are opening the way to a fascism called Islam that is many times more violent and inquisitorial than the practices of the medieval Christian Church Diversity, Justice, and

Community Beverly-Jean M. Daniel, 2016-12-16 This edited collection provides readers with a superb introduction to some of the contemporary issues related to diversity, community and justice in the Canadian context. Grounded in theories of community justice and applied social justice, the text provides a historical, theoretical and intersectional approach to understanding justice and its everyday manifestations for members of diverse populations in Canadian society. Diversity, Justice and Community encourages reflection on the systemic factors that result in the production of criminality in marginalized and oppressed communities. The authors highlight the ways in which differently located groups including Indigenous peoples, women and girls, Black males, Somali youths, the South Asian community and transgendered prisoners experience the justice system while also critiquing standard notions of justice and equity and pointing towards potential solutions to combat inequalities at both the community and institutional level. Disrupting the taken-for-granted assumptions regarding who is a criminal, Diversity, Justice and Community takes an honest look at both the challenges and the opportunities that exist for Canada's increasingly multiracial, multi-ethnic, multicultural and religiously and sexually diverse population. Featuring chapter objectives, discussion questions and additional resources, this engaging text is ideal for students in criminal justice, police studies, police foundations and criminology programs.

Fads, Fakes, and Frauds Tomasz Witkowski, 2022-09-15 This book is a collection of skeptical social essays in which the author reveals that much of our popular

beliefs psychology and science are defective because although we live in the 21st century our approach to them is deeply rooted in our culture and biased by history and evolution These essays help the reader take a step sideways think independently and not fall victim to fads fakes and frauds Anyone who values a deeper understanding of contemporary social reality and the changes taking place in it should read this book from students to scientists and intellectuals Through these essays we learn to look under the veneer of reality behind the altars of science under the scenery of pop psychology and behind the facade of therapeutic culture Thanks to essays on suicide euthanasia and more we also come close to the edge of life and death Contrary to many meticulous social critical analyzes in sharing his thoughts the author takes us on a picturesque journey through bounty hunters ludicrous machines compulsive hoarding Charlie Chaplin and much more

Constitutional Culture, Independence, and Rights Javier Garcia Oliva, Helen Hall, 2023-05-26 In Constitutional Culture Independence and Rights Javier Garcia Oliva and Helen Hall coin the term constitutional culture to encapsulate the collective rules and expectations that govern the collective life within a jurisdiction Significantly these shared norms have both legal and social elements including matters as diverse as standards of parenting the modus operandi of police officers and taboos around sexuality Using Quebec Scotland and Catalonia as case studies the book delves into what these constitutional battles mean for the rights identity and needs of everyday people and it powerfully demonstrates why the hypothetical future independence of these regions would have far reaching practical consequences beyond the realm of political structures and academic theory The book does not present a magic bullet to resolve debates around independence this is not its purpose and the text in fact demonstrates why there is no objectively optimal approach in any or all contexts Instead it seeks to shed light on aspects of these situations often overlooked in discussions around the fate of nations and it addresses what the consequences of constitutional paradigm shifts might be for individuals Constitutional culture is a complex web of interconnected understandings and behaviours and the vibrations from shaking or cutting a fundamental strand will be felt throughout the structure
