Women in Cardiovascular Epidemiology and Prevention Liesl Joanna Zühlke, Amanda Henry, Stefania Triunfo, 2023-05-17

We are delighted to present the inaugural Frontiers in Cardiovascular Medicine Women in Cardiovascular Epidemiology and Prevention series of article collections At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in particular Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers Therefore Frontiers in Cardiovascular Medicine is proud to offer this platform to promote the work of women scientists across all fields of basic and clinical cardiovascular medicine The work presented here highlights the diversity of research performed across the entire breadth of cardiovascular epidemiology and prevention research and presents advances in theory experiment and methodology with applications to compelling problems

Guidelines for Reporting Health Research David Moher, Douglas Altman, Kenneth Schulz, Iveta Simera, Elizabeth Wager, 2014-08-06 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear transparent and useful reports This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting the characteristics of good guidelines and how to use reporting guidelines effectively in reporting health research This hands on manual also describes over a dozen internationally recognised published guidelines such as CONSORT STROBE PRISMA and STARD in a clear and easy to understand format It aims to help researchers choose and use the correct guidelines for reporting their research and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading Written by the authors of health research reporting guidelines in association with the EQUATOR Enhancing the QUALity and Transparency Of health Research Network Guidelines for Reporting Health Research is a helpful guide to producing publishable research It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers Systematic Reviews in Health Research Matthias Egger, Julian

P. T. Higgins, George Davey Smith, 2022-05-11 Systematic Reviews in Health Research Explore the cutting edge of systematic reviews in healthcare In this Third Edition of the classic Systematic Reviews textbook now titled Systematic Reviews in Health Research a team of distinguished researchers deliver a comprehensive and authoritative guide to the rapidly evolving area of systematic reviews and meta analysis The book demonstrates why systematic reviews when conducted properly provide the highest quality evidence on clinical and public health interventions and shows how they contribute to inference in many other contexts The new edition reflects the broad role of systematic reviews including Twelve new chapters covering additional study designs methods and software for example on genetic association studies prediction models prevalence

studies network and dose response meta analysis Thorough update of 15 chapters focusing on systematic reviews of interventions Access to a companion website offering supplementary materials and practical exercises www.systematicreviews3.org A key text for health researchers Systematic Reviews in Health Research is also an indispensable resource for practitioners students and instructors in the health sciences needing to understand research synthesis *Opportunities for Organ Donor Intervention Research* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Issues in Organ Donor Intervention Research, 2018-01-21 The organ donation and transplantation system strives to honor the gift of donated organs by fully using those organs to save and improve the quality of the lives of their recipients However there are not enough donated organs to meet the demand and some donated organs may not be recovered some recovered organs may not be transplanted and some transplanted organs may not function adequately Organ donor intervention research can test and assess interventions e g medications devices and donor management protocols to maintain or improve organ quality prior to during and following transplantation The intervention is administered either while the organ is still in the deceased donor or after it is recovered from the donor but before it is transplanted into a recipient Organ donor intervention research presents new challenges to the organ donation and transplantation community because of ethical questions about who should be considered a human subject in a research study whose permission and oversight are needed and how to ensure that such research does not threaten the equitable distribution of a scarce and valuable resource *Opportunities for Organ Donor Intervention Research* focuses on the ethical legal regulatory policy and organizational issues relevant to the conduct of research in the United States involving deceased organ donors This report provides recommendations for how to conduct organ donor intervention research in a manner that maintains high ethical standards that ensures dignity and respect for deceased organ donors and their families that provides transparency and information for transplant candidates who might receive a research organ and that supports and sustains the public's trust in the process of organ donation and transplantation Methods and Biostatistics in Oncology Raphael. L.C Araújo, Rachel P. Riechelmann, 2018-04-16 This book introduces and discusses the most important aspects of clinical research methods and biostatistics for oncologists pursuing a tailor made and practical approach Evidence based medicine EBM has been in vogue in the last few decades particularly in rapidly advancing fields such as oncology This approach has been used to support decision making processes worldwide sparking new clinical research and guidelines on clinical and surgical oncology Clinical oncology research has many peculiarities including specific study endpoints a special focus on survival analyses and a unique perspective on EBM However during medical studies and in general practice these topics are barely taught Moreover even when EBM and clinical cancer research are discussed they are presented in a theoretical fashion mostly focused on formulas and numbers rather than on clinical application for a proper literature appraisal Addressing that gap this book discusses more practical aspects of clinical research and biostatistics in oncology instead of

relying only on mathematical formulas and theoretical considerations Methods and Biostatistics in Oncology will help readers develop the skills they need to understand the use of research on everyday oncology clinical practice for study design and interpretation as well to demystify the use of EBM in oncology Neuro-Oncology Compendium for the Boards and Clinical Practice Maciej M. Mrugala,Na Tosha Gatson,Sylvia C. Kurz,Jennifer L. Clarke,Kathryn S. Nevel,2023 This essential text includes supplementary figures and tables succinct review flashcards end of chapter questions and answers as well as end of volume exams so readers can review and test their own comprehension Each chapter has been reviewed by the editors to ensure cohesive board level verbiage emphasizing practical clinical knowledge Neuro Oncology Compendium for the Boards and Clinical Practice is up to date and comprehensive eliminating the need for multiple sources of study *Federal Register* ,2013-05

Predatory Publishing Jingfeng Xia,2021-12-24 Predatory Publishing introduces and examines many forms of unethical and unprofessional publishing whilst also analyzing its tactics and impact on scholarly communication Covering all aspects of predatory publishing including topics such as predatory journals hijacked publications alternative metrics and fraudulent conferences the book considers the sociocultural geopolitical and technical impact of predatory behaviors Demonstrating that predatory publishing has taken advantage of the open access movement the author highlights the negative impact such publishing practices have had on science discovery and dissemination around the world Efforts to counter unethical and destructive conduct such as journal blacklists peer review sting operations the implementation of the strict journal selection criteria by the Directory of Open Access Journals and government regulations in some countries are also fully described Predatory Publishing is a useful resource for every researcher practitioner and student in the global scholarly community Individuals can expect to get a whole picture of the practice by reading this book and decision makers will find it informative to support their decisions This book will be of interest to those studying and working in the fields of publishing library and information science communication science economics and higher education People in other fields particularly biomedical sciences will also find it useful *House of Commons - Science and Technology Committee: Clinical Trials - HC 104* Great Britain: Parliament: House of Commons: Science and Technology Committee,2013-09-17 Many of the trials taking place today are unregistered and unpublished meaning that the information that they generate remains invisible to both the scientific community and the public This undermines public trust slowing the pace of medical advancement and potentially putting patients at risk All trials conducted on NHS treatments and all other trials receiving public funding should be prospectively registered and their results published in a scientific journal While the focus should be on implementing this change for future trials the Government must also do what it can to ensure that historic trials are registered and published particularly where they have been publically funded The Government should also take steps to facilitate greater sharing of the raw data generated during a trial in a responsible and controlled way with the knowledge and consent of patients The report also draws attention to the recent fall in the number of trials taking place in the UK It finds that the need for multiple

governance approvals from participating NHS organisations remained the biggest barrier to setting up a UK trial but that lack of public awareness was also a key issue Recruiting participants can also be a challenge The report calls on the Government to take its recommendations into account in ongoing discussions regarding the revision of European clinical trials legislation and in its response to the European Medicines Agency s consultation on the release of clinical trial data which closes at the end of this month
