The Narrative Turn in Urban Planning Lieven

Ameel, 2020-11-15 Narratives in the context of urban planning matter profoundly Planning theory and practice have taken an increasing interest in the role and power of narrative and yet there is no comprehensive study of how narrative and concepts from narrative and literary theory more broadly can enrich planning and policy The Narrative Turn in Urban Planning addresses this gap by defining key concepts such as story narrative and plot against a planning backdrop and by drawing up a functional typology of different planning narratives In two extended case studies from the planning of the Helsinki waterfront it applies the narrative concepts and theories to a broad range of texts and practices considering ways toward a more conscious and contextualized future urban planning Questioning what is meant when we speak of narratives in urban planning and what typologies we can draw up it presents a threefold taxonomy of narratives within a planning framework This book will serve as an important reference text for upper level students and researchers interested in urban planning
